About Comodo Security Solutions	212

1 Introduction to Comodo One

Comodo One is an integrated platform for managed service providers (MSPs) and enterprises which combines essential productivity and management into a single, easy-to-use console.

Applications are available in three areas of the interface - 'Applications', 'Store' and 'Tools':

Applications – Click 'Applications' on the top-menu to view all integrated apps.

- **Endpoint Manager** - Manage, monitor and secure mobile devices and endpoints which connect to your networks. After enrolling a device, you can quickly apply configuration profiles which determine its network access rights, security settings and general preferences.
- **Comodo Service Desk** - A fully featured ticket management system which allows administrators to implement strong and effective work-flows for internal and customer-facing support departments. **Comodo Service Desk** allows administrators and staff members to respond to tickets, reassign tickets to other departments or personnel, generate reports, create knowledge base articles and more.
- **Comodo Dome Shield** - An enterprise web filtering solution that allows MSPs and enterprises to provide comprehensive DNS based security for their customers and networks. Comodo Dome Shield is available as an SaaS solution and lets you configure granular security and web-category rules.
- **Comodo Remote Monitoring and Management (RMM)** – (Legacy product). Comodo **RMM** is an efficient endpoint monitoring application that lets you monitor and manage multiple endpoints from one centralized console. RMM is available as an integrated module to customers that signed up for Comodo One prior to version 3.0. Customers that signed up after v.3.0 can access RMM functionality in the Endpoint Manager interface.

Store - Click 'Store' on the top-menu to view this interface. The store contains optional applications which let you expand your service offerings.

- **Acronis Cloud Backup** - A perfect solution for all your backup and disaster recovery needs. This cloud-based application has the ability to backup any application and system including Windows, Linux and Mac. Available with pre and post-paid subscription models, this solution fits the needs of any enterprise.
- **cWatch** - CWatch is available as Security-as-a-Service for the protection of the web applications and web servers on your customers' networks. The servers are monitored 24x7x365 by experts from the Comodo SOC who will handle incident response, and provide state of the art signature based, machine learning and expertly hand crafted security prevention policies that are all constantly updated to ensure protection from emerging threats.

- **Quote Manager** - An end-to-end quote management solution that lets you quickly create, send and manage quotes for customers. You can keep track of submitted quotes, send reminders to customers, resolve customer queries almost instantly and view detailed sales reports.
- **Comodo Dome Antispam** - An enterprise antispam and threat prevention solution that uses a sophisticated array of spam filters, anti-virus scanners and content analysis engines to prevent unsolicited mail from ever entering your network. Available only to 'C1 Enterprise' customers.
- **Comodo Dome Antispam - MSP** - An antispam and threat prevention solution that monitors email traffic on your customers' networks. The solution uses spam filters, anti-virus scanners and content analysis engines to block unwanted/dangerous mail from reaching your customer's networks. Available only to C1 - MSP customers.
- **Comodo Firewall Central Manager** - Firewall Central Manager allows you to manage several Firewall Virtual appliances installed on your customers' networks from a single central console.
- **Comodo Dome Secure Web Gateway** - A real time web traffic scanning solution that provides comprehensive web content and security control to your customers. Includes URL filtering, malware protection, Valkyrie real-time file verdicting and portable containment.
- **Customer Relationship Management (CRM)** - Sales automation tool which lets businesses create fluid workflows to generate, nurture and close customer leads.
- **Comodo Dome Firewall Virtual Appliance** - Control firewall policy, antivirus, intrusion prevention, website filtering, traffic monitoring, VPN and proxy servers through a single interface. The firewall is provisioned in OVA or ISO format. These formats can be installed on bare-metal appliances and virtual servers such as Virtualbox and VMware.
- **Comodo Dome Data Protection** - A cloud based data protection enterprise solution that enforces policies on data in use, data in motion and data at rest to prevent data loss. Available only to 'C1 Enterprise' customers.
- **cWatch EDR** - Endpoint Detection and Response. A solution that provides unrivaled visibility into activity on Windows endpoints on your network. EDR lets you view all security related incidents in a detailed timeline and generates instant alerts if an attack occurs.

Tools. Click 'Tools' on the top-menu to view this area. The following utilities are available:

- **Comodo Cleaning Essentials** - Security software for Windows endpoints which contains tools designed to identify and remove malware and unsafe processes from infected computers. Includes a fully customizable malware scanner and an advanced system monitoring tool which allows users to identify and kill any unsafe processes with a single click.
- **Network Assessment Tool** - Allows MSPs and enterprises to perform in-depth scans on networks to identify a wide range of server, endpoint and network vulnerabilities. The tool will also prepare detailed risk reports for scanned networks along with a risk mitigation plan containing actionable advice to address each issue.
- **Unknown File Hunter Tool** - A lightweight scanner that locates all files on your network that have an 'unknown' trust rating. While safe and malicious files are identified easily, the files that do not fall into these two categories are called 'Unknown'. It is in this category that most zero-day threats and APTs are to be found. Unknown File Hunter allows you to upload unknown files to our 'Valkyrie' analysis service where they will undergo a battery of tests to determine whether they are safe or malicious.
- **Auto Discovery and Deployment Tool** - Easily deploy applications to multiple endpoints via Active Directory, Workgroup or IP address / IP range / host name.
- **Remote Control by ITarian** - Remotely access Windows and Mac OS devices to solve issues, install third party software or run system maintenance.

This guide is split into the following sections:

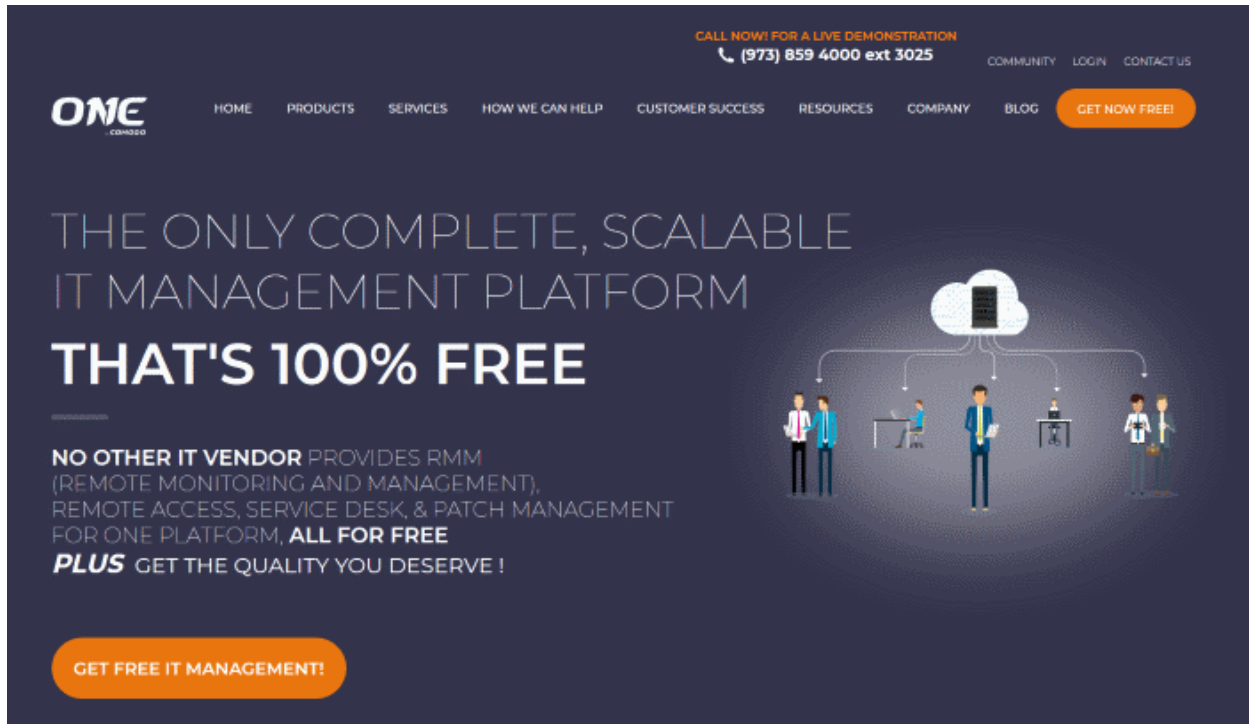

- **Signing up for a Comodo One account** - How to create an account
 - **Logging-in to your Account** - How to login into the Comodo One interface
- **The Administrative Console** - A snapshot of main functional areas of Comodo One

- **The Dashboard** - Displays consolidated, 'at-a-glance' statistical summary of vital information like statuses of managed endpoints, available patches, tickets and more
- **Managing Administrators and Roles** - Explains how to add administrators and manage roles
 - **Managing Administrators** - Explains how to add administrators and assign roles
 - **Managing Roles** - Explains how to create and manage roles
 - **Admin Privilege Levels** - Outline of administrative privileges
- **Managing Companies** - Explains how to manage companies for an account
- **Accessing C1 Modules** - Explains the methods you can open the modules
- **App Store** - Explains how to buy other Comodo products and add CDM as a module in C1
- **Quick Actions** - Explains how to access to important tasks in various C1 applications using shortcuts in the C1 interface
- **Tool set** - Explains how to download utility software for deployment on your customer networks
- **Managing your Account** - Explains how to manage your account details, share licenses, upload your company logo and provide support contact information. Company name, logo and support details will be included in all reports that you generate.
- **Managing Application Subscriptions, Usage, Billing and Settings** - Explains how to add new subscriptions, view usage and billing details as well as how to configure Firewall and Data Protection URL settings
- **Reports** - Explains how to schedule and generate reports
- **Notifications** - Explains how to view news and notifications from Comodo
- **View Audit Logs** - Explains how to view log of events from Comodo One portal and Service Desk modules
- **Configuring C1 Settings** - Explains how to change your password to login to C1 console and configure application launch settings
- **Comodo One Support** - Explains how to request support from Comodo.
- **Viewing Release Notes** - Explains how to view the release notes for all the versions of C1
- **Appendix: C1 Products** - Provides the details of C1 products available for MSPs and Enterprises

2 Sign up for a Comodo One Account

Getting a Comodo One account is very easy and can be completed in a few steps.

- Visit <https://one.comodo.com/>
- Click 'Get Now Free!' at the top right

- Next, enter your email address for verification:

A screenshot of the 'Free Signup' form. The form has a dark blue background. At the top, the text 'Free Signup' is displayed in white. Below this, there is a white input field with the placeholder text 'Enter your email'. At the bottom of the form, there is a red button with the text 'Get Free Access Now' in white.

- Click 'Get Free Access Now'

Complete the short enrollment form:

100% Free - No Payment Information required

Email Address

Password

Phone

GET STARTED NOW

By clicking "GET STARTED NOW", you agree to our [terms and conditions](#)

- **Email Address** - Pre-populated with the address you provided in the previous step. You will receive the verification link to this email address.
- **Password** - Create a password for your C1 account. Password rules:
 - At least eight characters long
 - Contain a mix of lower case and upper case letters
 - Contain at least one numeral
 - Contain at least one of the following special characters - '(!#\$%^&*")'
- **Phone** - Primary contact number
- Click the 'Get Started Now' button.

- You will receive a verification mail to confirm your email address:

Hello,

Thank you for signing up to Comodo One. Please click on the link below to verify your email address and activate your account.

[Verify my email](#)

Thank you for joining The Comodo One Community!

Comodo One Technical Support

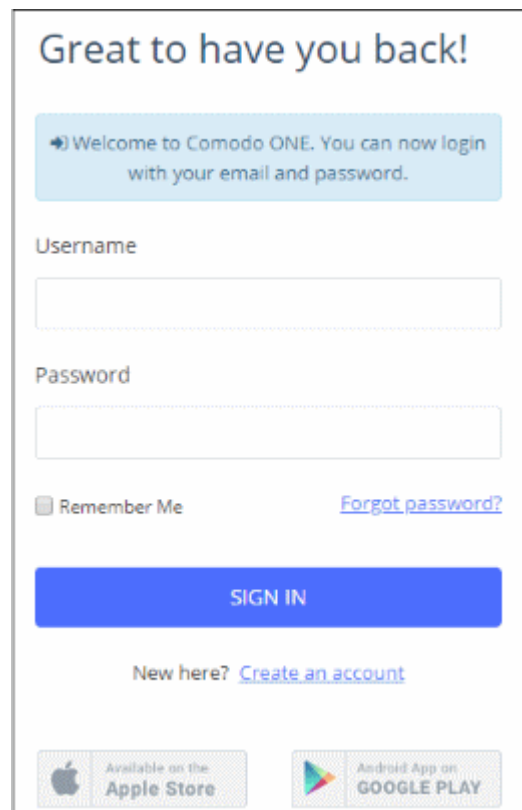

Call: 973-396-1232 (24/7)

Email: c1-support@comodo.com

Forum: <https://c1forum.comodo.com>

- Click the 'Verify my email' button in the mail to activate your account:

You will be taken to the C1 login page after successful verification:

Great to have you back!

Welcome to Comodo ONE. You can now login with your email and password.

Username

Password

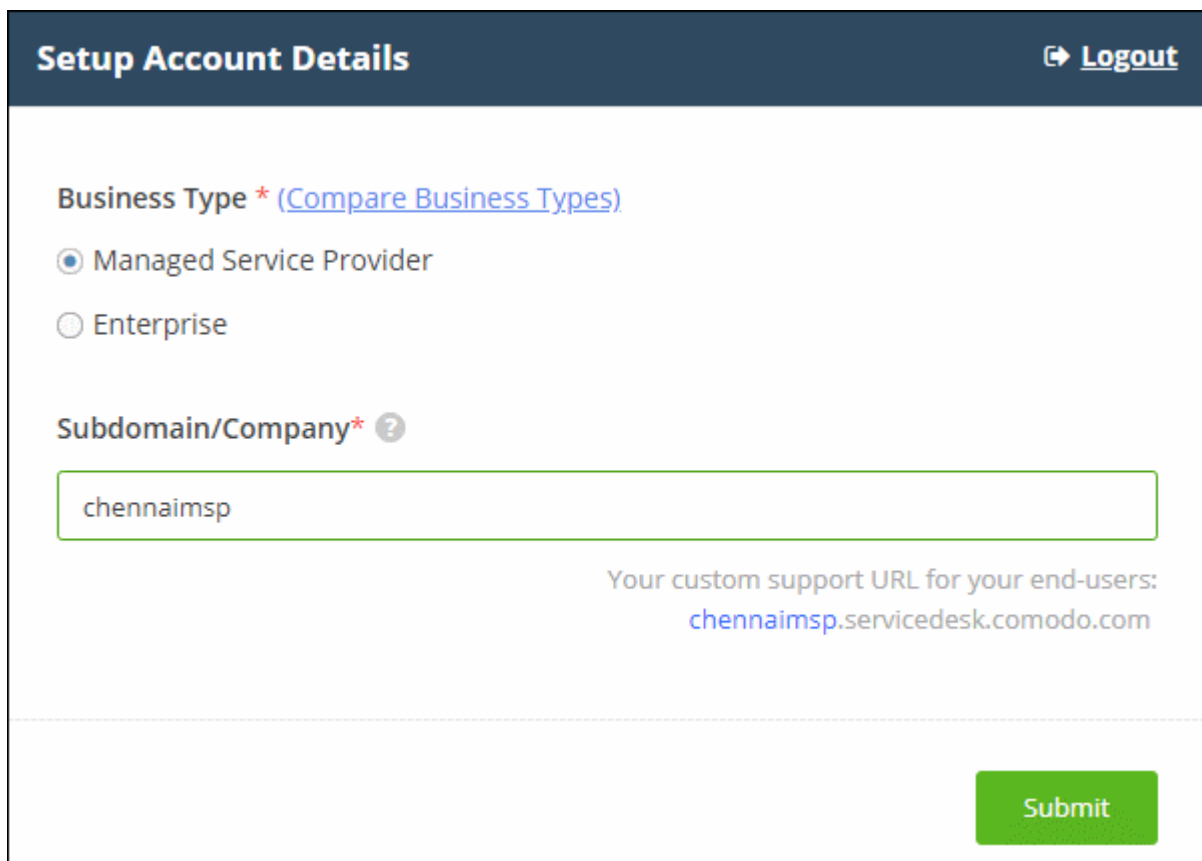

Remember Me [Forgot password?](#)

SIGN IN

New here? [Create an account](#)

Available on the **Apple Store** | Android App on **GOOGLE PLAY**

- Enter your email address and password and click 'Sign In'.
- You need to complete your account details after first-login:

Setup Account Details [Logout](#)

Business Type * ([Compare Business Types](#))

Managed Service Provider

Enterprise

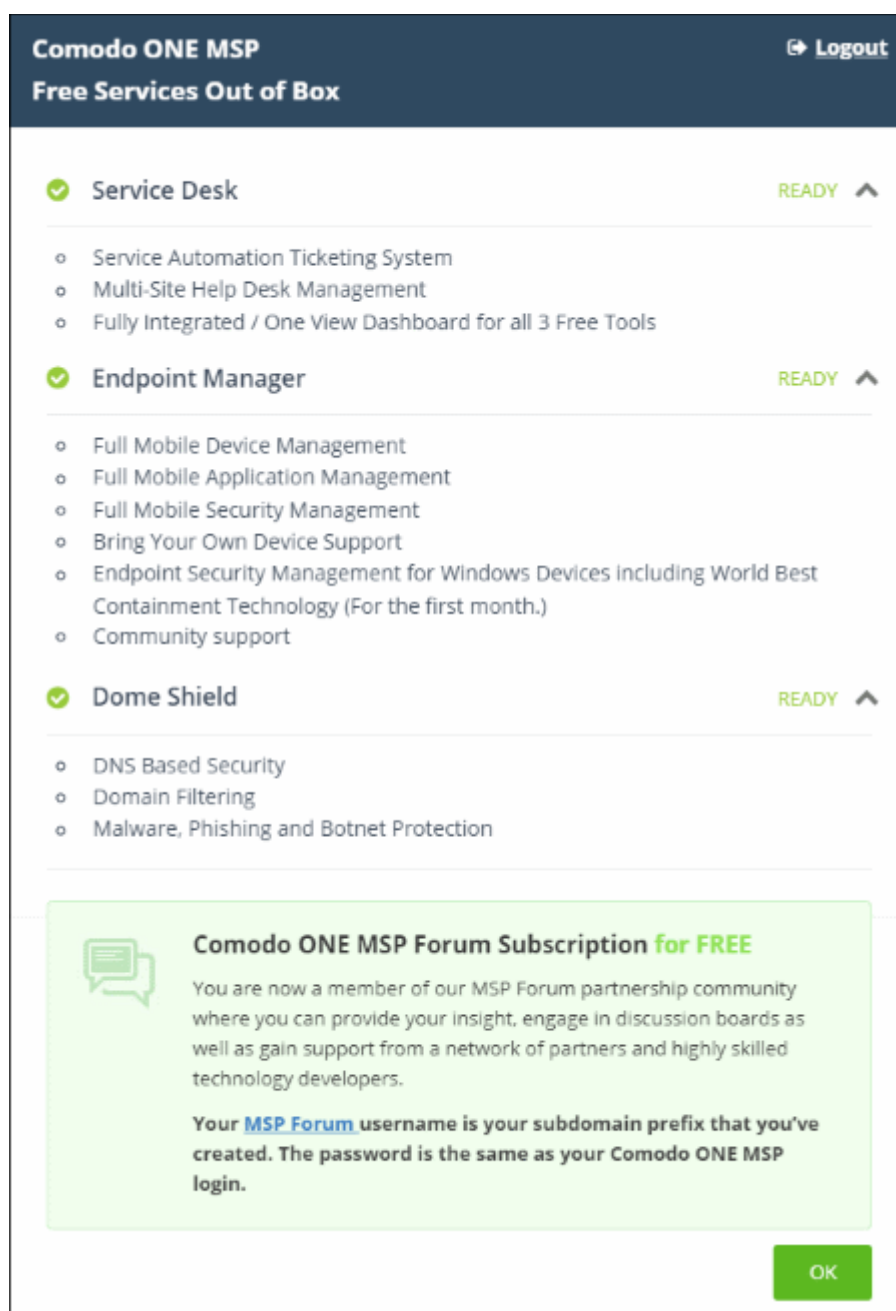

Subdomain/Company* ?

Your custom support URL for your end-users:
chennaimsp.servicedesk.comodo.com

Submit

- Complete the form with your business type and sub-domain details to finalize account setup.
 - **Business Type** - This determines the version of Comodo One that you receive (either 'MSP' or 'Enterprise').
 - The default and licensed products vary according to the business type.
 - Click the 'Compare Business Types' link to see the products and features available with each type. See **Appendix** for more details on C1 modules for each business type.
 - **Subdomain/Company** - The sub-domain will form part of the unique URL you use to access modules such as 'Service Desk'.
 - For example, if you enter the sub-domain 'acme', you will access the service desk module at 'https://acme.servicedesk.comodo.com'.
- Click 'Submit'

The next screen shows a summary of your active services:

Comodo ONE MSP Logout

Free Services Out of Box

- ✓ **Service Desk** READY ^
 - Service Automation Ticketing System
 - Multi-Site Help Desk Management
 - Fully Integrated / One View Dashboard for all 3 Free Tools
- ✓ **Endpoint Manager** READY ^
 - Full Mobile Device Management
 - Full Mobile Application Management
 - Full Mobile Security Management
 - Bring Your Own Device Support
 - Endpoint Security Management for Windows Devices including World Best Containment Technology (For the first month.)
 - Community support
- ✓ **Dome Shield** READY ^

 - Malware, Phishing and Botnet Protection

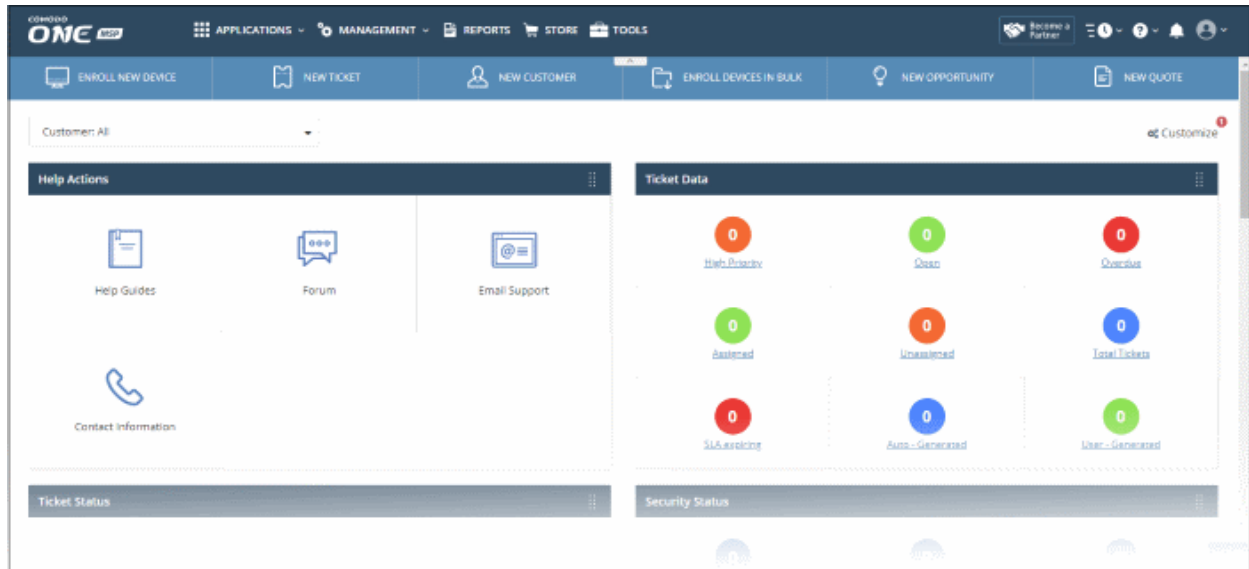

Comodo ONE MSP Forum Subscription for FREE

You are now a member of our MSP Forum partnership community where you can provide your insight, engage in discussion boards as well as gain support from a network of partners and highly skilled technology developers.

