

### Comodo TrustConnect Software Version 1.72

## Setting up TrustConnect on Andriod Devices

Guide Version 1.72.111114

Comodo Security Solutions 1255 Broad Street Clifton, NJ 07013

# How To Set Up TrustConnect On Android Devices

TrustConnect is designed to eliminate many types of data hijacks by preventing criminals from attacking or scanning your system from the local network that you are using to connect to the Internet. It also encrypts all of your traffic destined for the Internet (including Web site addresses, instant messaging conversations, personal information, plain text usernames and passwords and other important information).

This guide provides step-by-step guidance on downloading, installing and configuring TrustConnect client on Android Devices.

1. Tap 'Menu' in the home screen of your Android device.

2. Tap 'Settings' in the menu screen.

The settings interface will be displayed. The settings menu screen might look different depending on the Android device you are using. However, the 'Wireless and networks' screen should be fairly common for most of the Android devices.

Connect	Cancel		

• Enter your TrustConnect username and password.

Tip: Select the 'Remember user name' checkbox and you need not enter the login credentials from next time onwards.

You need to enter TrustConnect service password here (Not the CAM password). To know your service password, login to your CAM Account at https://accounts.comodo.com/account/login and click TrustConnect in the menu bar.