Your **MSP Forum** username is your subdomain prefix that you've created. The password is the same as your Comodo ONE MSP login.

OK

- Click 'OK' to finish setup. You will be taken to the Comodo One Dashboard. The 'Welcome' pop-up contains help videos to get you started:

- That's it. You have successfully created a Comodo One account.
- Note - This account will be automatically granted 'Account Admin' privileges and cannot be deleted. You will be able to create 'Admins' and 'Technicians' under this account. See '**Manage Administrators**' for more details.
- You can login to your account at anytime at <https://one.comodo.com/app/login>.
- You can also login at <https://accounts.comodo.com/> with your C1 username and password to manage your license and account details.

Available on the **Apple Store**

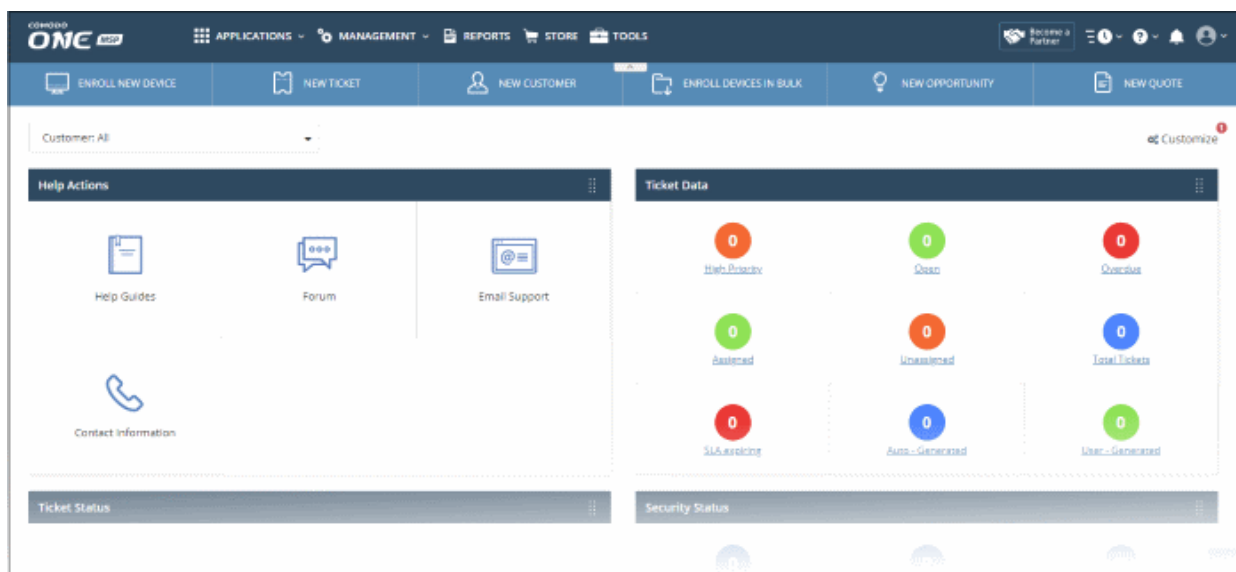

Android App on **GOOGLE PLAY**

- Click 'Forgot Password?' to reset your password if you can't remember it.

- C1 also has a two-factor authentication feature that provides additional login security. This can be enabled in 'Management' > 'Account Security Details'. See **Setting up Two-Factor Login Authentication** to find out more.
- Your C1 account can also be managed from your mobile device (iOS and Android supported). Click the Apple Store or Google Play link on the login box to download the app.

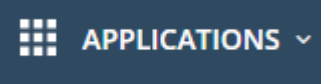

3 The Admin Console

The admin console gives you fast access to all C1 applications and dashboard stats, and allows you to add new modules, manage subscriptions, manage staff roles and more.

The name of the user that is currently logged in is shown at top right. The menu bar at the top allows you to navigate to different features.

Menu Items

	<p>Home - Click this to open the dashboard.</p> <p>C1 Dashboard - View the status of licensed applications, notifications and more. Click here for more details.</p> <p>Your business type, 'MSP' or 'Enterprise', is shown beside the logo.</p> <p>TIP: You can change which application automatically opens after you login.</p> <ul style="list-style-type: none"> • See setting a licensed application as your login page in Configure C1 Settings for more details. • Click the C1 logo at top-left to open the dashboard
	<p>Applications - Access your account's licensed applications. Click here for more details.</p>
	<p>Management - Allows MSP and Enterprise admins to:</p> <ul style="list-style-type: none"> • Add and edit staff members and assign roles to them • Create custom roles with different privilege levels. These roles can then be assigned to staff and administrators

	<ul style="list-style-type: none"> View and edit Comodo One account details, manage licenses and access security settings. View subscription, usage and billing details for your C1 applications MSP admins can add, edit and remove customer organizations. View audit logs from Comodo One portal and Service Desk <p>Click here for more details.</p>
	Reports - View and manage reports on service desk tickets, patch management, managed devices, Windows antivirus, file statistics and Valkyrie reports. Click here for more details.
	Store - Subscribe to Comodo products from this area. Click here for more details.
	Tool Set - Download free tools and utilities. Click here for more details.
	Partner - Available if you add a C1 MSP partner account. Click this icon to login to your Comodo account at https://accounts.comodo.com/login .
	Become a Partner - Click to start the process of becoming an MSP partner. See Comodo License Account Details to find out how to add an MSP account.
	What's New - View a list of new features in the latest version of Comodo One:
	Quick Actions - Shortcuts to important tasks in various C1 applications. Click here for more details.
	Version Number - Available at the foot of the dashboard page. Click the version number to view the release notes page. This outlines new features and bug-fixes in the current release. See 'View Release Notes' for more details.
	Notifications - Displays alerts and notifications from C1 and licensed modules. Click here for more details.
	Help - Shows shortcuts to Comodo One help pages and forum pages. See 'Comodo One Support' for more details.
Logged-in User Name	Click your username to access the following options: <ul style="list-style-type: none"> Settings - Change your password, time zone and application launch settings. See 'Configuring C1 Settings' for more details. Logout - Sign-out of C1

This icon appears at the bottom-right of the interface and provides assistance with common tasks:

- Help – A list of help topics. Click a topic and follow the walk-through to complete it.
- Tasks – Covers basic tasks such as enrolling new device and so on. Click a task to open the guide.
- Click 'What else do you want to see?' and submit a request for a new help topic.
- [Click here](#) for more information.

Dashboard - The dashboard is shown by default after login and can be accessed at any time by clicking the 'Comodo One' icon at top-left.

- The dashboard provides statistics about service desk tickets, available patches, applications, device operating systems, endpoint connection status and more. See '[The Dashboard](#)' for more details.
- You can change your default login page in the 'Settings' area (click your username at top-right > Settings > 'Comodo One Login Page'). See '[Configuring C1 Settings](#)' for more details.

Applications - Allows account admins, MSP/Enterprise admins and staff members to access Comodo One modules.

- **Service Desk** - Fully featured support ticketing system which allows enterprises to implement strong and effective work-flows for internal and customer-facing support departments. The solution allows admins and staff to track and manage tickets submitted by users, assign tickets to departments or organizations, generate reports and much more.
- **Endpoint Manager** – Manage, monitor and secure mobile devices and endpoints which connect to your networks. After enrolling a device, you can quickly apply configuration profiles which determine its network access rights, security settings and general preferences. See the [Endpoint Manager](#) guide for more details.
- **Comodo Remote Monitoring and Management (RMM)** - A complete endpoint management solution which combines endpoint monitoring and alerting with ultra-fast remote desktop sharing, a robust ticketing sub-system, application life-cycle management, process and service management, endpoint security management and custom scripting for automated break-fixing. See [RMM guide](#) for more details.

Note: The standalone RMM is a legacy product available only to customers that signed up to C1 prior to version 3.0. RMM functionality has now been transferred to the Comodo ITSM product.

- **Dome Shield** - A DNS based web security solution that allows MSPs to provide strong, real-time protection against internet threats for their customers. See the dedicated online help guide for [Dome Shield](#) for more details.
- **Acronis Cloud Backup** - Acronis Cloud Backup is capable of backing up data from any source and recovers to any destination and system. This module is optional and can be added after creating a Comodo One account. See '[Add Acronis Cloud Backup](#)' for more details.
- **Quote Manager** - Quote Manager lets you generate, manage and send customer price quotes. This module is optional. See '[Add Quote Manager](#)' for more details.
- **cWatch** - cWatch is a security intelligence and event management (SIEM) product. This module is available for MSP customers only. See '[Add cWatch](#)' for more details.
- **Comodo Dome Secure Web Gateway** - A real time web traffic scanning solution that provides comprehensive web content and security control. This module is optional. See '[Add Comodo Secure Web Gateway](#)' for more details.

- **Customer Relationship Management (CRM)** - An end-to-end sales automation solution that allows you to assign, nurture and close customer leads faster than ever. This module is optional. See '[Add Comodo Customer Relationship Management](#)' for more details.
- **Comodo Dome Firewall Virtual Appliance** - The Dome Firewall includes a web-application firewall, antivirus scanning, intrusion prevention, website filtering and traffic monitoring. The application is provisioned in OVA or ISO format. These formats can be installed on bare-metal appliances and virtual servers such as Virtualbox and Vmware. This module is optional (available for Enterprises and MSP) and can be added after creating a Comodo One account. See '[Add Comodo Dome Firewall Virtual Appliance](#)' for more details.
- **Comodo Dome Data Protection** - Allows companies to prevent data leaks by implementing strict controls on confidential data in motion and at rest. This module is optional and is only available for enterprise customers. See '[Add Comodo Dome Data Protection](#)' for more details. (Available only for C1 - Enterprise customers)
- **Comodo Dome Antispam** - An enterprise antispam and threat prevention solution that uses a sophisticated array of spam filters, anti-virus scanners and content analysis engines to prevent unsolicited mail from ever entering your network. This module is optional and is only available for enterprise customers. See '[Add Comodo Dome Antispam](#)' for more details. (Available only for C1 - Enterprise customers)
- **Comodo Dome Antispam - MSP** - An antispam and threat prevention solution that monitors email traffic on your customers' networks. The solution uses spam filters, anti-virus scanners and content analysis engines to block unwanted/dangerous mail from reaching your customer's networks. This module is optional and is only available for MSP customers. See '[Add Comodo Dome Antispam - MSP](#)' for more details.
- **Comodo Firewall Central Manager** - Firewall Central Manager allows you to manage several Firewall virtual appliances installed on your customers' networks from a single central console. See '[Add Comodo Dome Firewall Central Manager](#)' for more details.
- **cWatch EDR** - A cloud based Endpoint Detection and Response solution that provides unrivaled visibility to the activities in the Windows endpoints on your network environment. EDR allows you to view security related incidents in a detailed timeline and generates instantaneous alerts if an attack occurs. See '[Add cWatch EDR](#)' for more details.

Management - Manage customer accounts, staff accounts, roles, subscriptions and more. The management area contains the following sections:

- **Customer** - Displays all customer organizations added by the account administrator. Available to MSP customers only.
 - You can add any number of companies depending your subscription level.
 - Companies you add here are automatically added to all integrated applications (Service Desk, Endpoint Manager and Quote Manager). Companies are visible to all MSP admins when they are in those modules.
 - Module-specific users and administrators can be added under these companies from within each module.
 - See '[Managing Companies](#)' for more details.
- **Staff Management** - Staff members added here can access all modules in Comodo One. You can set up different privileges for each staff member.
 - Service Desk. Service desk staff that were originally added to C1 with admin privileges (aka an 'MSP/Enterprise Admin') can access both the admin and staff panels. Staff without admin privileges can only access only the service desk staff panel.
 - New staff members will receive an account verification email and be asked to create a unique password. See '[Managing Administrators](#)' for more details.
- **Roles** - Administrators can create new admin and staff roles with different privileges. Roles can be assigned to staff/admins as required. See '[Managing Roles](#)' for more details.

- **Account** - Allows account administrators to personalize and edit account details such as name, email address, address and phone numbers. You can also view your account license details. See '**Managing your Account**' for more details.
- **Applications** - Allows you to manage billing, usage, licenses and settings for each of your 'App Store' purchases. See '**Manage Application Subscriptions, Usage, Billing and Settings**' for more details.
- **Audit Logs** - Admins and staff members can view event logs from Comodo One and Service Desk modules. See '**View Audit Logs**' for more details.

Reports - Admins can generate reports on service desk, patch management, managed devices, file statistics and more. You can also schedule automatic reports. See '**Reports**' for more details.

Store - Displays Comodo applications that are available for C1 users. Some applications can be added as 'integrated' C1 modules and some are available as standalone applications. For a full list of applications available for both MSP and enterprise customers, please refer to '**Appendix - C1 Products**'. Refer to the section '**App Store**' for more details about how to add applications as integrated modules.

Tools - Allows administrator to download free utilities for use on customer networks. The available applications are:

- **Comodo Cleaning Essentials** - Comodo Cleaning Essentials (CCE) is a set of computer security tools designed to identify and remove malware and unsafe processes from infected computers.

Major features include:

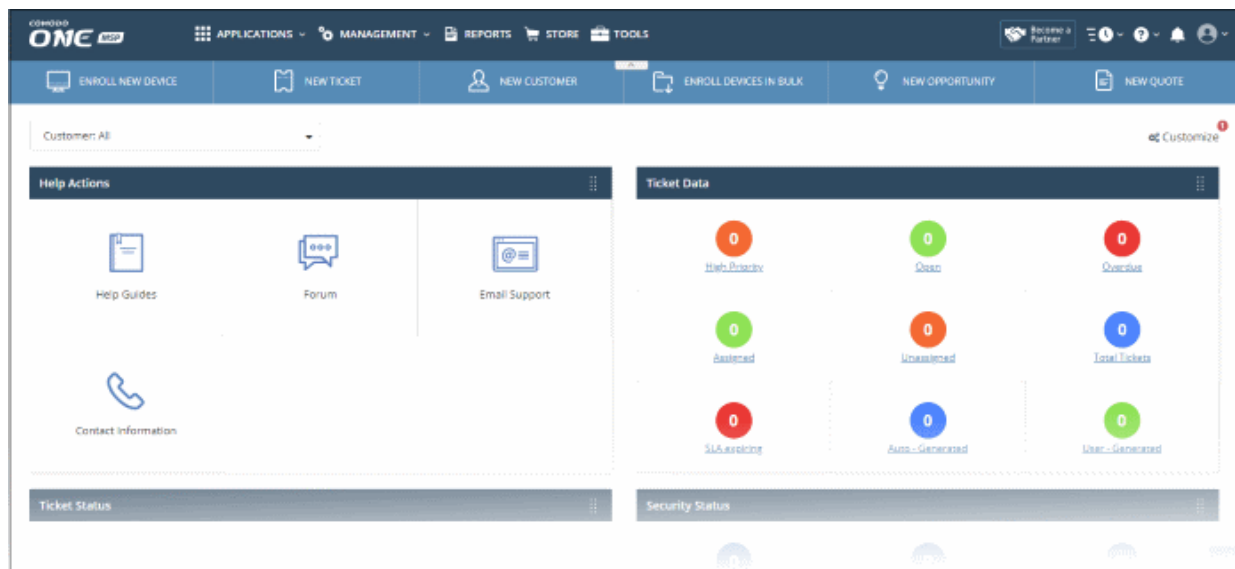

- **KillSwitch** - an advanced system monitoring tool that allows users to identify, monitor and stop any unsafe processes that are running on their system.
- **Malware scanner** - Fully customizable scanner capable of unearthing and removing viruses, rootkits, hidden files and malicious registry keys hidden deep in your system.
- **Autorun Analyzer** - An advanced utility to view and handle services and programs that were loaded when your system booted-up.

CCE is a lightweight, portable application which requires no installation and can be run directly from removable media such as a USB key, CD or DVD. For more details, see the CCE guide at <https://help.comodo.com/topic-119-1-328-3516-Introduction-to-Comodo-Cleaning-Essentials.html>.

- **Network Assessment Tool** - Network Assessment tool (NAT) allows network administrators to perform in-depth scans on client networks to identify a wide range of server, endpoint and network vulnerabilities. The tool will also prepare detailed risk reports for scanned networks along with a risk mitigation plan containing actionable advice for each issue. Setup is easy with a simple wizard which allows users to import networks via Active Directory, Workgroup or IP range.
- **Unknown File Hunter Tool** - The Unknown File Hunter (UFH) tool is a lightweight scanner that is capable of identifying unknown and potentially malicious files residing on your customer's network. After scanning networks and systems, it will classify all audited files as 'Safe', 'Malicious' or 'Unknown'. While 'Safe' files are OK and 'Malicious' files should be deleted immediately, it is in the category of 'Unknown' that most zero-day threats are to be found. The UFH scanner allows you to upload these files to our Valkyrie servers where they will undergo a battery of run-time tests designed to reveal whether or not they are harmful. You can view the results of these tests in the UFH interface.
- **Auto Discovery and Deployment Tool** - Comodo Auto Discovery and Deployment Tool is an enterprise class bulk application deployment tool that is capable of deploying applications remotely to endpoints on a network. Remote bulk deployment methods include via Active Directory, Workgroup, or IP address/IP range/host name.
- **Remote Control by ITarian** - Remotely access Windows and Mac OS devices to solve issues, install third party software or run system maintenance.

4 The Dashboard

The 'Dashboard' contains statistics, charts and important information from all C1 modules. This includes service desk tickets, endpoint patch status, operating system breakdown, endpoint security policies and more.

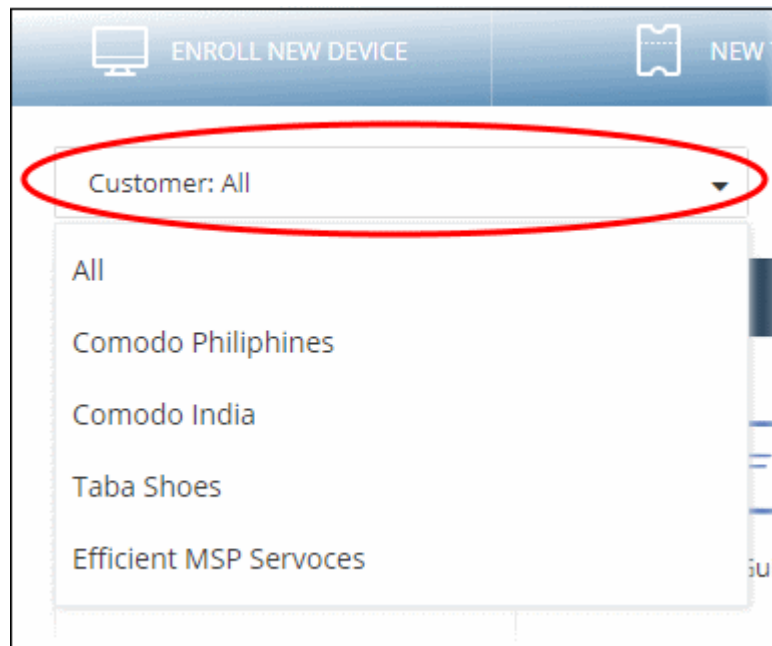

- The **Quick Action** toolbar contains short-cuts to key tasks in various C1 products:

- **Enroll New Device** - Endpoint Manager. Opens the 'Device List' page. Click 'Enroll Device' to add an individual device.
- **New Ticket** - Service Desk. Lets you create a new support ticket in the Service Desk module.
- **New Customer** - C1 portal. Create a new C1 customer (MSPs only). Customers you create here will be available in all integrated modules (Endpoint Manager, Service Desk, Quote Manager etc).
- **Enroll Devices in Bulk** - Endpoint Manager. Download the packages required to enroll multiple devices into Endpoint Manager. These include the communication and security clients, and HTTPS proxy server agent.
- **New Opportunity** - CRM. Opens the 'Create New Opportunity' page.
- **New Quote** - Quote Manager. Opens the 'Quotes' page so you can create a new sales or service quotation.

MSP customers - The dashboard shows combined stats for all companies you have added to the account. You can change this to show individual companies if required:

- Click the 'Customer' drop-down on the left

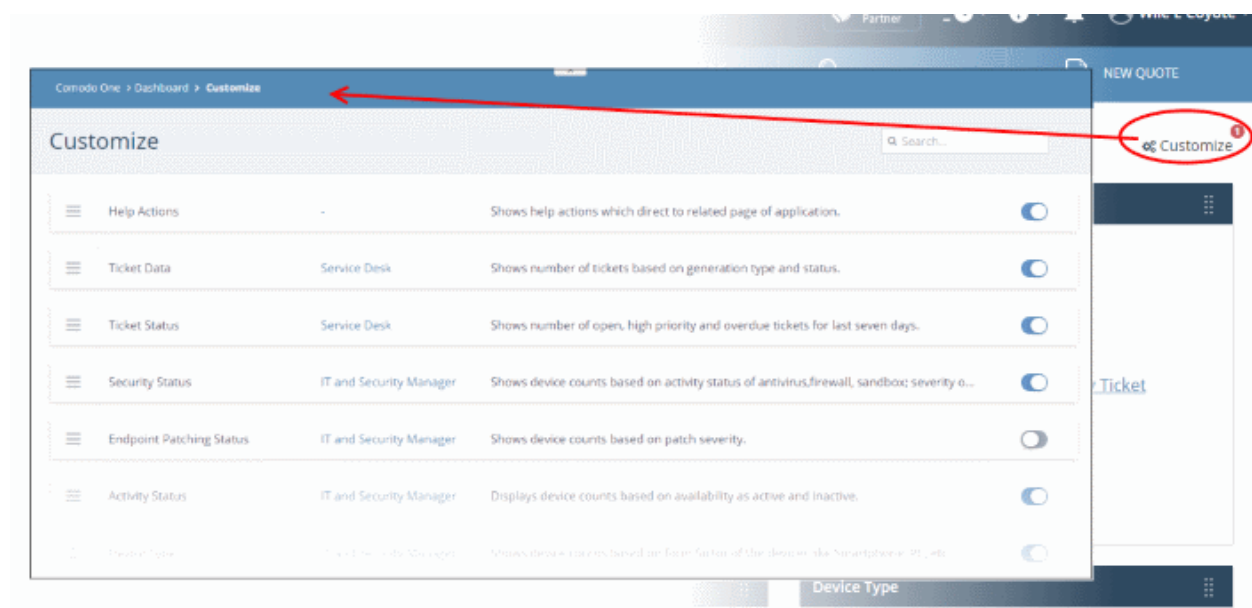

- 'All' - View statistics for all companies
- or
- Select a specific a company. The dashboard will auto-update with your chosen statistics.

Enterprise customers - the dashboard only shows stats for your company.

Customize Dashboard Charts

The dashboard shows bar charts, pie-charts and tables related to the company. You can view, hide or re-order items as required.

- Click 'Customize' at the far end of the interface to change dashboard layout:

- Use the switches on the right to show or hide an item.
- The changes are automatically applied. Click the 'Comodo One' logo to return to the dashboard.
- The number of disabled components is shown next to the 'Customize' link: 

- Drag-and-drop a row to re-order it on the dashboard or click the menu icon on a tile and move to a new position.

Dashboard Panes

Endpoint Manager - Security Status

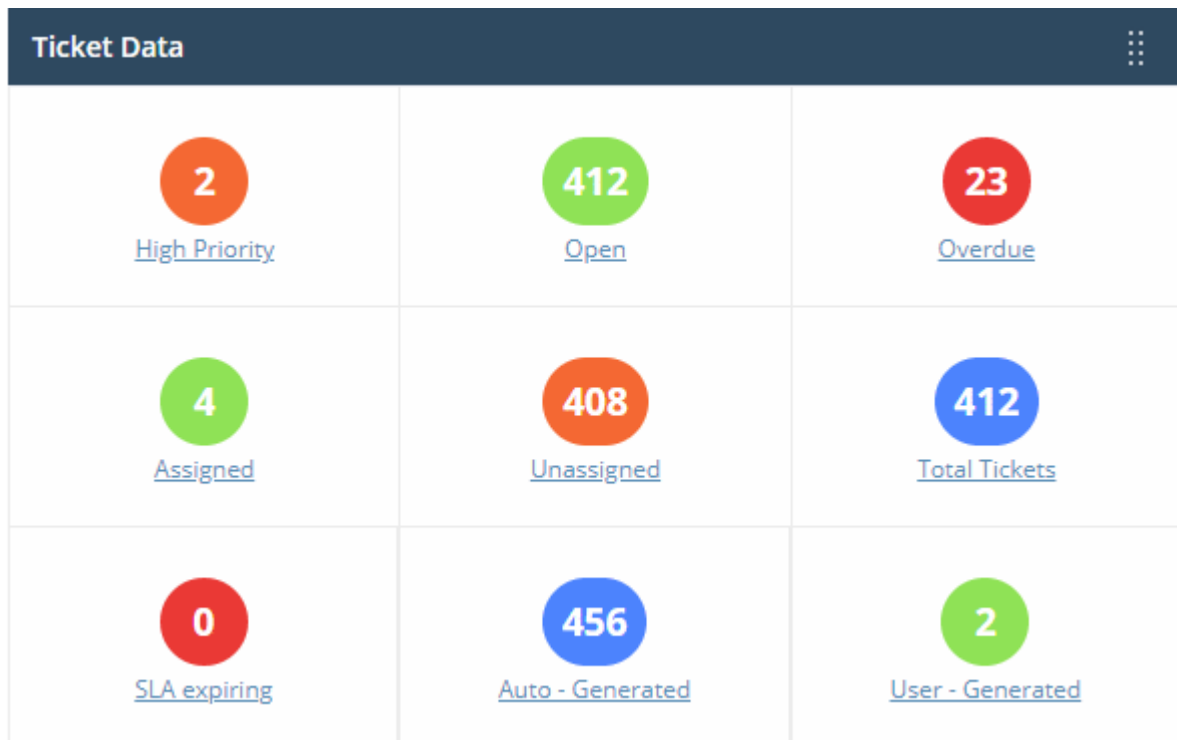

- Security information about devices you have added to Endpoint Manager. Statistics include:
 - How many devices have the firewall, antivirus or sandbox disabled
 - How many devices need virus database updates
 - How many devices are infected and how many are clean
 - How many devices have operating system patches outstanding

- Click any link to open the device list page in endpoint manager. From here you can fix items as required.

Service Desk - Ticket Data

- Key data about your service desk tickets. Statistics include:
 - How many tickets are open, overdue and so on.
 - Number of tickets auto-created by C1 applications like Endpoint Manager.
 - Number of tickets created by users.

- Click any link to view the relevant list of tickets in Service Desk. [Click here](#) for more details about managing SD tickets.

Service Desk -Tickets Status

- The number of overdue, open and high priority at various points in time.

- Place your mouse cursor over a section to see the status of tickets for that particular date.
- If no tickets are available, you instead will see link - 'Click Here to Create Your First Ticket'. See https://help.comodo.com/topic-289-1-625-7854-Manage-Tickets.html#create_new_user for help to create tickets.

Endpoint Manager - Endpoint Patch Status

- Shows how many of your devices are missing patches, and how many are fully patched.

Endpoint Patching Status

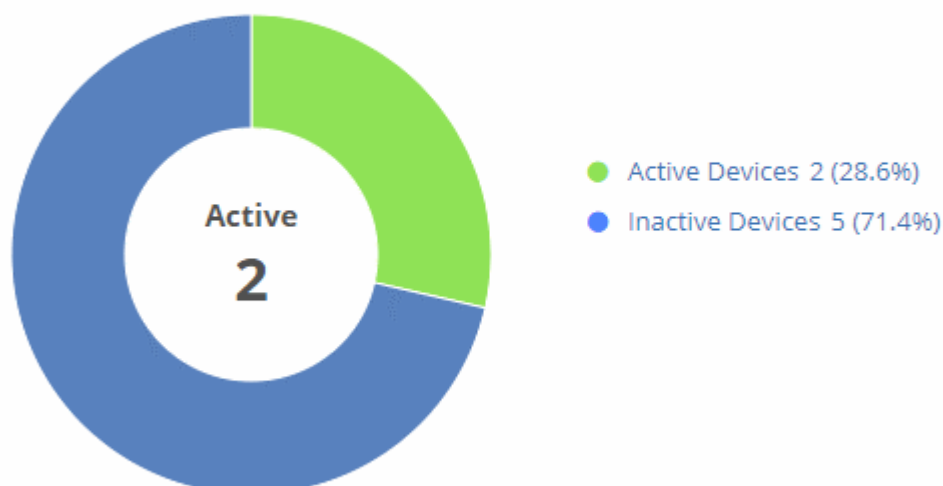

- Place your mouse on a sector to view the number of endpoints with the respective patch status.
- Click a link on the right to view the relevant list of devices in Endpoint Manager.

Endpoint Manager - Activity Status

- Shows how many of your devices are currently connected to Endpoint Manager.
- 'Inactive' means devices that have not connected for more than a day.

Activity Status

- Place your mouse on a sector to view the number of endpoints with that status.
- Click a link on the right to view the relevant list of devices in Endpoint Manager.

Endpoint Manager - Device Type

- Shows enrolled devices by device type.
- Types include PC, servers, smartphones and tablets.
- Device types are on the X-axis and quantity of endpoints on the Y-axis.

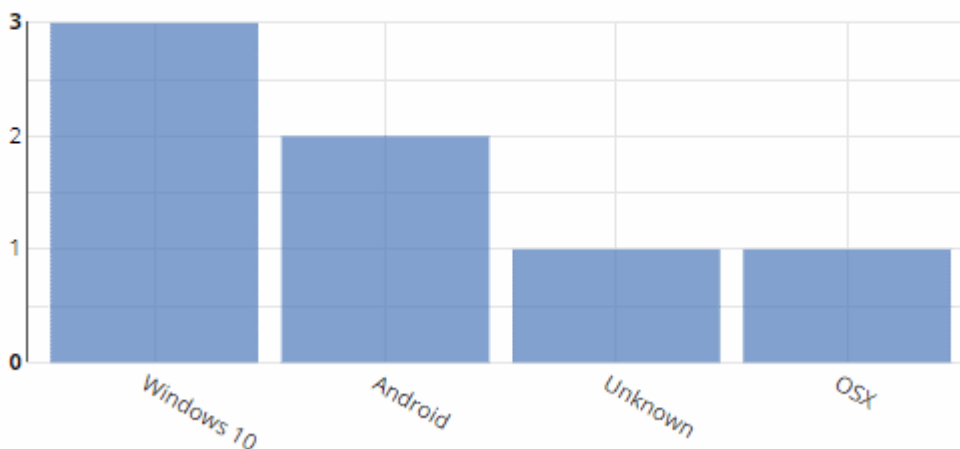

- Place your mouse on a bar to view the number of endpoints of that type.
- Click a bar to view the relevant list of devices in Endpoint Manager.

Endpoint Manager - Operating Systems

- Shows enrolled devices by operating system.

Operating Systems

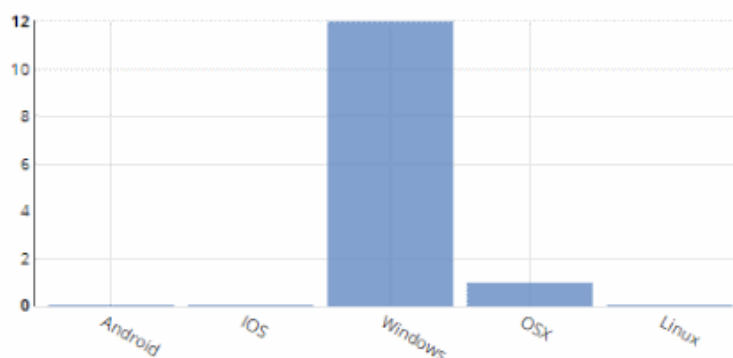

- Place your mouse on a bar to view the number of endpoints of that OS.
- Click a bar to view the relevant list of devices in Endpoint Manager..
- If you haven't added any devices yet, then this area will instead show a link - 'Click Here to Add Your First Device'.
- This opens the 'Device Management' interface. See '<https://help.comodo.com/topic-399-1-786-10126-Enrolling-User-Devices-for-Management.html>' for help to enroll a device.

Endpoint Manager - Profile Status

- How many devices of each operating system have an active Endpoint Manager profile installed.
- Operating systems are on the X-axis. The number of devices is on the Y-axis.

Profile Status

- Place your mouse on a bar to view the number of endpoints of that category.
- Click a bar to view the relevant list of devices in Endpoint Manager.

Quote Manager - Sales Funnel

- The number of quotes that have been accepted, published and are in draft status.

- This widget is only available if Quote Manager is enabled.

Sales Funnel (Last 30 days) ⋮

[Click Here to Add New Quote](#)

● Draft 0 ● Published 0

● Accepted 0

- Click a link on the right to open the relevant list of quotes in Quote Manger.

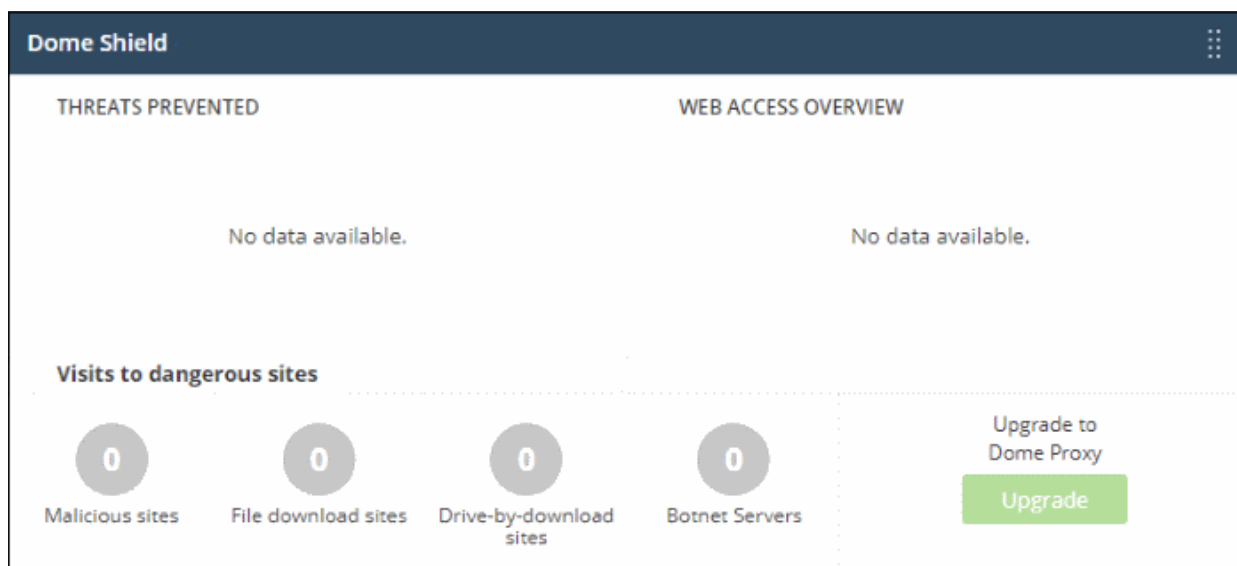

Endpoint Manager - Status Per Company (MSPs only)

- Summary of device status for each company you have added to C1. Includes:
 - number of devices online/offline (connected to Endpoint Manager)
 - number of devices with a profile installed
 - number of devices that require patches.

Status Per Company ⋮					
	ONLINE DEVICES EM	OFFLINE DEVICES EM	PROFILES EM	OPTIONAL PATCHES EM	CRITICAL PATCHES EM
kamal	0	5	5	2	1
victory	0	1	1	1	0
pradeep	1	6	7	3	1
ARR				0	0
Parthiban				0	0

Dome Shield

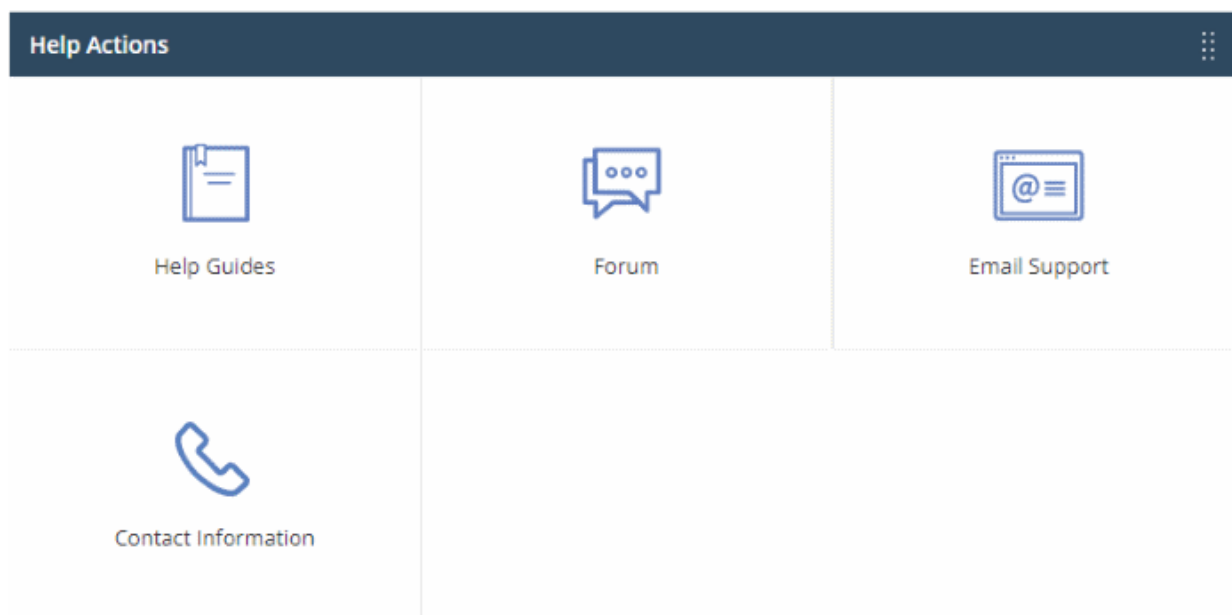

- Threats blocked and browsing patterns on devices in your network. This section is only populated if Comodo Dome Shield is active on your account.
- See the Dome guide at <https://help.comodo.com/topic-434-1-840-10755-Introduction-to-Comodo-Dome-Shield.html> for more about the product.

- Click any bar chart to open the relevant detail page in Dome Shield.
- The links below 'Visits to dangerous sites' take you to the reports page in Dome Shield widgets
- The 'Upgrade' button allows you to subscribe for other Dome products such as Dome Secure Web Gateway and Dome Data Protection.

Help Actions

In case of any issues or clarifications regarding the application, administrators can refer to help guides or write to support to resolve them.

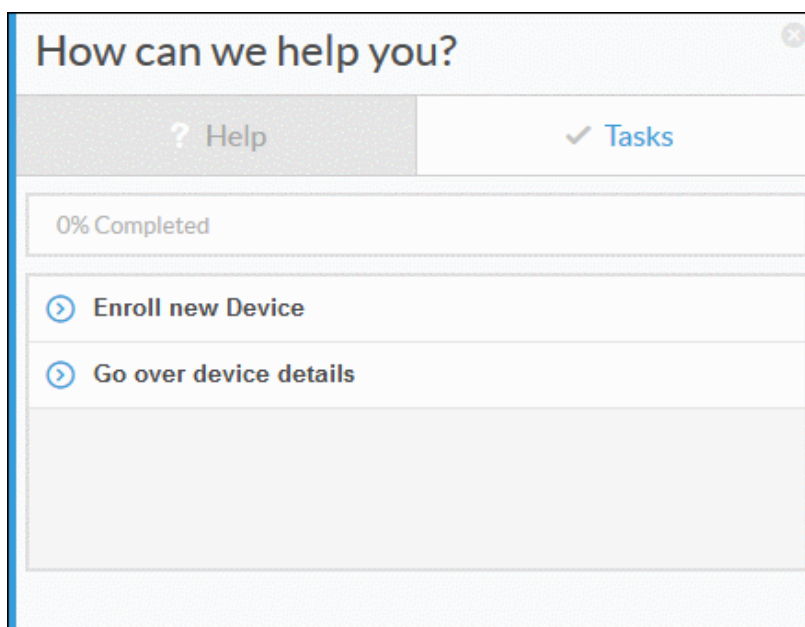

- **Help Guides** – View help guides for C1 modules such as Service Desk and Endpoint Manager.
- **Forum** - Opens the MSSP consortium forum page where you can ask questions or join in discussions.
- **Email Support** - Send email to our support staff for any issues.
- **Contact Us** - Details of support information.

The 'Need Help' menu

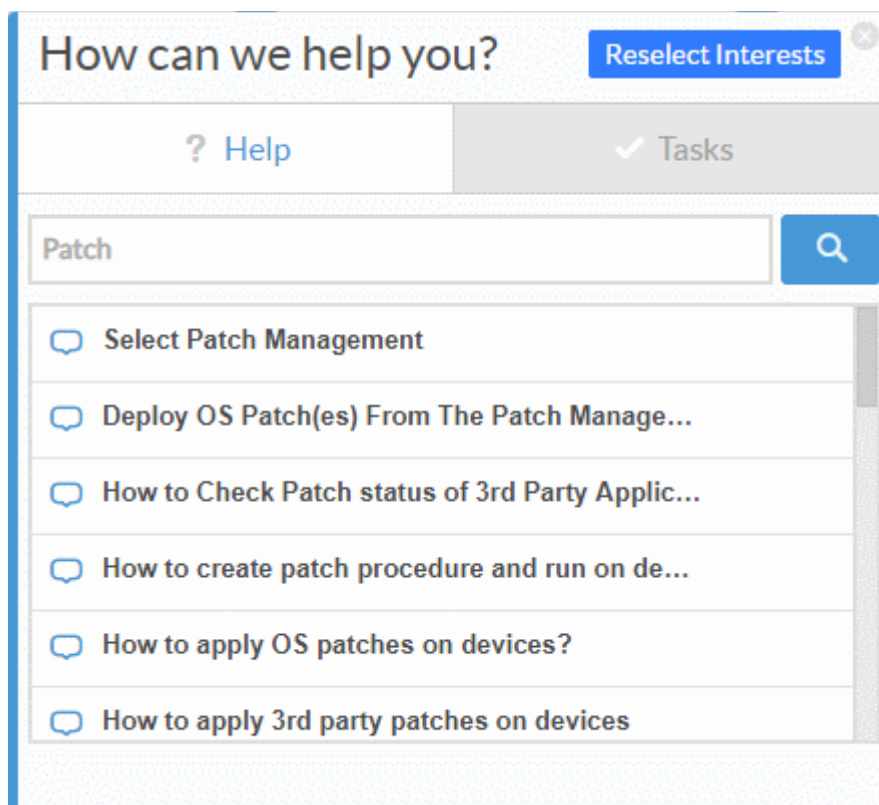

- Click the question mark at bottom-right to view interactive guides on key tasks in C1:

- Click icon to get started. The following menu opens:

- The lower half of the window shows interactive tutorials on specific tasks. For example 'Enroll new device' tells you how to add a device to Endpoint Manager.
- Click 'Search for more topics here' to look for help on a specific topic. This will open a list of corresponding C1 help articles:

- Click 'What else do you want to see?' if you would like to suggest we create interactive tour on a particular topic:

- Click 'Submit' to send the suggestion to C1.

5 Manage Admins, Staff and Roles

- Click 'Management' > 'Staff' to view, edit and add staff members
- Click 'Management' > 'Roles' to view, edit and add staff roles

C1 ships with three predefined roles - 'Account Admin', 'Admin' and 'Technician'. Each of these each has different access privileges. You can also create custom roles with different privileges and assign them to staff appropriately.

Click the following links for more details about adding staff and assigning roles to them:

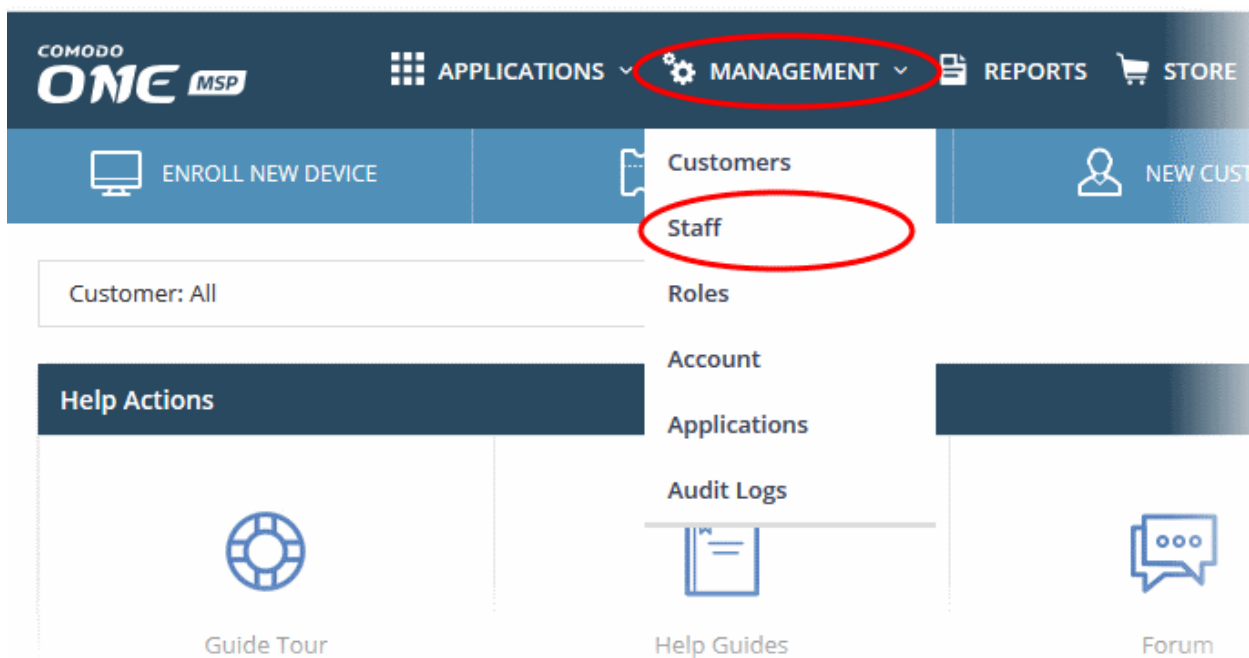

- [Manage Admins and Staff](#)
- [Manage Roles](#)
- [Admin Privilege Level](#)

5.1 Manage Admins and Staff

- Click 'Management' > 'Staff'

The 'Staff' screen lets you add staff members and assign them to roles. You can also transfer account admin privileges to another MSP/Enterprise administrator.

- Click 'Management' > 'Staff' in the top-navigation:

The 'Staff' interface will open:

Name	Email	Verified	Role	Two-Factor Authentication
kamal	kamal@yopmail.com	✓	Account Admin	
selena	selena@yopmail.com	✓	Admin	
richardson	richardson@yopmail.com	✓	Technician	
jacob	jacob@yopmail.com	✓	Technician	
Garry	garrykristen@yopmail.com	✓	Technician	

Staff List - Table of Column Descriptions

Column Header	Description
Name	The full name of the staff member.
Email	The email address of the staff member. Staff should use their email address to login to C1.
Verified	Whether the staff member has confirmed their email address. <ul style="list-style-type: none"> • Staff receive an account activation mail after you first create them • They must click the link in the mail then set their password to become 'Verified' • Staff can login to C1 only after verifying their email address.
Role	A 'role' determines the permissions that a staff member has within the C1 interface. <ul style="list-style-type: none"> • C1 has three built-in roles – 'Admin', 'Account Admin' and 'Technician'. Technician is a good starting role for staff. • You cannot edit the built in roles, but you can clone them and edit the clone. • The person that signed up for the account is assigned 'Account Admin'. This role has all available privileges. • Account admins can add staff and assign them any role except 'Account Admin'. See 'Manage Roles' for more on default roles and creating new roles.
Two-Factor Authentication	Whether or not additional login security is setup for the staff member. More details on this are in Set-up Two-Factor Login Authentication .

- You can navigate to different pages by clicking 'Next', 'Prev' or the page number at the bottom.

Sorting and Filtering Options:

- Click any column header to sort users in ascending or descending order according to the column label.
- Filter the list or search for specific staff member(s) by entering their name or email address in the search field at top right in part or full.

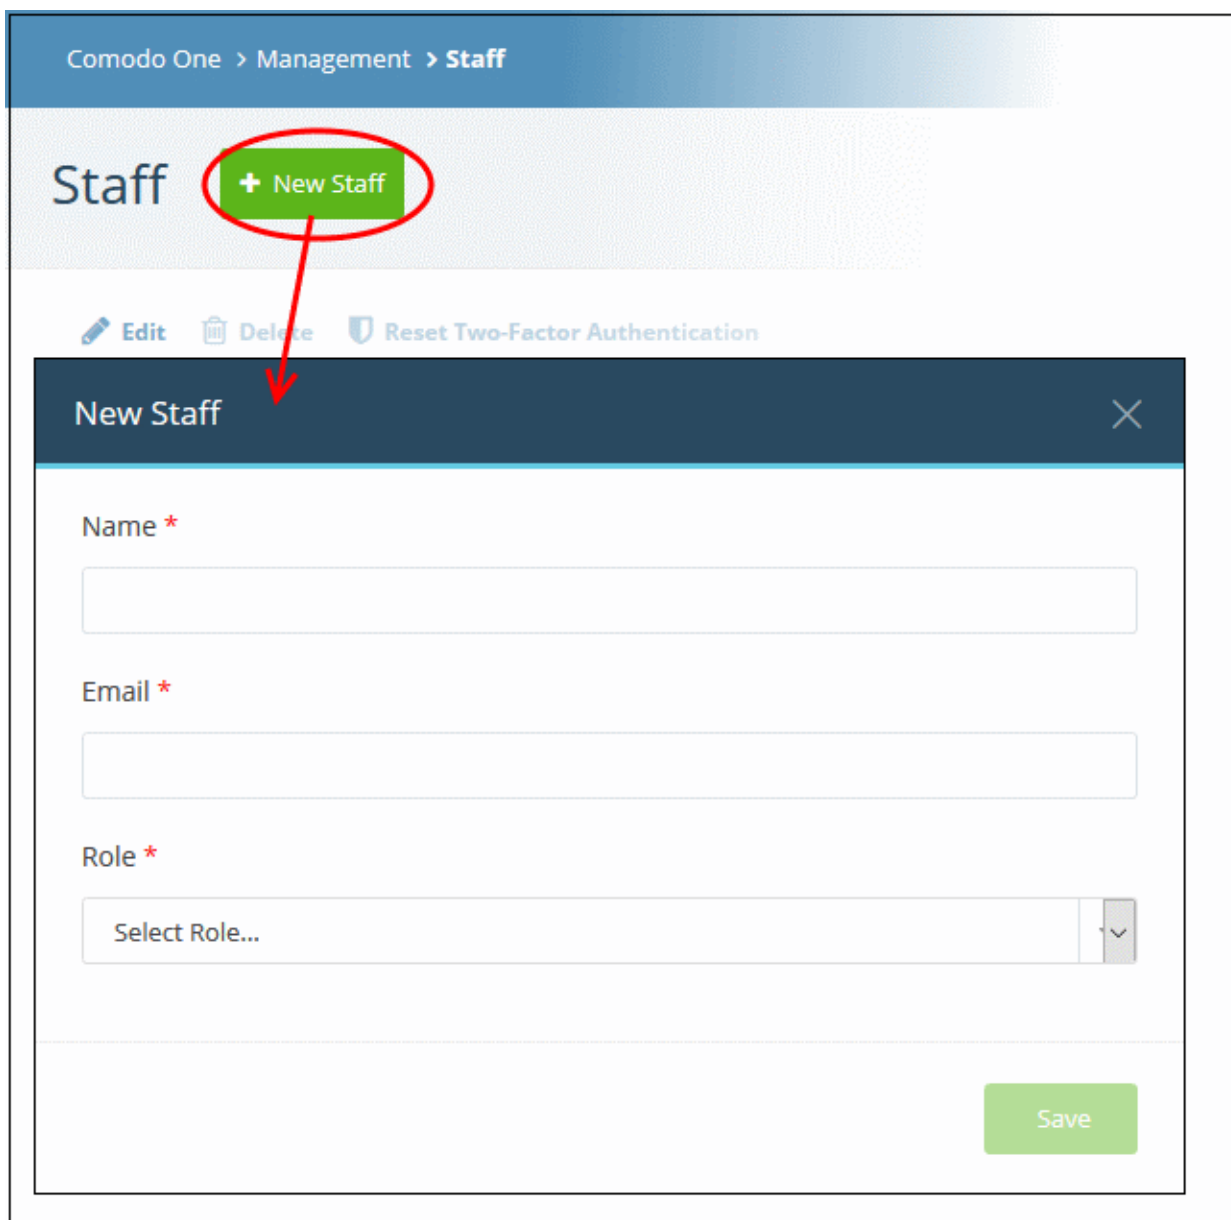

The interface allows you to:

- **Add staff members and assign roles**
- **Edit the details of a staff member**
- **Remove a staff member**
- **Reset Two Factor Authentication for a user**

To add a staff member and assign a role

- Click 'Management' > 'Staff' in the top-navigation
- Click the 'New Staff' button in the 'Staff' interface

The 'New Staff' form will be displayed:

The screenshot shows the 'Staff' management interface. At the top, there is a breadcrumb trail: 'Comodo One > Management > Staff'. Below this, the word 'Staff' is displayed in a large font. A green button with a white plus sign and the text '+ New Staff' is circled in red, with a red arrow pointing to the 'New Staff' form below. The form has a dark blue header with the text 'New Staff' and a close button (X). The form contains three required fields: 'Name *', 'Email *', and 'Role *'. The 'Name' and 'Email' fields are text inputs, and the 'Role' field is a dropdown menu with the text 'Select Role...'. A green 'Save' button is located at the bottom right of the form.

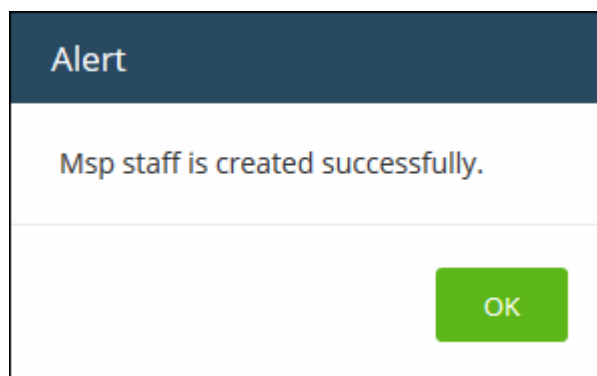

- **Name** - The full name of the new staff member
- **Email** - The email address of the staff member. This also acts as the staff member's username.
 - The account activation email is sent to this email address.
 - Staff must click the activation link in the mail then create a password

- The staff member can login to C1 after completing the steps above.
- Role – Select the privilege level for the staff member.
 - See '**Managing Roles**' for general help with roles.
 - See '**Admin Privilege Levels**' for a list of the permissions with each built-in role

Note: Staff with 'Admin' privileges can only be created by the account admin.

- Click the 'Save' button.

A confirmation message will appear. The content of the message varies according to the role and account type:

- Click 'OK'
- An account activation mail is sent to the new user. An example is shown below:

Hello,

Thank you for signing up to Comodo One. Please click on the link below to verify your email address and activate your account.

[Verify my email](#)

Thank you for joining The Comodo One Community!

The Comodo One Team

Please **do not reply to this email** as this email address is not monitored.

Comodo One Technical Support

Call: 973-396-1232 (24/7)

Email: c1-support@comodo.com

Forum: <https://c1forum.comodo.com>

- Staff should click 'Verify my email' then set a unique password to log into C1.
- After verification, the staff member can login to C1 with their email address and password.
- The new staff member is also added to Service Desk and Endpoint Manager at the same role level.
- Two factor authentication – If enabled, staff will also need to enter a code which is sent to their phone. See **Set up Two-Factor Login Authentication** for more details.
- Endpoint Manager also lets you add 'standalone' staff who can only access Endpoint Manager. Staff created in C1 can access endpoint manager, but staff created in endpoint manager cannot access C1.

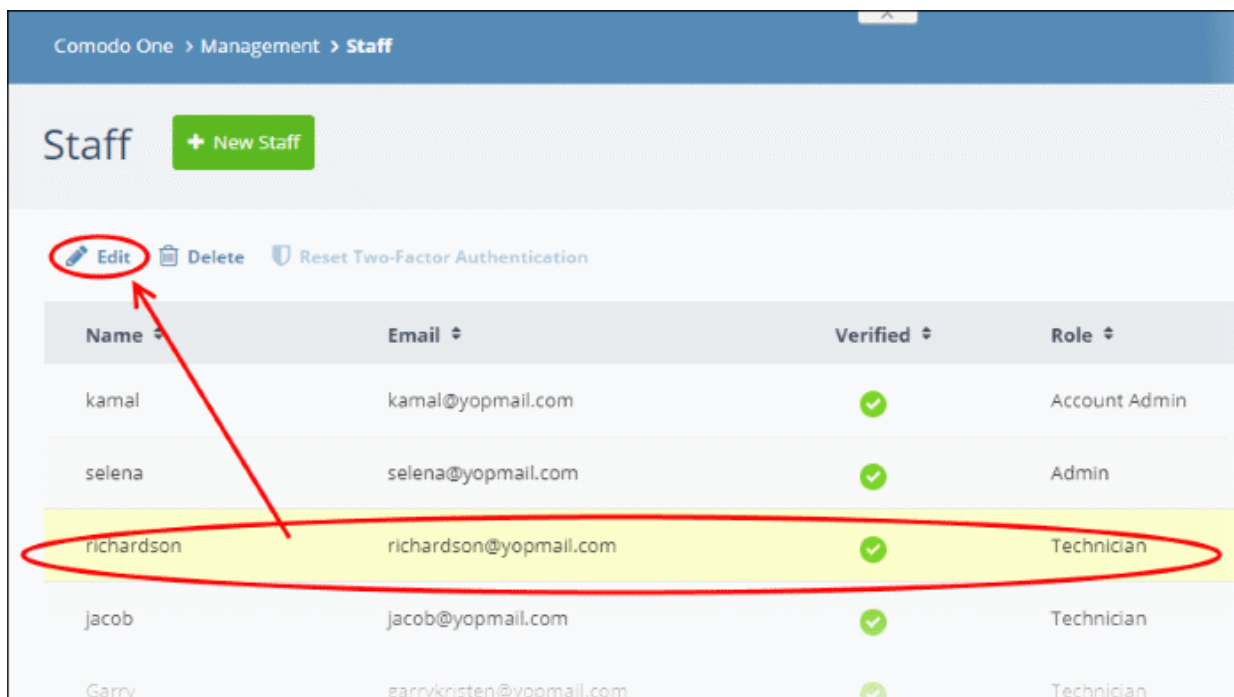

Edit staff details

A staff member with appropriate privileges can edit the names of other staff, assign different roles and transfer account admin rights to another administrator.

Note: Staff can be edited only after they have validated their email address by clicking the link in the verification email.

To edit the details of a staff member

- Click 'Management' > 'Staff'
- Select the staff member then click the 'Edit' button:

The 'Edit Staff' dialog will open.

Edit Staff [X]

Name *

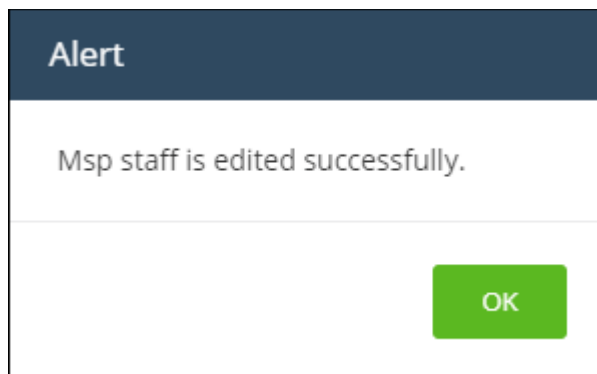

Email *

Role *

Save

- Update staff details as required and click 'Save'. Please note the email address field cannot be edited.

A confirmation dialog will appear:

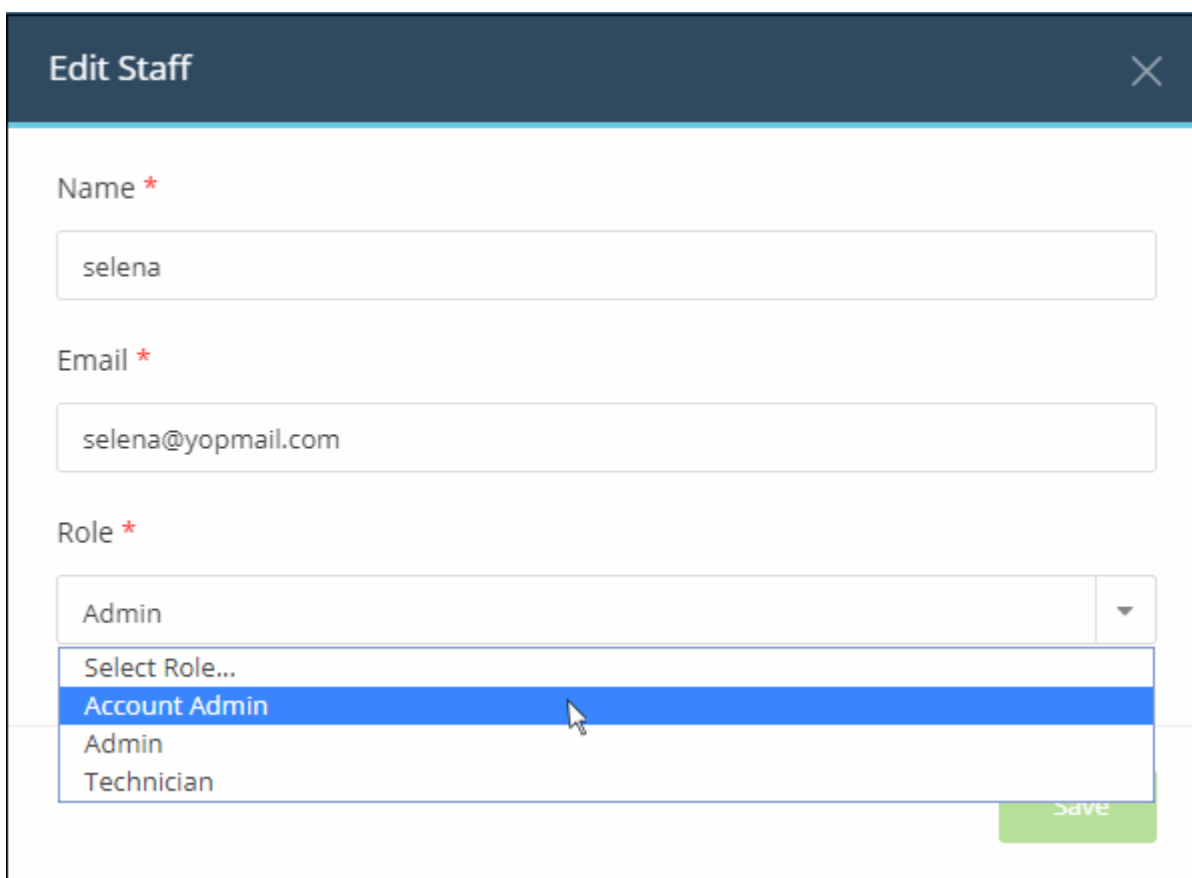

- Click 'OK'

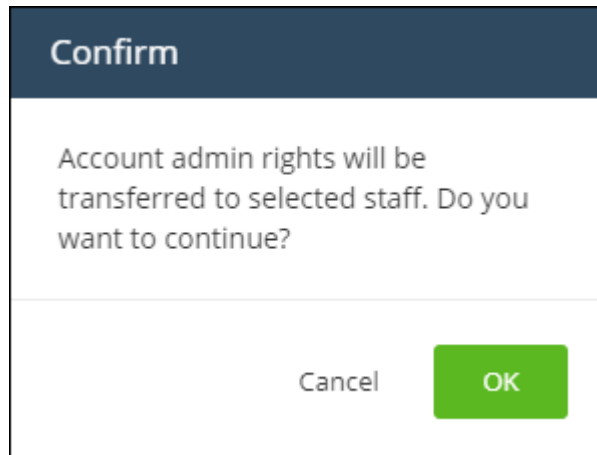

Transfer account admin rights to a different administrator

Note - only the current account admin can perform this task.

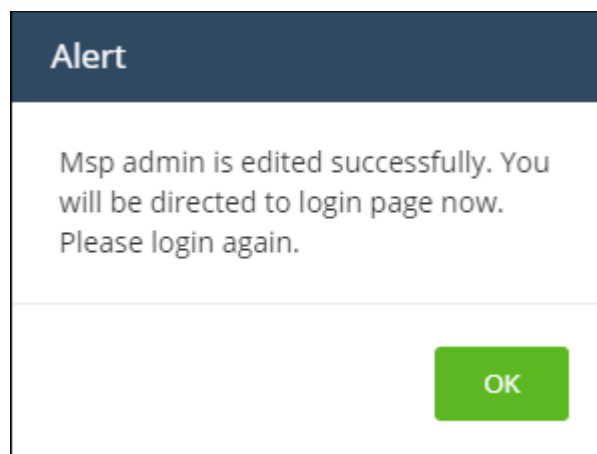

- Click 'Management' > 'Staff'
- Select the admin to whom you want to transfer rights and click the 'Edit' button
- Click the 'Role' drop-down and select 'Account Admin':

A screenshot of the "Edit Staff" form. The form has a dark blue header with the title "Edit Staff" and a close button (X). The form contains three input fields: "Name *" with the value "selena", "Email *" with the value "selena@yopmail.com", and "Role *" with a dropdown menu. The dropdown menu is open, showing a list of roles: "Select Role...", "Account Admin" (highlighted in blue), "Admin", and "Technician". A green "Save" button is located at the bottom right of the form.

- Click 'Save'
- Click 'OK' in the confirmation dialog:

- Account admin rights are transferred immediately. You will be logged out and redirected to the login page:

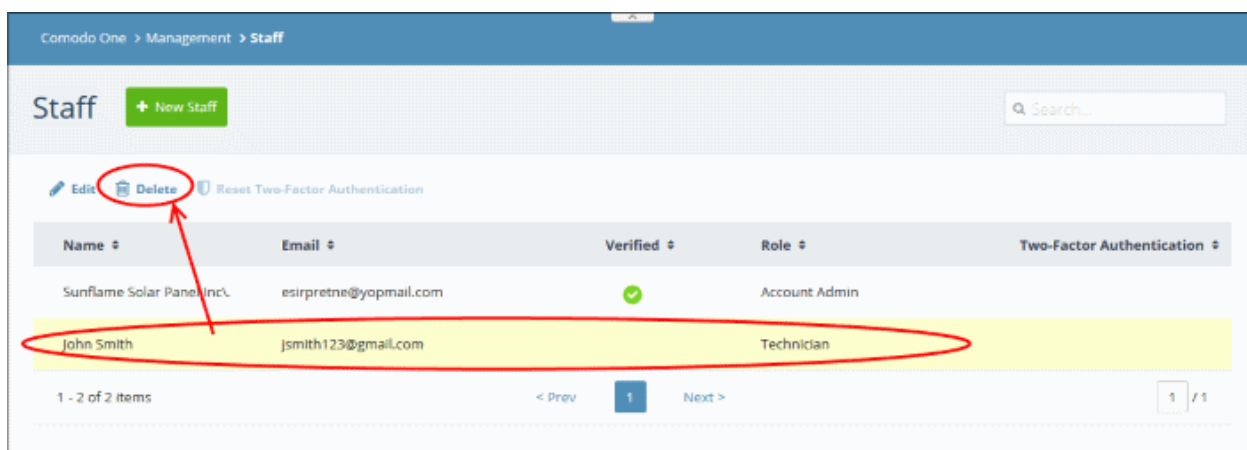

- Click 'OK'.
 - You can still login with the same credentials but will have only regular admin privileges.

Remove an administrator or staff member

Note - deleted staff will also be removed from Service Desk and Endpoint Manager, even if they have different roles in each.

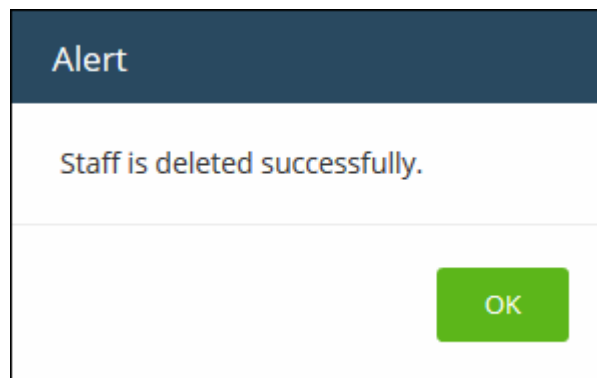

- Click 'Management' > 'Staff'
- Select the staff member that you want to remove
- Click the 'Delete' button:

A confirmation dialog will appear:

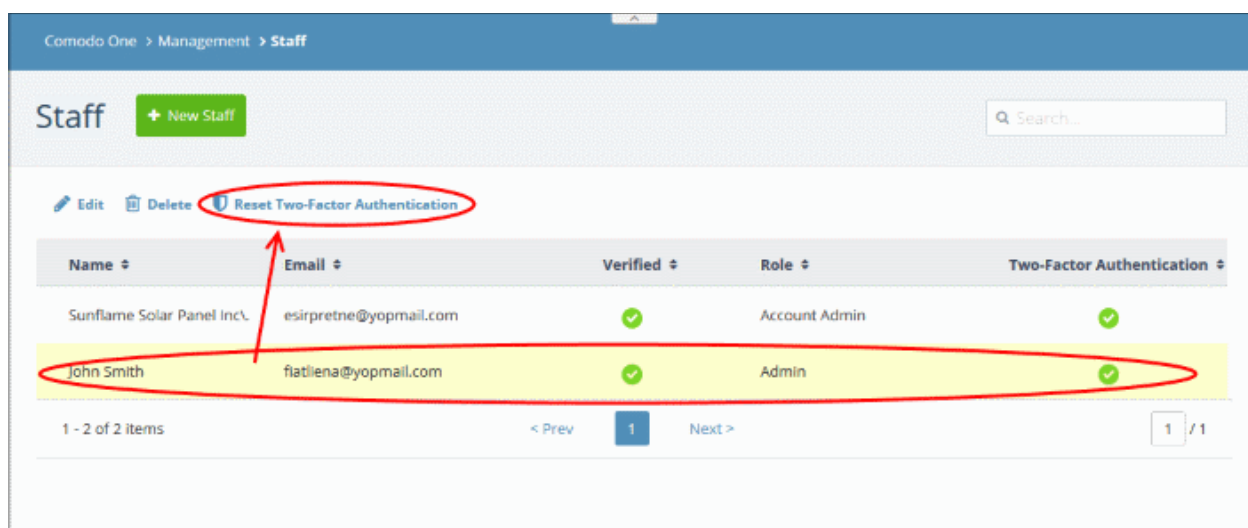

- Click 'Delete' to confirm removal
- Click OK in the confirmation dialog:

Reset Two Factor Authentication for a User

- Select the staff member then click the 'Reset Two-Factor Authentication' button:

After the reset, the user will need to complete the two-factor authentication process again in order to access their account. See [Setting up Two-Factor Login Authentication](#) to find out more about Two-Factor Authentication.

5.2 Manage Roles

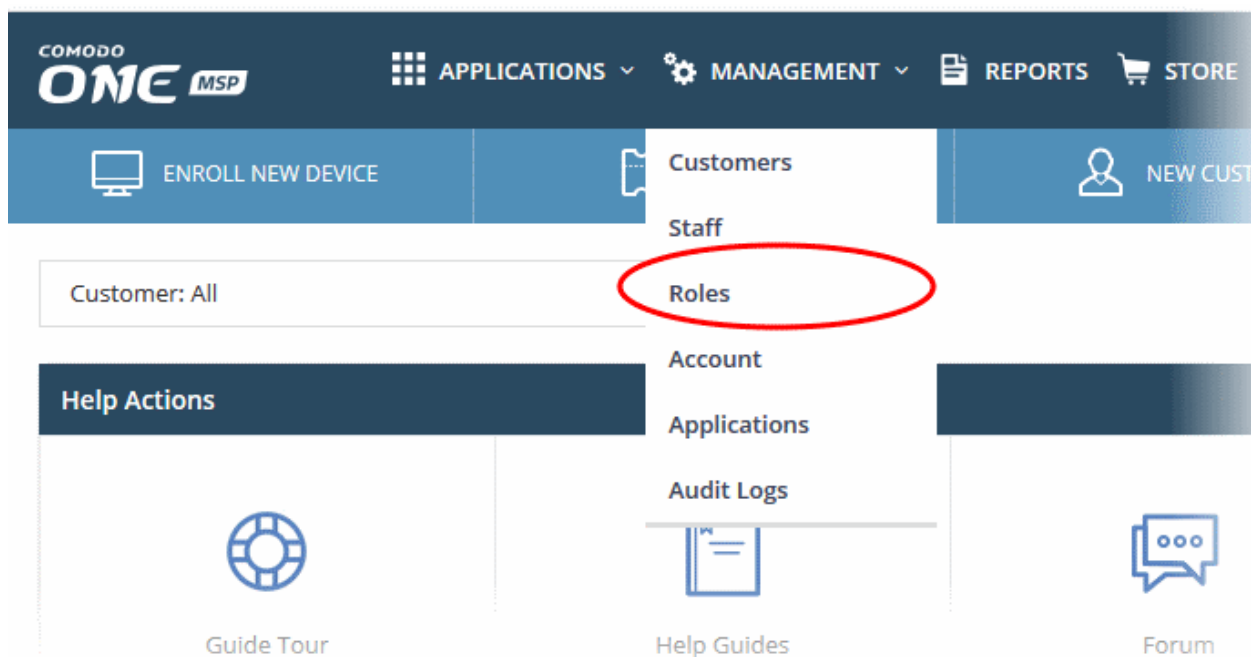

- Click 'Management' > 'Roles'.

Roles are assigned to staff members and determine their C1 access privileges.

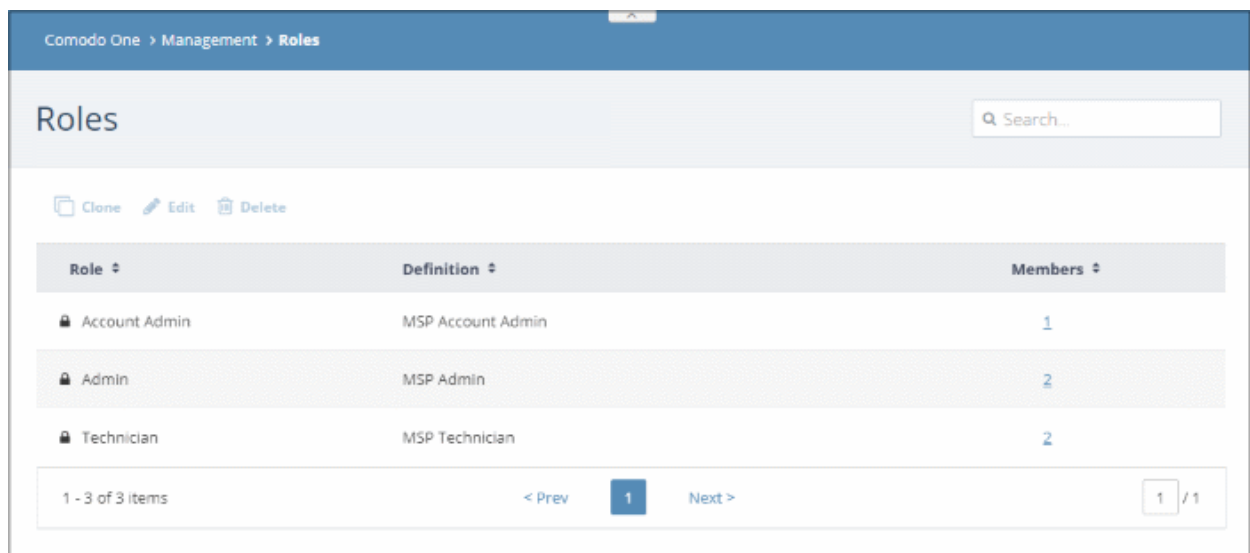

- C1 ships with three built-in roles that cannot be edited or deleted - 'Account Admin', 'Admin' and 'Technician'.
- You can create custom roles by cloning the 'Admin' or 'Technician' roles then modifying their privileges. You cannot clone the account admin role.
- All built-in and custom roles are available for selection when creating or editing staff (see the previous section, **Manage Admins and Staff**).

To manage roles in C1

- Click 'Management' > 'Roles'

The 'Roles' interface will open:

Role List - Table of Column Descriptions	
Column Header	Description
Role	The label of the role. A role is a set of permissions and privileges within C1.
Definition	A short description of the role. Built-in roles are prefixed with 'MSP' or 'Enterprise' depending on your account type.
Members	The number of staff assigned to that role. <ul style="list-style-type: none"> Click the number to see all staff with the role.

- You can navigate to different pages by clicking 'Next', 'Prev' or the page number at the bottom.

Sorting and Filtering Options:

- Click any column header to sort the list of roles in ascending or descending order according to the column label.
- Filter the list or search for specific role(s) by entering the name or definition in the search field at top right in part or full.

The interface allows account administrators and staff members with appropriate privileges to:

- Add custom roles**
- Edit a role**
- Remove a role**

Add a custom role

- You can add a custom role by cloning an existing role then modifying the privileges as required.
- You cannot clone the 'Account Admin' role.

To add a new role

- Click 'Management' > 'Roles'
- Select the role that you want to use as template and click 'Clone':

Comodo One > Management > Roles

Roles Search...

Clone Edit Delete

Role	Definition	Members
Account Admin	MSP Account Admin	1

- **Definition** - Enter a short description of your new role

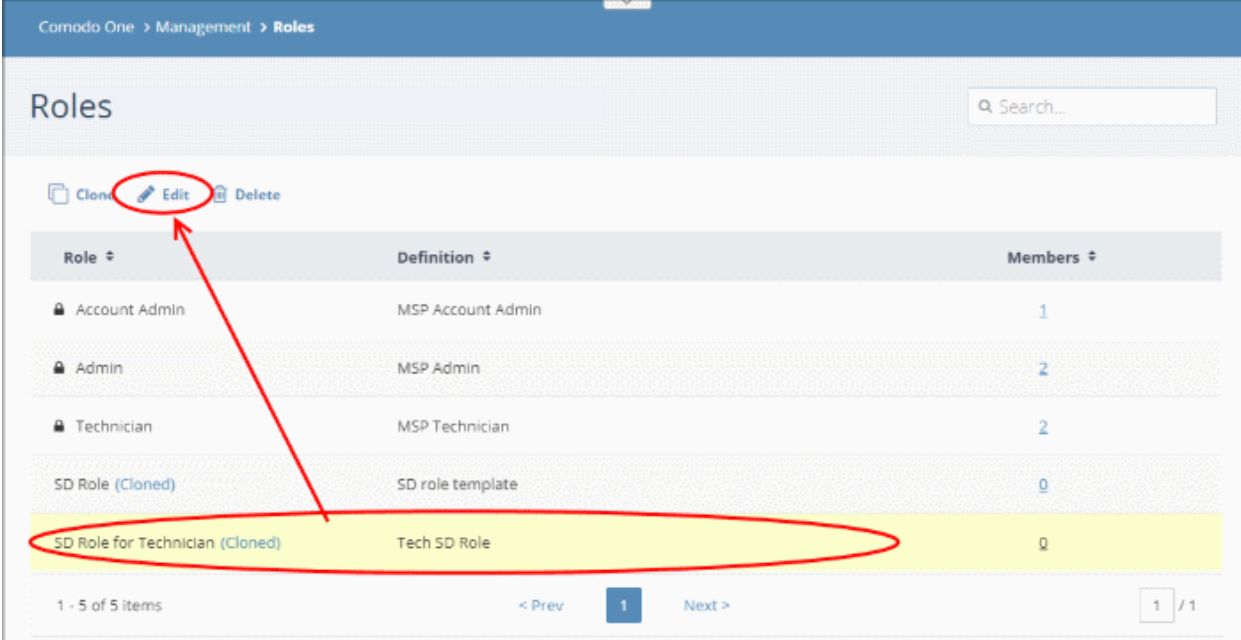

The following list explains the permissions you can assign to a role:

- **Dashboard** - View C1 dashboard and customize dashboard panes.
- **Licensed Applications** - Choose C1 modules that the role can access. Examples include Service Desk and Endpoint Manager.
- **Reports** - Access the 'Reports' menu. Create, view, schedule and delete reports.
- **Staff Management** - Access and manage staff and roles. Staff management rights let you create and edit staff members. 'Role' access lets you create and edit roles.
- **Tools** - View and download C1 tool sets.
- **Customer** - View and manage existing customers and add new customers. Applies to MSP accounts only.
- **Notifications** - View the latest news about Comodo One products via in-app notifications.
- **Management** - View account details and update support details. Access the applications menu to view current subscriptions, add new subscriptions, view details of application usage and billing.
- **Partner Actions** - Allow role members to become a C1 resellers. Resellers get C1 products at discounted prices.
- Click 'Save' at the top, or 'Save Changes' at the bottom to create your role.

To edit a custom role

Note: You cannot edit built-in roles C1.

- Click 'Management' > 'Roles'
- Select the role that you want to update and click 'Edit':

Comodo One > Management > Roles

Roles

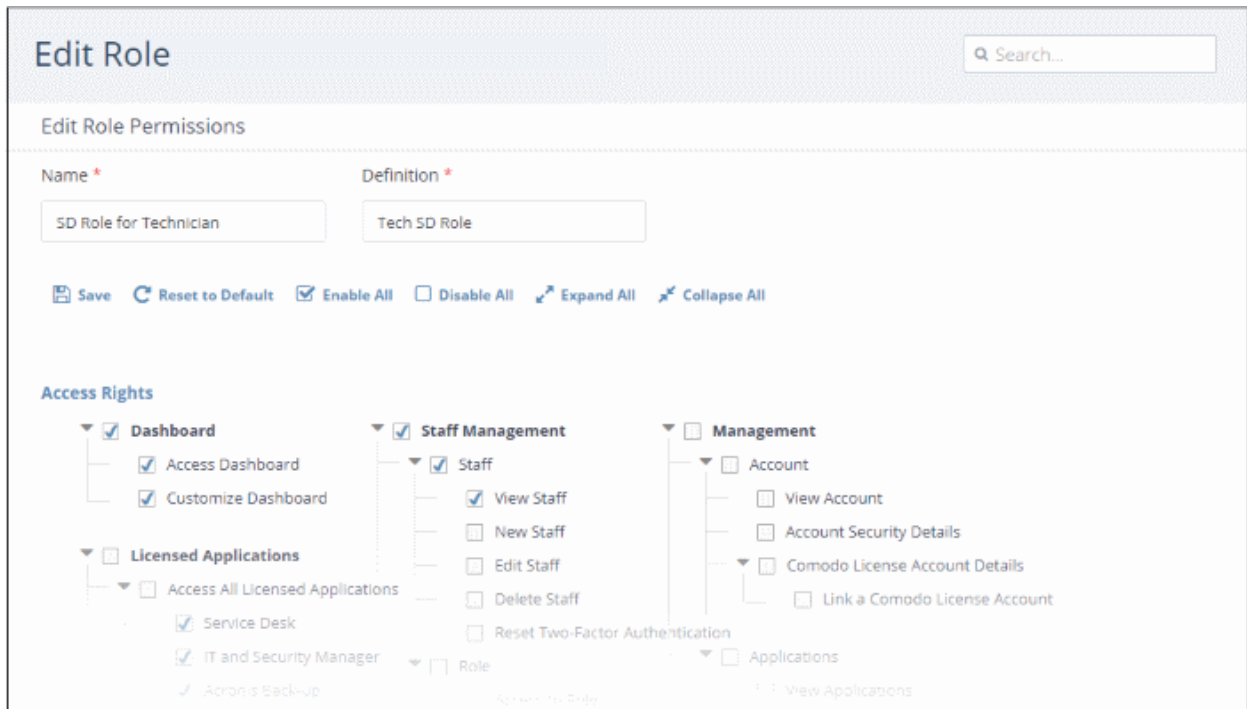

Search...

Clone Edit Delete

Role	Definition	Members
Account Admin	MSP Account Admin	1
Admin	MSP Admin	2
Technician	MSP Technician	2
SD Role (Cloned)	SD role template	0
SD Role for Technician (Cloned)	Tech SD Role	0

1 - 5 of 5 items < Prev 1 Next > 1 / 1

The 'Edit Role' screen will open:

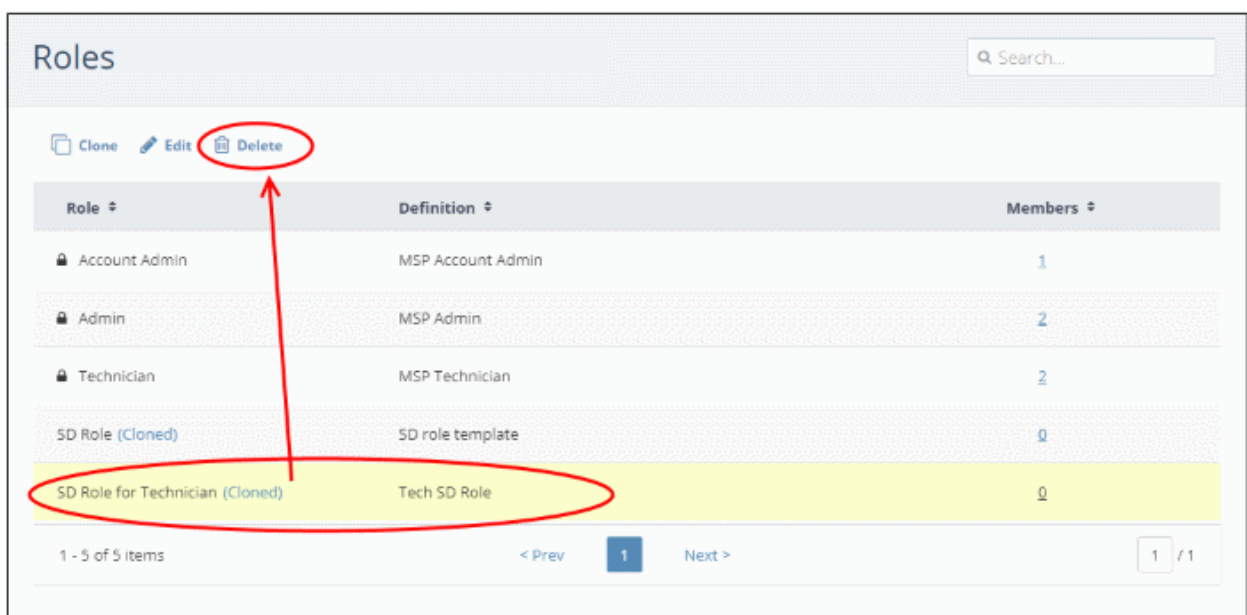

- Update name, description details and access rights for the role.
- Click 'Save' or 'Save Changes' when done.
- The changes in the privileges to the staff members assigned with the role will take effect from their next login.

To delete a custom role

Note: You cannot delete C1 built-in roles and custom roles that are assigned to staff members. To remove a custom role, make sure no staff members are assigned that role.

- Click 'Management' > 'Roles'
- Select the role that you want to remove and click 'Delete':

- Click 'Delete' in the confirmation dialog

5.3 Admin Privilege Levels

- There are three built in roles in C1 - 'Account admin', 'Admin' and 'Technician'.
- These roles are also available in the C1 modules, 'Service Desk' and 'Endpoint Manager'.
- The following tables show the privileges of each role in the C1 console and the individual modules.

Comodo One Console

Role	Description
Account Admin	<p>Can access all areas of the C1 console and all modules (Endpoint Manager, etc). Account admins can:</p> <ul style="list-style-type: none"> • Add and manage companies for the account • Add and manage admins • Add and manage staff who have the technician role • Transfer account admin rights to another admin • Access all licensed modules • Add applications from the 'App Store' • View and download tool sets • Subscribe for new products and renew licenses for C1 modules • Generate reports • Schedule reports • Manage account settings and licenses • View module usage details • View module billing details
Admin (MSP/ Enterprise)	<p>MSP / Enterprise admins have the following privileges:</p> <ul style="list-style-type: none"> • Add and manage companies for the account • Add and manage admins • Add and manage staff who have the technician role • View roles

	<ul style="list-style-type: none"> • View and download tool sets • Access all licensed modules • Generate reports • Schedule report generation
Technician (MSP/Enterprise)	<p>MSP / Enterprise staff with the technician role have the following privileges:</p> <ul style="list-style-type: none"> • Access all licensed applications • View, add and edit customers • Generate reports • Schedule report generation • View and download tool sets • View staff members

Service Desk

Role	Privileges
Account Admin	<ul style="list-style-type: none"> • Access both admin panel and staff panel • Open tickets on behalf of users • Edit tickets • Post a ticket reply • Close tickets • Assign tickets to staff members • Transfer tickets between departments • Delete tickets • Add/remove emails from the banned list via the ticket interface • Create and manage canned responses and attachments • Create and manage knowledgebase categories and FAQs • View details of other staff members in allowed departments
Admin (MSP/Enterprise)	<ul style="list-style-type: none"> • Same privileges as account admin except view stats of other staff members in allowed departments
Technician (MSP/Enterprise)	<p>MSP / Enterprise staff members with technician role have the following privileges:</p> <ul style="list-style-type: none"> • Access the staff panel but not the admin panel • Open tickets on behalf of users • Edit tickets • Post a ticket reply • Close tickets • Assign tickets to staff members • Transfer tickets between departments • Delete tickets

Endpoint Manager

Role	Privileges
Account Admin	<ul style="list-style-type: none"> • Manage devices (full control) • Manage users (full control) • Manage profiles (full control) • Manage procedures • Manage LDAP account • Manage Google API token • Manage antivirus settings • Manage Apple Push Notification service certificate • Manage Android settings • Manage custom variables • Manage application repository • Manage EAS token • Manage email templates • Manage Procedures • Approve Procedures • Access to RBAC (full control) • Access to compliance page • Access to push statistic page • Access to threat report page • MS Exchange access management • Access right to antivirus (full control) • Access to application on devices part (full control) • Access to subscription section • Access to dashboard part of the system • Send reports switcher • Allow end user role to login to portal. Send user creation email and reset password email when required.
Admin (MSP/Enterprise)	Same privileges as account admin.
Technician (MSP/Enterprise)	Same privileges as account admin.

6 Manage Companies

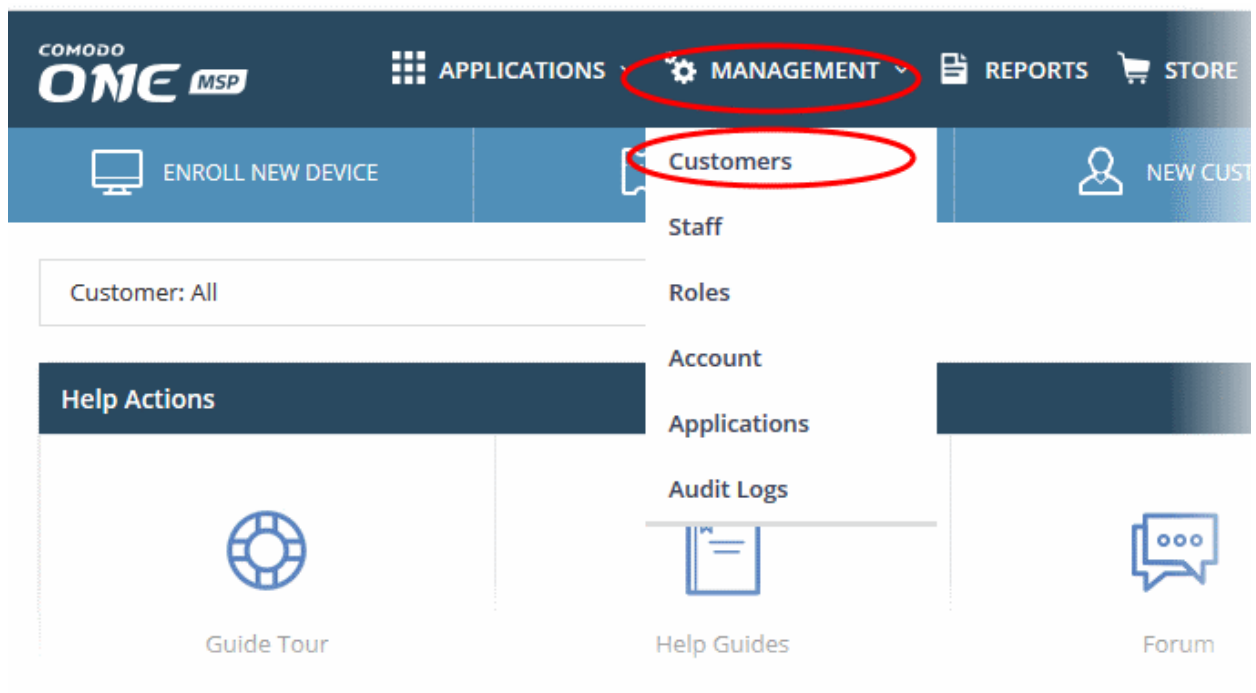

- Click 'Management' > 'Customers'

Note: Only C1 MSP accounts can add new companies.

- Customers created in C1 will be available for selection in all integrated modules:
 - They are available as 'Organizations' in Service Desk
 - They are available as 'Organizations' in CRM
 - They are available as 'Companies' in Endpoint Manager
 - They are available as 'Companies' in Dome Shield
- You can import users and devices to these entities through the individual modules.
 - Service Desk also lets you create 'standalone' (unmanaged) companies. Standalone companies are not visible in C1 or other modules. See <https://help.comodo.com/topic-289-1-625-7888-Managing-Organizations.html> if you need more help with this.

To manage customer organizations/companies

- Click 'Management' > 'Customers'

The interface shows all customer organizations added to Comodo One:

Comodo One > Management > Customers

7 Access C1 Modules

- A module is an enterprise application which is integrated with C1. Examples include 'Endpoint Manager', 'Service Desk' and 'CRM'.
- Each C1 module answers a specific security, productivity or management need. Together, they form a suite of tools which will streamline your workflows, increase your productivity and improve the service you provide to customers.
- Click 'Applications' in the top-menu to access all available modules.

Note: The modules available depend on whether you have an MSP or enterprise account. See the **Appendix** for a list of products available in MSP and enterprise accounts.

C1 core modules:

- **Service Desk** - Fully fledged ticketing system which lets you offer dynamic support services to internal and external clients. Respond to support tickets, generate reports, create knowledge base articles and more.
- **Endpoint Manager** - Manage, monitor and secure mobile and fixed devices which connect to customer networks. Also includes patch management and remote control functionality.
- **Dome Shield** - Advanced web filtering solution which provides comprehensive, DNS-based security for networks. .

Account admins can add the following modules from the 'Store' interface:

- **Quote Manager** – Powerful solution that lets you quickly construct, send and manage customer quotes.
- **Acronis Cloud Backup** – Online backup and disaster recovery. Powered by one of the leading names in business continuity, Acronis backs up any data from any source, and restores it with ease to any destination.
- **cWatch** - Cloud based security intelligence and event management product (SIEM).
- **Comodo Dome Antispam** – Spam and threat prevention solution that uses an array of advanced technologies to prevent junk mail from entering your network. Available only to 'C1 - Enterprise' customers.
- **Comodo Dome Antispam - MSP** - Antispam and threat prevention solution that monitors email traffic on your customers' networks. Available only to 'C1 - MSP' customers.
- **Comodo Dome Secure Web Gateway** - Real time web traffic scanning solution that provides comprehensive web content and security control to your customers. Includes URL filtering, malware protection, Valkyrie real-time file verdicting and portable containment.
- **Customer Relationship Management (CRM)** - Sales automation platform. Create fluid workflows to create, nurture and close customer leads.
- **Comodo Dome Data Protection** - Data loss prevention solution. Enforce policies to control data in use, in motion, and at rest. Available only to 'C1 - Enterprise' customers.
- **Comodo Dome Firewall Virtual Appliance** - Control firewall policy, antivirus, intrusion prevention, website filtering, traffic monitoring, VPN and proxy servers.
- **Comodo Dome Firewall Central Manager** - A central console for remote management of multiple Comodo Firewall Virtual appliances. MSP/Enterprise admins can remotely monitor and manage firewall appliances on remote networks.
- **cWatch EDR** - Endpoint Detection and Response. Unrivaled visibility into the activities of Windows endpoints on your network. View security related incidents in a detailed timeline and receive instant alerts if an attack occurs.

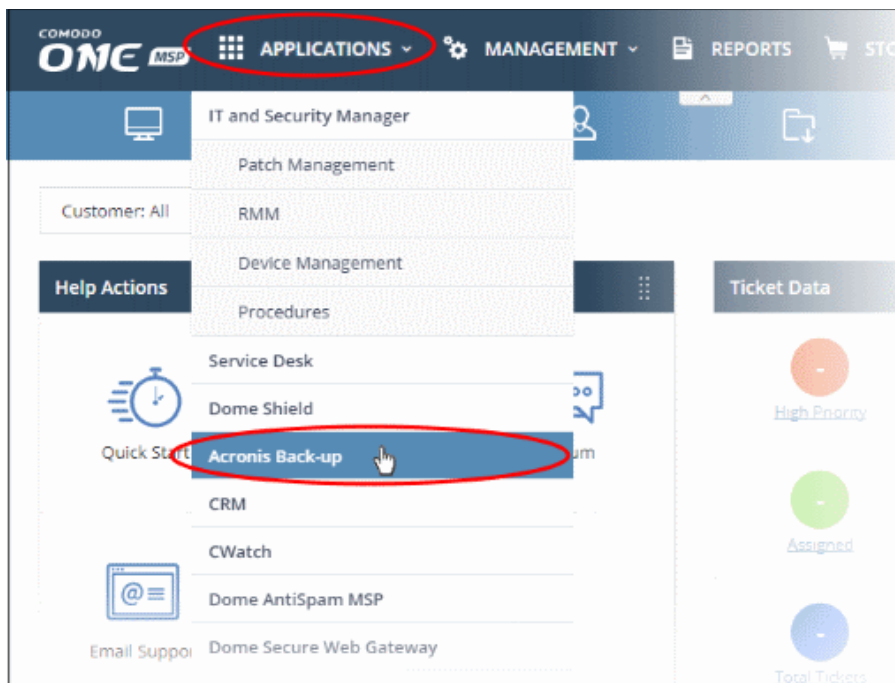

See **App Store** for more details about how to add these applications to Comodo One.

Note: Additional modules may require separate subscriptions. Licenses can be obtained from within the C1

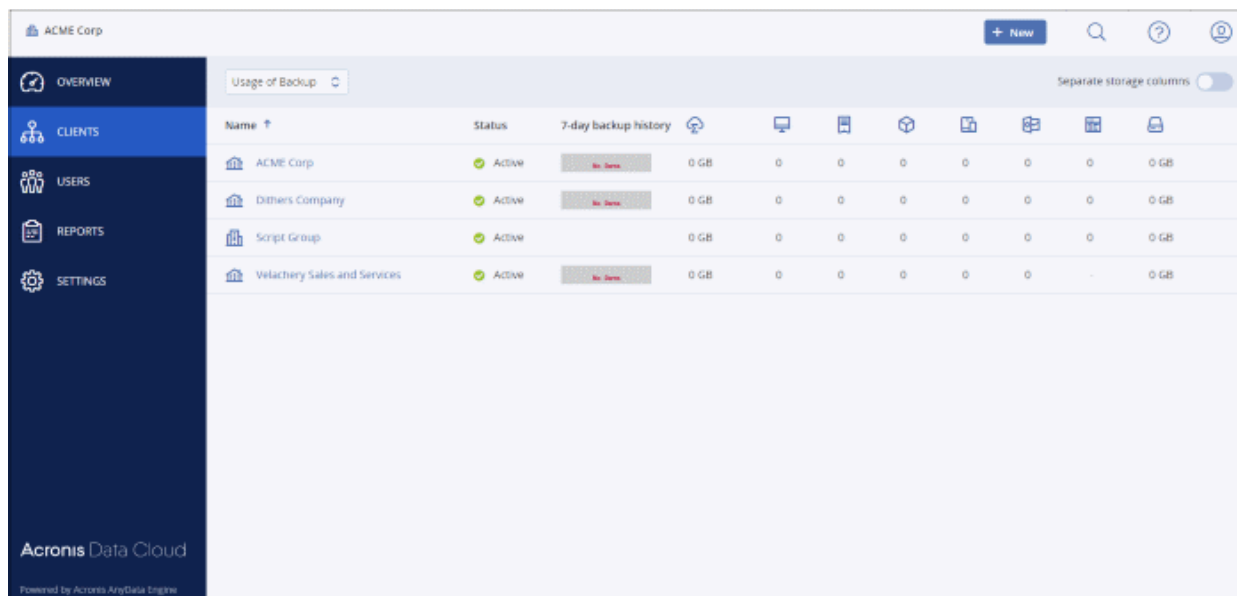

console.

To open an integrated module from the C1 console

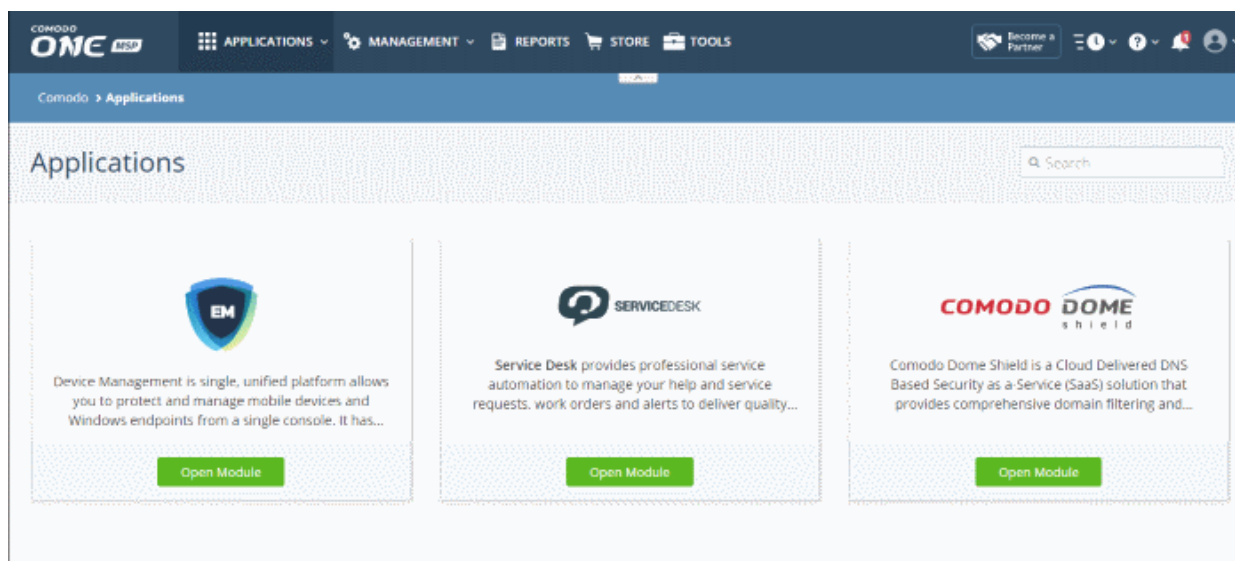

- Click 'Applications' on the menu bar and select an application from the list:

The selected module will open:

- Alternatively, click 'Applications' > 'All Applications' to open a screen which lists all modules:

- Click 'Open Module' to access a specific app.

8 App Store

- Click 'Store' on the menu bar to open the app store
- The app store contains a range of additional security and productivity solutions. These tools expand the core functionality of C1 and let you build a custom platform tailored to your needs
- 'Integrated' apps are those which you can access from the C1 console after installation.

Note: The products available in the store differ between MSP and Enterprise accounts. See **Appendix** for more details.

The following applications are available in the store:

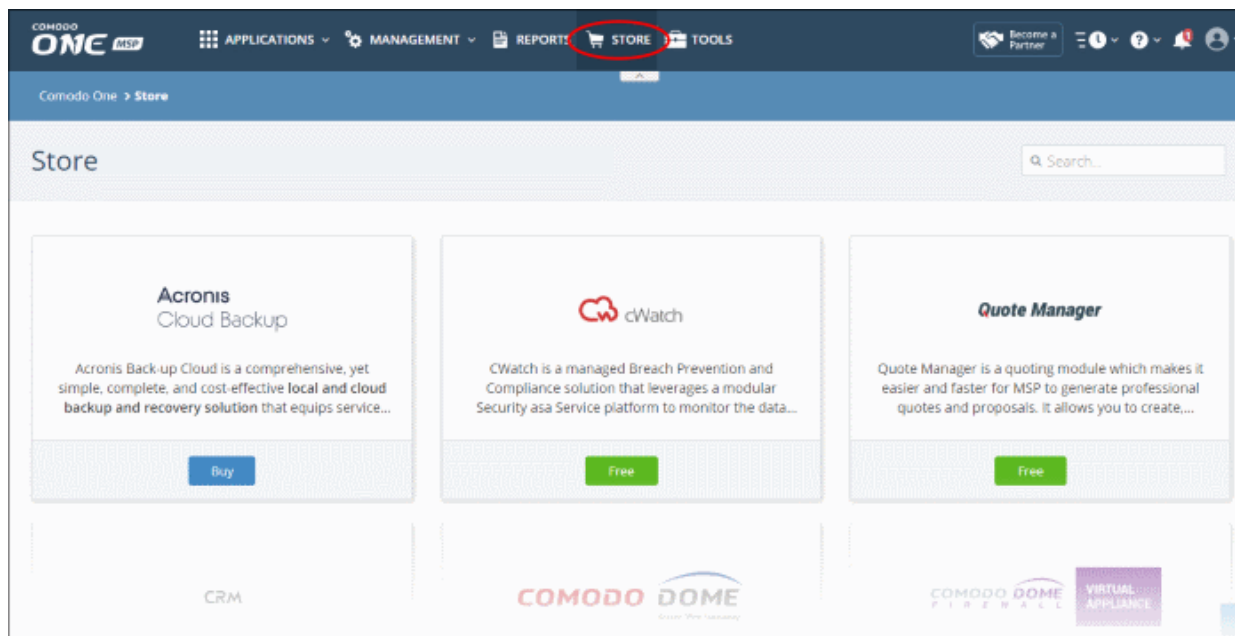

- Acronis Cloud Backup (integrated)
- Quote Manager (integrated)
- cWatch (integrated)
- Comodo Dome Secure Web Gateway (integrated)
- Customer Relationship Management (CRM) (integrated)
- Comodo Dome Firewall Virtual Appliance (integrated)
- Comodo Dome Data Protection (integrated) (Available only for Enterprise customers)
- Comodo Dome Antispam (integrated) (Available only for Enterprise customers)
- Comodo Dome Antispam - MSP (integrated) (Available only for MSP customers)
- Comodo Dome Firewall Central Manager (integrated)
- cWatch EDR (integrated)
- Endpoint Manager (Only for customers that signed to Comodo One prior to version 3.0)

'Integrated' applications can be accessed from the C1 console, through the 'Applications' interface.

To open the 'Store' interface

- Click 'Store' on the menu bar

This will open a list of all available applications:

The 'Store' interface features the following apps:

- **Acronis Cloud Backup** - Online backup and disaster recovery. Powered by one of the leading names in business continuity, Acronis backs up any data from any source, and restores it with ease to any destination. See '[Add Acronis Backup](#)'.
- **Quote Manager** - Powerful solution that lets you quickly construct, send and manage customer quotes. See '[Add Quote Manager](#)'.
- **Comodo cWatch** - Cloud based security intelligence and event management product (SIEM). See '[Add cWatch](#)'.
- **Comodo Dome Secure Web Gateway** - Real time web traffic scanning solution that provides web content security to your customers. See '[Add Comodo Secure Web Gateway](#)' for more details.
- **Customer Relationship Management (CRM)** - Sales automation solution. Save time and grow profits by creating workflows to generate, nurture and close customer leads. See '[Add Customer Relationship Management](#)' for more details.
- **Comodo Dome Firewall Virtual Appliance** (available for Enterprises and MSP) - Control firewall policy, antivirus, intrusion prevention, website filtering, traffic monitoring, VPN and proxy servers. See '[Add Comodo Dome Firewall Virtual Appliance](#)' for more details.
- **Comodo Dome Data Protection** (available for Enterprises only) - Data loss prevention solution. Enforce policies to control data in use, in motion, and at rest. See '[Add Dome Data Protection](#)' for more details.
- **Comodo Dome Antispam** - Spam and threat prevention solution that uses an array of advanced technologies to prevent junk mail from entering your network. Available only to 'C1 - Enterprise' customers. See '[Add Comodo Dome Antispam](#)' for more details.
- **Comodo Dome Antispam - MSP** (available for MSP customers only) - Antispam and threat prevention solution that monitors email traffic on your customers' networks. See '[Add Comodo Dome Antispam - MSP](#)' for more details.
- **Dome Firewall Central Manager** (available for Enterprises and MSP) - Firewall Central Manager lets you manage several Dome Firewall virtual appliances on customer networks from a single console. See '[Add Comodo Dome Firewall Central Manager](#)'.

- **cWatch EDR** - Endpoint Detection and Response. Unrivaled visibility into the activities of Windows endpoints on your network. View security related incidents in a detailed timeline and receive instant alerts if an attack occurs. See [Add cWatch EDR](#).
- **Endpoint Manager**- Manage and secure all endpoints and mobile devices that connect to your customers' networks with a single management application. Endpoint Manager is offered as a core component with Comodo One for customers that signed up to Comodo One version 3.0 or later. Customers that signed up to Comodo One prior to version 3.0 can integrate Endpoint Manager to Comodo One from the 'App Store' interface. See [Adding / Upgrading IT and Security Manager](#) for more details.

8.1 Add Acronis Backup

Acronis solves business data protection challenges with an easy-to-manage service that backs up data from any source and recovers to any destination or system. Acronis Backup data centers are situated in three different locations (US, UK and Germany), allowing you to choose the data center closest to you.

- Click 'Store' > scroll to the Acronis tile > Click 'Buy'
 - Alternatively, you can link this C1 account to another Comodo account that already has an Acronis license. Use of the service will be shared by both accounts. Quotas and validity are bound to the original license limits.

Please read the following sections to learn more:

- [Purchase a new license](#)
- [Activate the license](#)

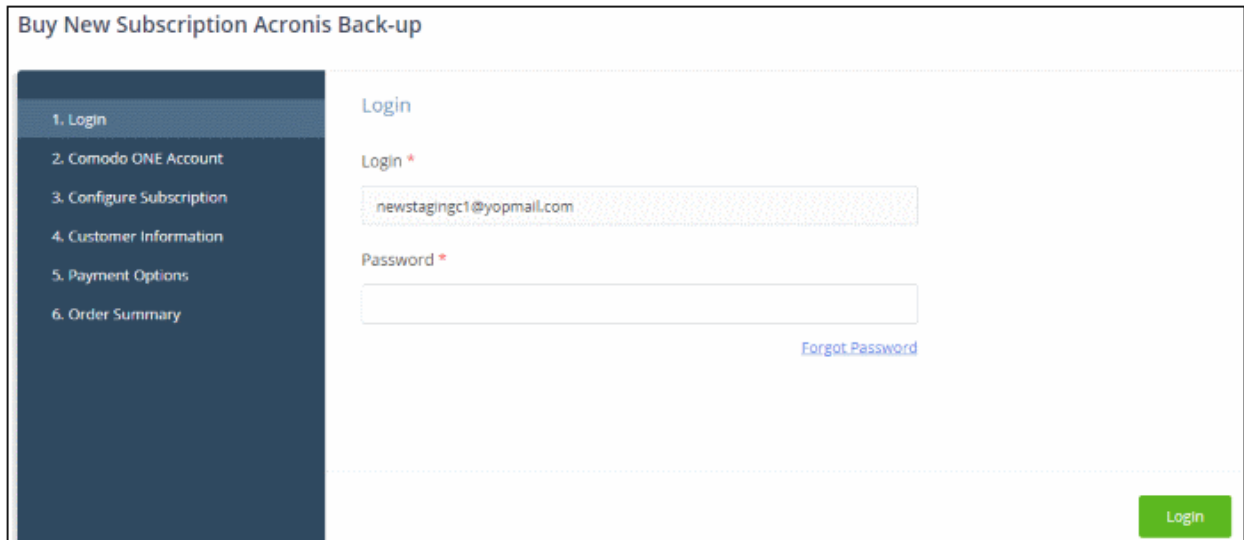

Purchase a new license

New licenses for Acronis Cloud Backup can be purchased and activated from the 'Store' interface:

- Click 'Store' on the menu bar
- Click 'Buy' in the 'Acronis Cloud Backup' tile:

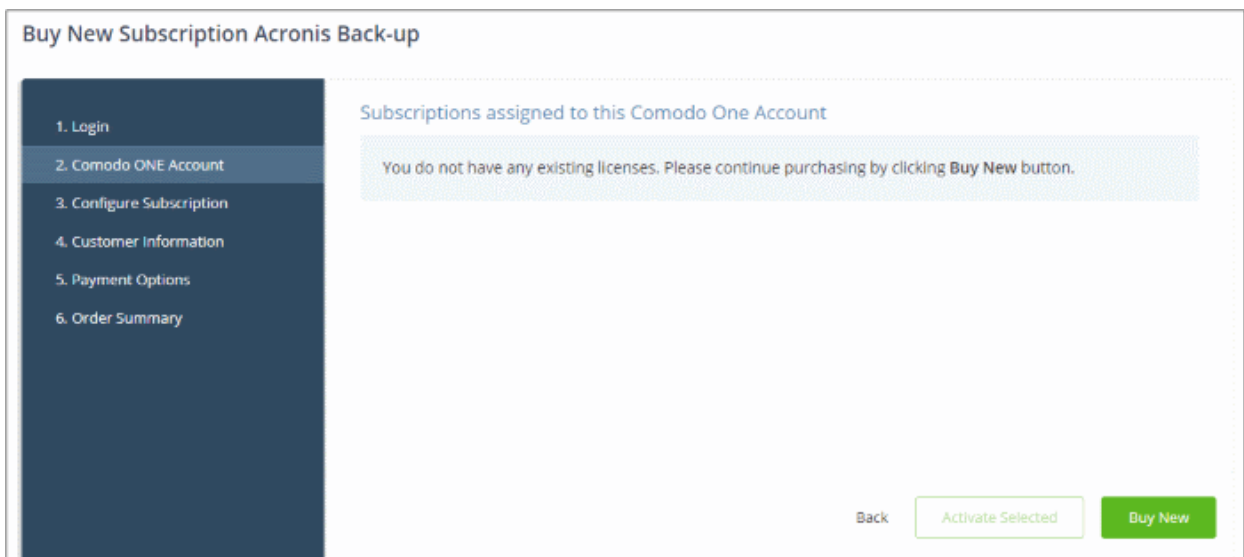

- This will open the product purchase page:

The screenshot shows a web interface titled "Buy New Subscription Acronis Back-up". On the left is a dark blue sidebar with a list of steps: 1. Login (highlighted), 2. Comodo ONE Account, 3. Configure Subscription, 4. Customer Information, 5. Payment Options, and 6. Order Summary. The main content area is titled "Login" and contains a "Login *" label, a text input field with the email "newstagingc1@yopmail.com", a "Password *" label, and an empty password input field. A "Forgot Password" link is located below the password field. A green "Login" button is positioned at the bottom right of the form area.

Your login username will be pre-populated and cannot be changed.

- Enter your Comodo One account password in the 'Password' field and click 'Login'

The screenshot shows the same web interface as above, but the sidebar now highlights step 2, "Comodo ONE Account". The main content area is titled "Subscriptions assigned to this Comodo One Account" and contains a light blue message box that reads: "You do not have any existing licenses. Please continue purchasing by clicking Buy New button." At the bottom right, there are three buttons: "Back", "Activate Selected", and "Buy New".

- Click 'Buy New'

The next step is to select your subscription options:

Buy New Subscription Acronis Back-up

- 1. Login
- 2. Comodo ONE Account

For more details about how to use Acronis Cloud Backup, see the online admin guide at http://www.acronis.com/en-us/support/documentation/Acronis_Backup_Cloud/index.html

8.2 Add Quote Manager

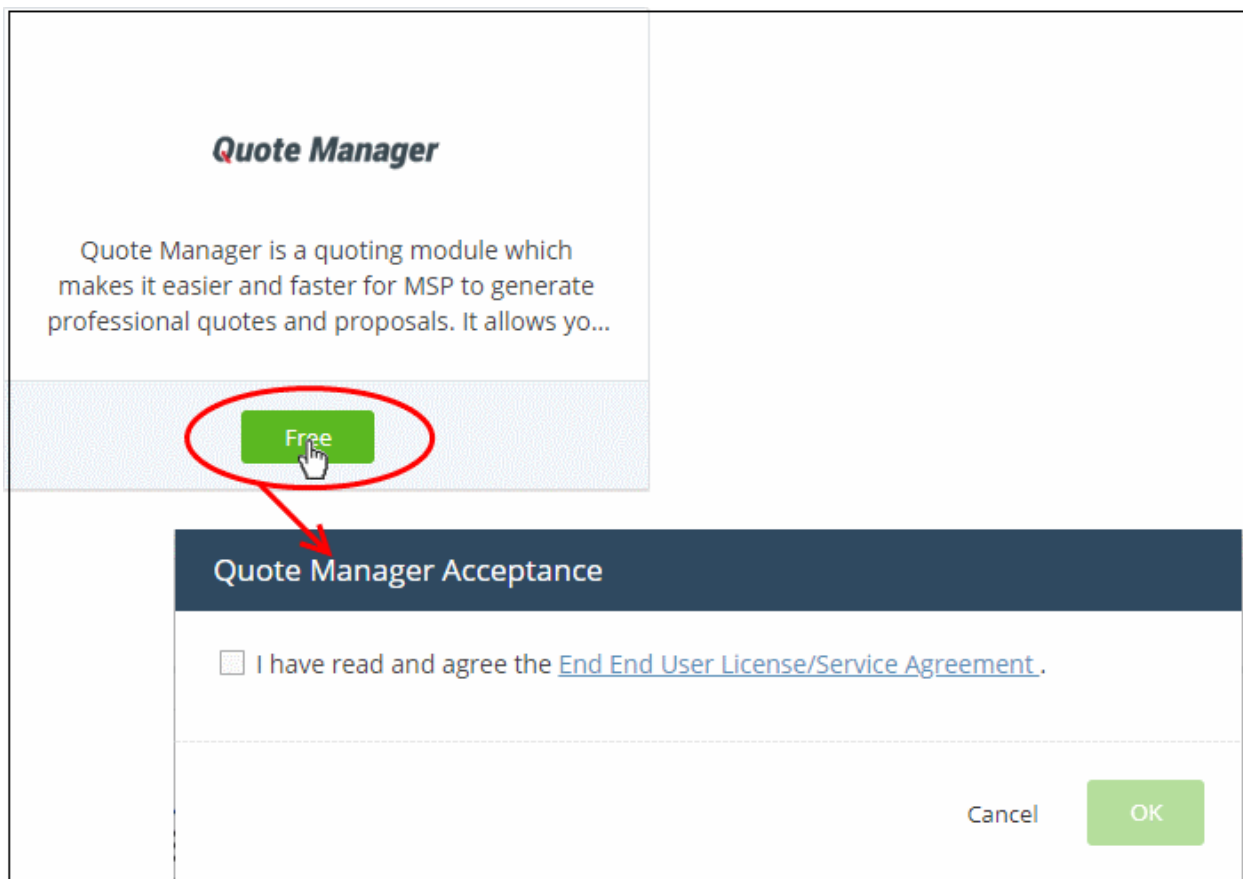

Quote Manager (QM) allows you to quickly cost, generate and send quotes to your customers.

- Quotes can be forwarded to customers directly from the C1 interface. Customers can review, accept or reject their quotes using the online viewer.
- Feedback system lets your customers provide responses to your quotes
- Built-in dashboard lets you easily keep track of the status of a quote.
- Other features include custom quote templates, custom email templates, quote reminders, sales reports and more.

To add Quote Manager to C1

- Click 'Store' on the menu bar and locate the 'Quote Manager' tile.
- Click 'Quote Manager' to view the product description.
- Click 'Free' to start the integration process.

The end user license agreement will appear:

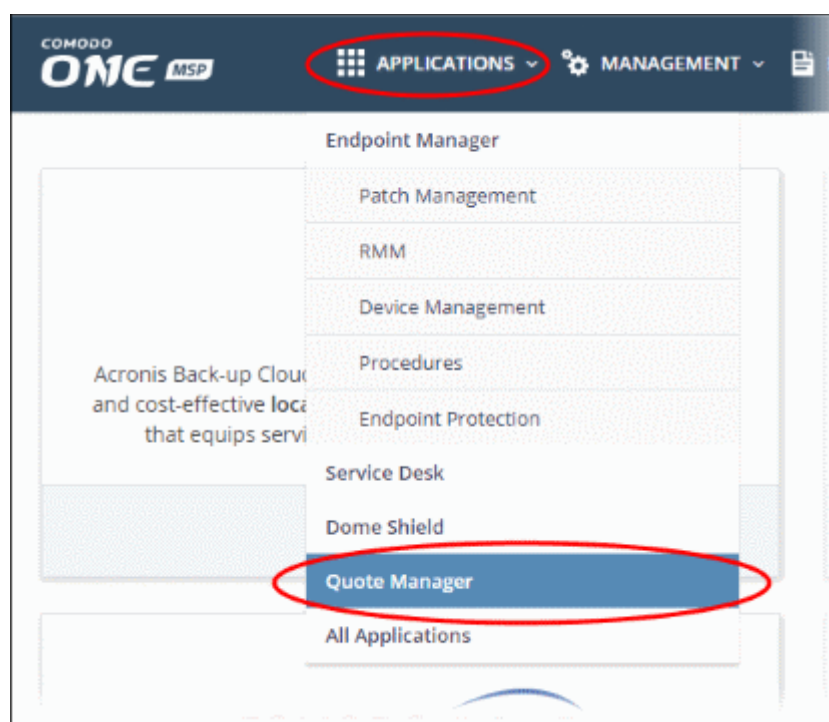

- Read the EULA fully, select the check box and click 'OK'.

Quote Manager will be added to your C1 console. You will see the following confirmation message:

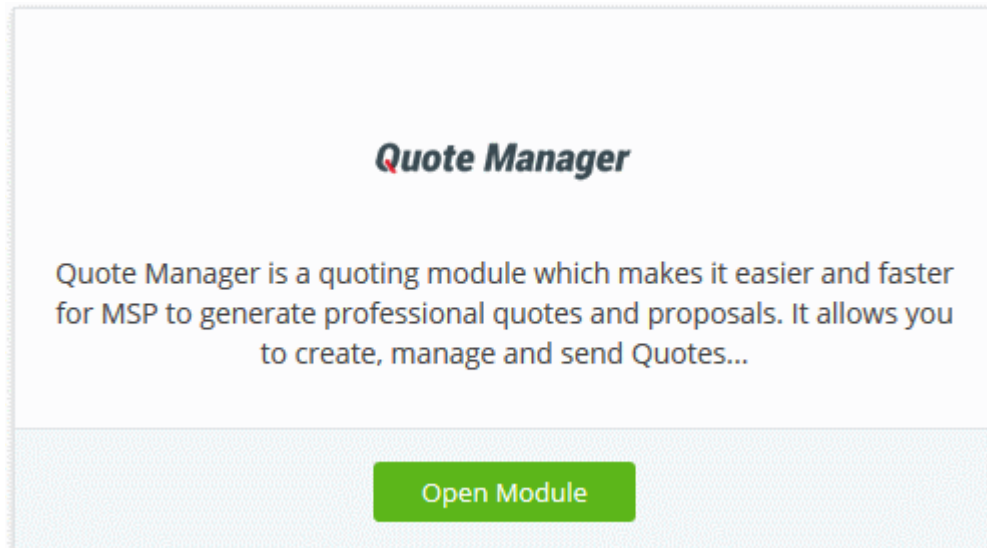

Once added, you can access 'Quote Manager' from the 'Applications' interface.

- Click 'Applications' > 'Quote Manager'

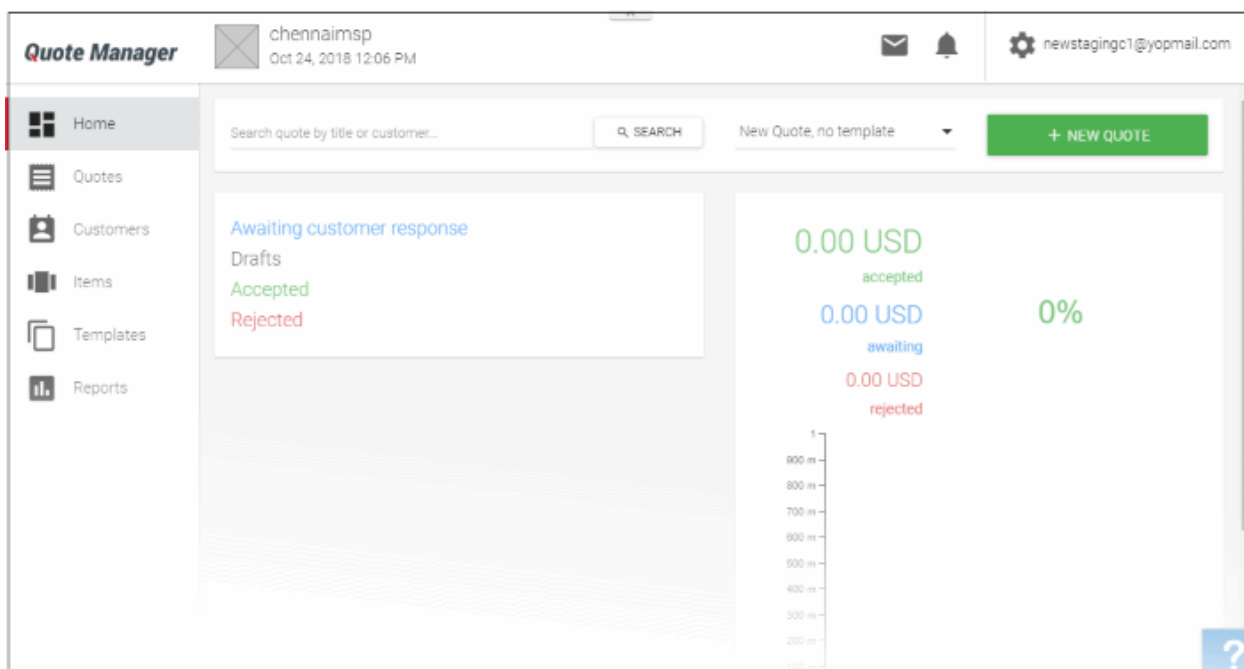

OR

- Click 'Applications' on the menu bar then choose 'All Applications'
- Click 'Open Module' in the 'Comodo Quote Manager' tile:

The Quote Manager interface will open in a new tab or in the current tab as configured in 'Settings' > 'Comodo One Application Launch'. See **Configure application launch settings** in **Configure C1 Settings** for more details.

For more details about how to use Quote Manager, see the online admin guide at <https://help.comodo.com/topic-289-1-778-10458-Introduction-to-Quote-Manager.html>

8.3 Add cWatch

- cWatch is a next generation security information and event monitoring (SIEM) platform that allows MSPs to provide strong, real-time protection to customer networks.
- It features advanced event log monitoring, built-in reports, a powerful query system, auto-assignment of incidents, customizable dashboards and real-time alerts.
- The basic version of cWatch is free for thirty days. Account admins can upgrade to a full license from the cWatch interface at any time.
 - You can add cWatch to your account by subscribing for a new trial license from the Comodo One console.
 - Alternatively, you can add cWatch by linking to another Comodo Accounts Manager (CAM) or C1 account that already has a cWatch license. The service can then be used by both accounts. Cumulative usage and validity are bound to the original license limitations.

Please read the following sections to learn more about:

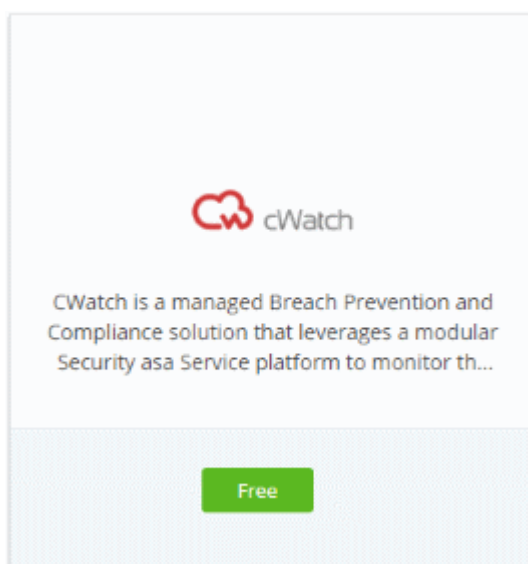

- **Obtain a trial license**
- **Activate the license**

Obtain a Trial License

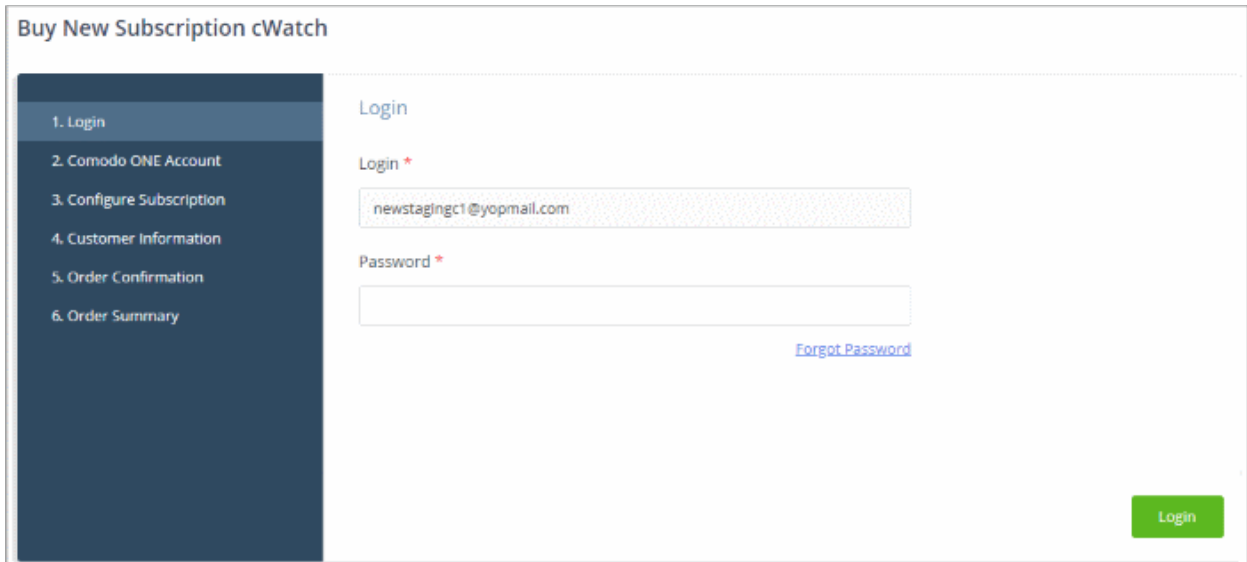

- Click 'Store' on the menu bar

All available applications will be displayed.

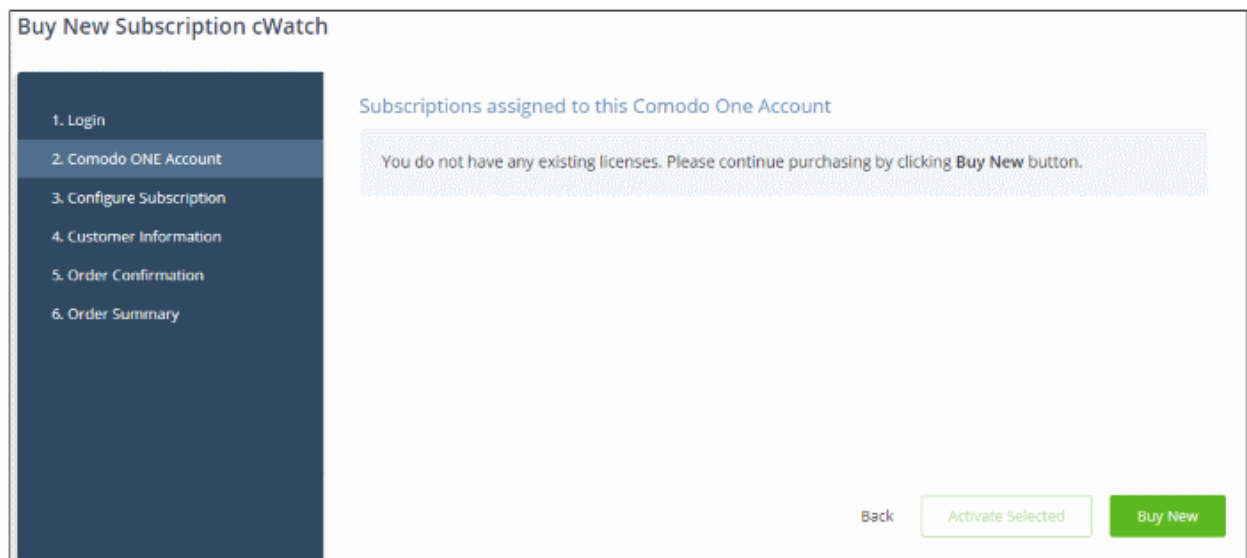

- Click the cWatch tile to see product details and pricing
- Click the 'Free' button to claim your 30 day free trial

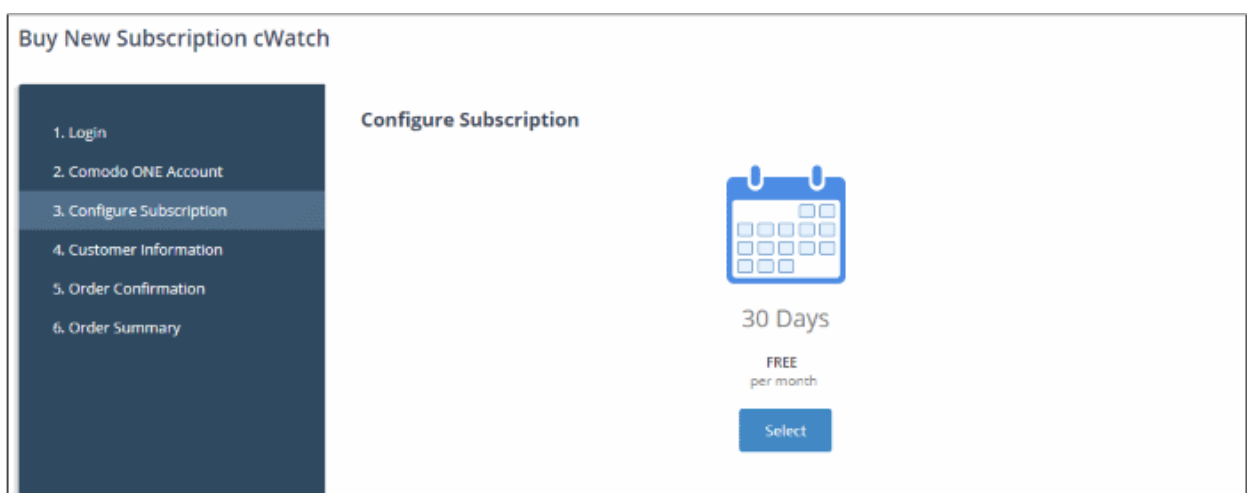

This will open the product purchase page. No payment details will be required to set up the free trial.

- Enter your Comodo One account password and click 'Login'.

- Click 'Buy New'

- Click 'Select' in the 'Configure Subscription' page

8.4 Add / Upgrade Endpoint Manager

Endpoint Manager is the single pane of glass that allows you to protect and manage mobile devices and endpoints across your entire network.

- The basic version of Endpoint Manager is integrated with your C1 account
- You can upgrade your license to 'Premium' or 'Managed' version in two ways:
 - By purchasing a new license from the Comodo One console.
 - By linking to another Comodo Accounts Manager (CAM) or Comodo One account that already has an Endpoint Manager license. The service can then be shared by both accounts. The cumulative usage and validity are bound to the original license limitations.

Please read the following sections to learn more about:

- **Purchase a new license**
- **Activate the license**

To upgrade Endpoint Manager to a higher version by purchasing a new license

- Click 'Applications' on the menu bar then choose 'Endpoint Manager' from the drop-down.
- OR
- Click 'Applications' on the menu bar then choose 'All Applications' from the drop-down.

All licensed modules for your account will be displayed as tiles:

- Click 'Open Module' on the 'Endpoint Manager' tile.

The Endpoint Manager interface will open:

- Click 'License Options' at the top

The 'Endpoint Manager License Options' screen will appear.

The license will be added to your account and can be viewed in the Endpoint Manager interface. To view the details, open Endpoint Manager > 'Settings' > 'Subscriptions' > 'List of Licenses' tab.

For more details about how to use Endpoint Manager, see the online guide at <https://help.comodo.com/topic-399-1-786-10078-Introduction-to-Endpoint-Manager.html>

8.5 Add Comodo Dome Secure Web Gateway

Comodo Dome Secure Gateway is a real-time web security solution which provides protection against internet threats for your customers. The product includes URL filtering, malware protection, Valkyrie real-time file verdicting and portable containment.

- The basic version of Comodo Dome Secure Web Gateway (SWG) is free for thirty days and can be added to your account at any time.
- You can upgrade to the full product by purchasing a new license from the C1 console.
- Once you have a Dome SWG license, you can expand the product with Dome Premium add-on modules. Available modules are 'Dome Data Protection' and 'Dome Antispam'.
- Alternatively, you can add Dome SWG by linking this account to another Comodo account that already has a license.

Please see the following sections to learn more:

- **Purchase a new license**
- **Activate the license**

Purchase a New License

New licenses for Comodo Dome SWG can be purchased and activated from the 'Store' interface:

- Click 'Store' on the menu bar

All available applications will be displayed.

- Click 'Buy' or '30 Days Free Trial' depending on the version of Comodo Dome SWG you wish to add to Comodo One.

You will be taken to the respective subscription page. The example shown below is for the basic version.

A screenshot of a web page titled 'Buy New Subscription Dome Secure Web Gateway'. On the left is a dark blue sidebar with a list of steps: 1. Login, 2. Comodo ONE Account, 3. Configure Subscription, 4. Customer Information, 5. Order Confirmation, and 6. Order Summary. The '1. Login' step is highlighted. The main content area has a 'Login' heading. Below it is a 'Login' label with a red asterisk, followed by a text input field containing the email 'newstagingc1@yopmail.com'. Below that is a 'Password' label with a red asterisk, followed by a password input field with masked characters '*****'. A blue link labeled 'Forgot Password' is positioned below the password field. A green 'Login' button is located in the bottom right corner of the form area.

Your login username will be pre-populated and cannot be changed.

- Enter your Comodo One account password in the 'Password' field and click 'Login'
- If you opted for a paid version, click the 'Buy New' button in the 'Comodo One Account' page then select a subscription package in the 'Configure Subscription' page . Click 'Next' to provide your customer information.
- If you opted for the basic version then, after logging-in, the process will jump straight to customer information screen.

Dome SWG / MSP (1 Node, 1-99 Users) Activation Complete

Start Date: 10/05/2018

The license will be activated and Comodo Dome SWG will be added to your list of 'Applications'.

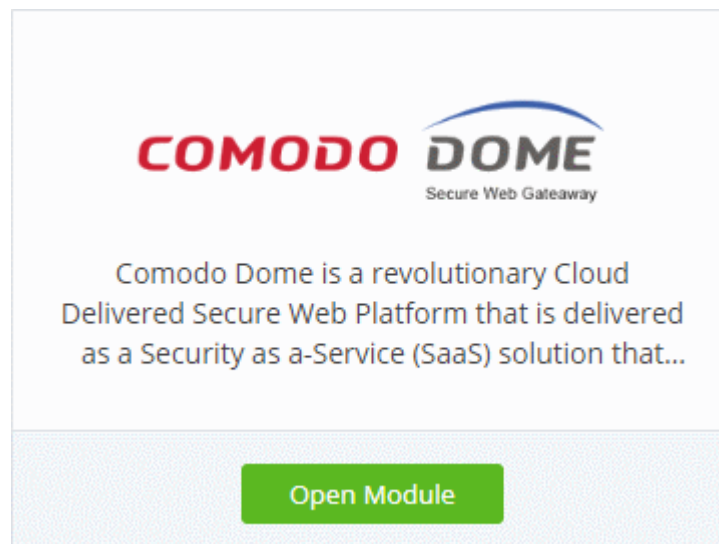

To open the 'Comodo Dome SWG' interface

- Click 'Applications' on the menu bar then choose 'Dome Secure Web Gateway'

OR

- Click 'Applications' on the menu bar and choose 'All Applications' from the drop-down. All licensed modules for your account will be displayed as tiles.
- Click 'Open Module' on the 'Comodo Dome Secure Web Gateway' tile

- The 'Dome Secure Web Gateway' interface will open in a new tab, or the current tab if configured in 'Settings' > 'Comodo One Application Launch'. See **Configure application launch settings** in **Configure C1 Settings** for more details.

For more help to use Comodo Dome Secure Web Gateway, see <https://help.comodo.com/topic-436-1-842-10771-Introduction-to-Comodo-Dome-Secure-Web-Gateway.html>.

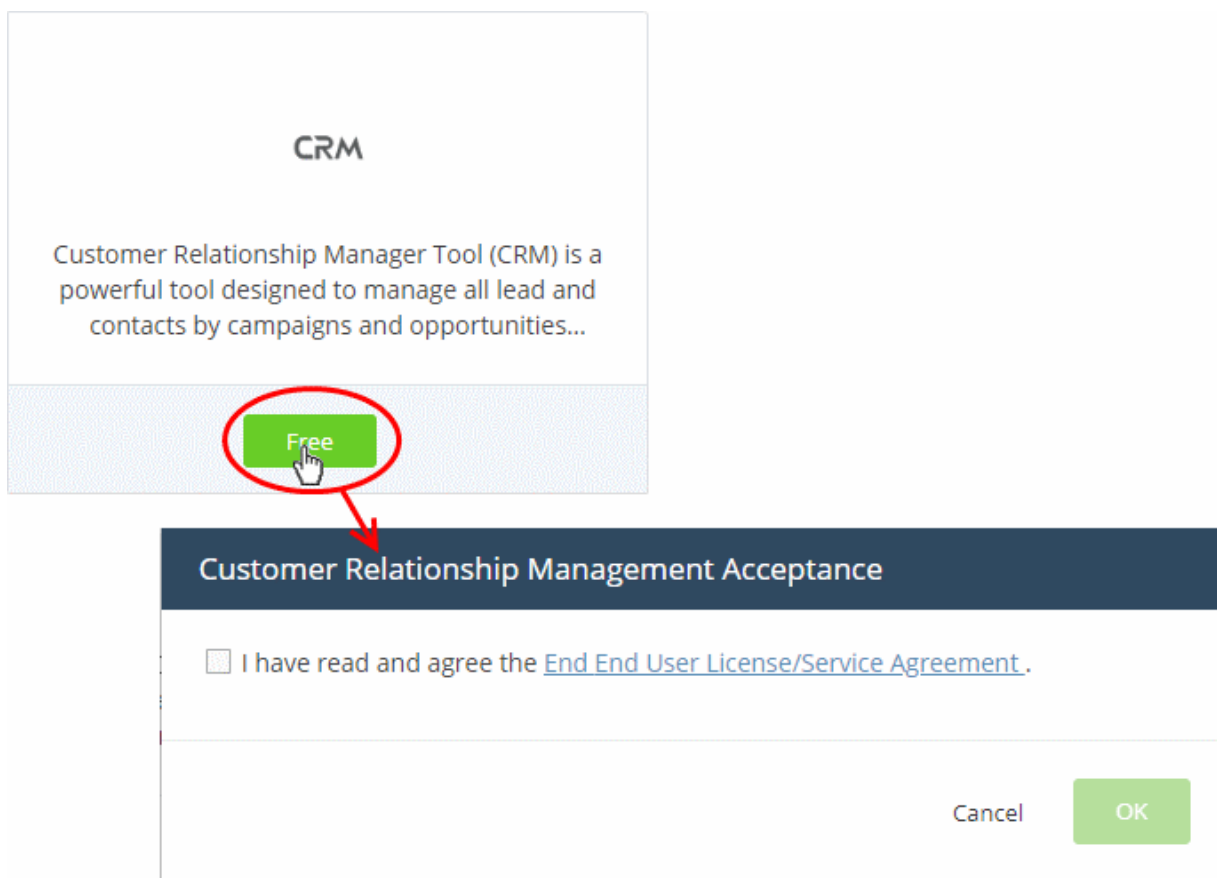

8.6 Add Customer Relationship Management

The Customer Relationship Management (CRM) tool helps businesses save time and grow productivity by implementing processes to generate, nurture and close customer leads.

To add CRM to C1

- Click 'Store' on the menu bar and locate the 'CRM' tile.
- Click 'CRM' to view the product description.
- Click 'Free' to start the integration process.

The End User License Agreement will appear:

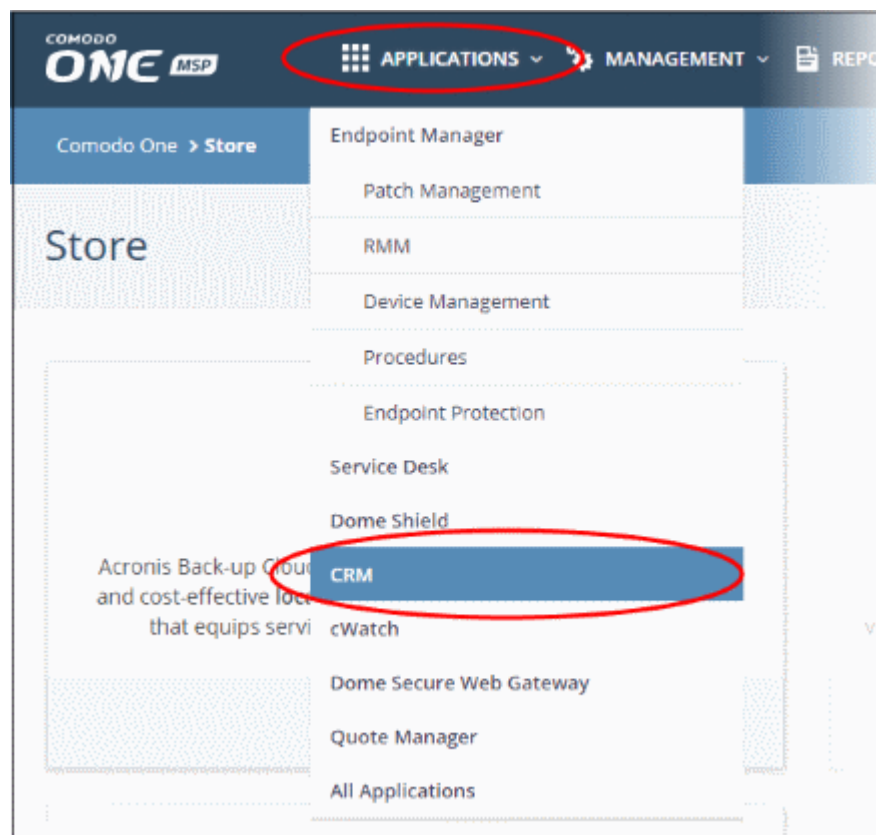

- Read the EULA fully and select the check box to agree, then click 'OK'.

CRM will be added to your account. You will see the following confirmation message:

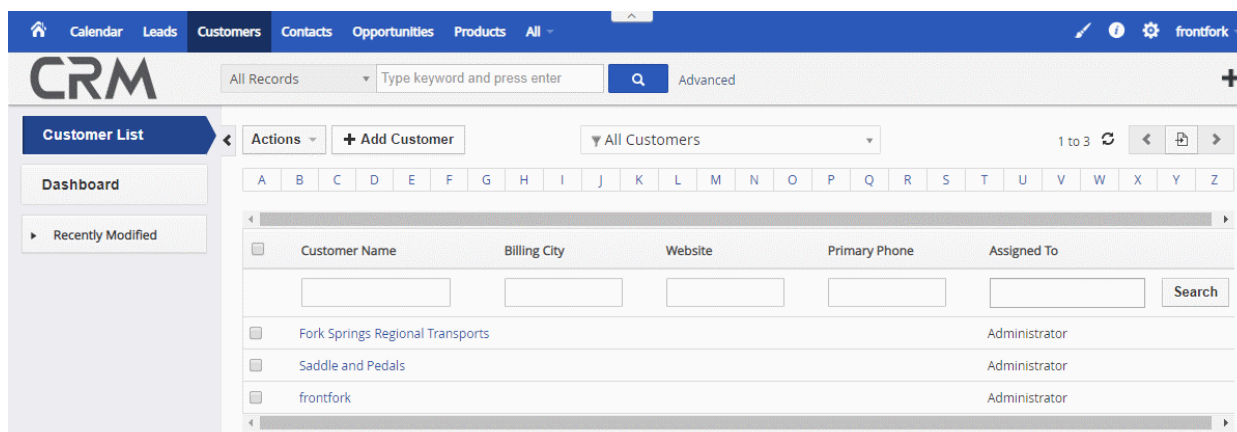

Open the CRM

- Click 'Applications' > 'CRM' on the menu bar:

OR

- Click 'Applications' on the menu bar then select 'All Applications' from the list.
- Click 'Open Module' on the 'CRM' tile
- The CRM interface will open in a new tab or the current tab as configured in 'Settings' > 'Comodo One Application Launch'. See **Configure application launch settings** in **Configure C1 Settings** for more details.

For help to use the CRM, see the online guide at <https://help.comodo.com/topic-452-1-952-13231-Introduction-to-CRM.html>

8.7 Add Comodo Dome Data Protection

Dome Data Protection is a powerful solution that lets you monitor and control the movement of confidential information in your network.

- Dome Data Protection is available only for C1 Enterprise customers.
- Dome Data Protection and Dome Antispam are premium add-ons for 'Comodo Dome Secure Web Gateway'. These add-ons can only be added to your account if you have Secure Web Gateway.
- The basic version of Comodo Dome Data Protection is free for thirty days and can be added to your account at any time.
- You can upgrade to the full product by purchasing a new license from the Comodo One console.
 - Alternatively, you can add Dome Data Protection by linking another Comodo Accounts Manager (CAM) or Comodo One account that already has a Dome Data Protection license. The service can then be used by both accounts. Cumulative usage and validity are bound to the original license limitations.

The following sections explain how to purchase and activate a license:

- **Purchasing a new license**
- **Activating the license**

Purchase a new license

- Click 'Store' on the menu bar
- Locate the 'Dome Data Protection' tile

- Click 'Buy' or '30 Day Free Trial' depending on the version you require.

You will be taken to the respective subscription page. The example shown below is for the trial version.

- This will open the product purchase page:

Buy New Subscription C-Dome Data Protection

Your login username is pre-populated and cannot be changed.

- Enter your Comodo One account password and click 'Login'
- If you choose the paid version, click the 'Buy New' button in the 'Comodo One Account' page then select a subscription package. Click 'Next' to provide your customer information.
- If you chose the trial version then you'll go straight to the customer information screen after login.

Finish

- Click 'Finish' to complete the purchase process.

To open Dome Data Protection interface

Note: You should have configured the Dome Data Protection URL details during your first login or through the **Settings** tab under 'Management' > 'Applications'. The details will be available in the 'Information' section at the end of the sign up process. The service URL will also be emailed to you when ready. Also you need to contact domesupport@comodo.com with the public IP address of your location to enable user interface access and to configure web and endpoint policy settings.

- Click 'Applications' on the menu bar then choose 'Dome Data Protection' from the list.
OR
- Click 'Applications' on the menu bar then click 'All Applications' from the list.

All licensed modules for your account will be displayed.

- Click 'Open Module' on the 'Comodo Dome Data Protection' tile

The Dome Data Protection interface will open. If you have not configured the URL in the **Settings** tab under 'Management' > 'Applications' then the 'Application Settings' dialog will be displayed.

Click to go to menu.'. Below this text is a label 'Dome Service URL *' followed by an empty text input field. At the bottom of the dialog, there are two buttons: 'Cancel' and 'Save'." data-bbox="334 144 711 484"/>

Application Settings

Please insert your Dome Service URL provided. Edit option is also available from "Application Settings" under Applications Management. [Click to go to menu.](#)

Dome Service URL *

Cancel Save

- Enter the service URL that was sent to your email and click 'Save'.

For more details about how to use Comodo Dome Data Protection, see the online guide at <https://help.comodo.com/topic-283-1-596-7050-Introduction-to-Comodo-Dome-Data-Protection.html>.

8.8 Add Comodo Dome Antispam

Comodo Dome Antispam is an advanced mail filtering and threat prevention solution for enterprises. The product uses a powerful combination of filters, antivirus and content analysis to quietly and effectively block unsolicited mail from entering your network.

- Comodo Dome Antispam is available to C1 Enterprise customers.
- There are two ways to add Dome Antispam to your account:
 - **Add-on module for 'Comodo Dome Secure Web Gateway'** - Dome Antispam is available as an add-on at discounted prices for customers who have already purchased a Dome Secure Web Gateway (SWG) license. If you own an SWG license then the add-on will be selected when you subscribe for Dome Antispam.
 - **Stand-alone version** - The stand-alone version can be added to your account if you do not have a Dome Secure Web Gateway license.
- Both stand-alone and add-on licenses can be purchased from the Comodo One console.
- Alternatively, you can add Dome Antispam by linking to another Comodo Accounts Manager (CAM) or C1 account that already has a Dome Antispam license. The service can then be shared by both accounts. Cumulative usage and validity are bound to the original license limitations.

Please read the following sections to learn more about:

- **Purchase a new license**

- **Activate the license**

Purchase a new license

New licenses for Comodo Dome Antispam can be purchased and activated from the 'Store' interface:

- Click 'Store' on the menu bar

All available applications will be displayed.

- Click 'Finish' to complete the purchase process.

To open 'Comodo Dome Antispam' interface

Note: You should have configured the Dome Antispam URL details in the **Settings** tab under 'Management' > 'Applications'. Information about this will be shown at the end of product sign up process. The service URL will be mailed to your email address when ready.

- Click 'Applications' on the menu bar then choose 'Dome AntiSpam' from the drop-down.

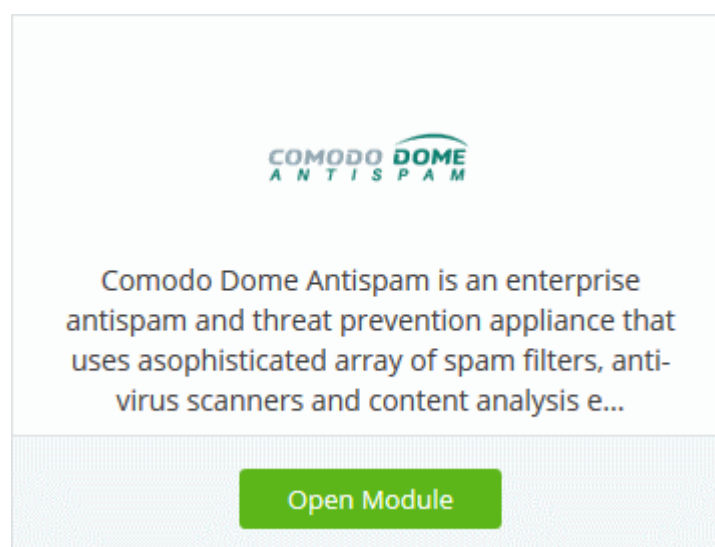

OR

- Click 'Applications' on the menu bar then choose 'All Applications' from the drop-down.

All licensed modules for your account will be displayed as tiles.

- Click 'Open Module' on the 'Dome Antispam' tile

The 'Dome Antispam' interface will open. If you have not configured the URL in the **Settings** tab under 'Management' > 'Applications', then the 'Application Settings' dialog will open.

Click to go to menu.'. Below this text is a text input field labeled 'Dome Service URL *'. At the bottom of the dialog, there are two buttons: 'Cancel' and 'Save'." data-bbox="330 117 705 459"/>

Application Settings

Please insert your Dome Service URL provided. Edit option is also available from "Application Settings" under Applications Management. [Click to go to menu.](#)

Dome Service URL *

Cancel Save

- Enter the service URL that was sent to your email and click 'Save'.

For more details about how to use Comodo Dome Antispam, see the online guide at <https://help.comodo.com/topic-443-1-898-11360-Introduction-to-Comodo-Dome-Anti-spam.html>.

8.9 Add Comodo Dome Antispam - MSP

Comodo Dome Antispam lets MSPs protect customer networks from spam and email-borne threats. This product is only available only to MSP customers.

- Licenses can be purchased from the Comodo One console
- The basic version is free for thirty days and can be added to your account at any time.
- You can upgrade to the full product by purchasing a new license from the Comodo One console.
- Alternatively, you can add Dome Antispam by linking another Comodo account that already has a license.

The following sections explain how to:

- **Purchase a new license**
- **Activate the license**

Purchase a new license

- Click 'Store' on the menu bar
- Locate the 'Comodo Dome Antispam' tile:

- Click 'Buy' or '30 Day Free Trial' depending on the version you require.
- You will be taken to the respective subscription page. The example shown below is for the basic version.

Buy New Subscription Dome AntiSpam MSP

Instructions

You have successfully purchased **Dome Antispam MSP** subscription.

Now, you can access your Dome Antispam MSP under your all applications in C1 Portal. You can purchase additional users, domains or archive spaces under Management / Applications Add New Subscription path in C1 Portal one by one.

In order to activate the module for your staff, account administrator must login once to module management interface.

For questions and assistance please contact:
domesupport@comodo.com

Thank you being part of the community!
The Comodo One Team

Finish

The information page explains how to setup Dome Antispam MSP.

- You will receive your antispam service URL via email after our support team sets up your portal.
- Click 'Licensed Applications' > 'Dome Antispam' to open the interface. See the **description** at the end of this section if you need more help with this.
- On your first access, you need to enter the service URL we sent you over email.

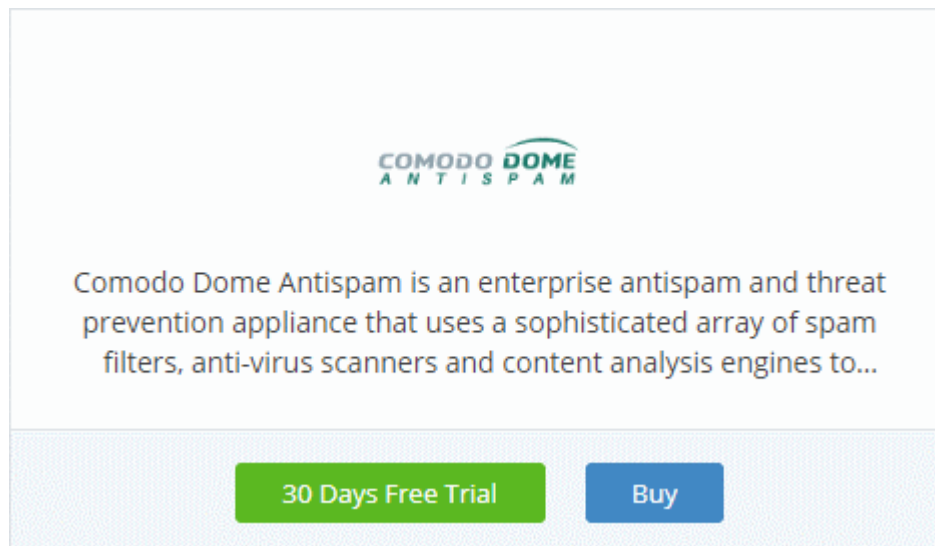

Click 'Finish' to complete the purchase process.

Activate the license

- You can activate licenses for your Comodo One products through the 'Store' interface.
- You can also activate licenses in linked accounts. To do this, you must first have linked an account and set it as default. See **Comodo One License Account Details** for more details on this process.

Activate an existing license

- Click 'Store' on the menu bar
- Click 'Buy' or '30 Days Free Trial' in the 'Comodo Dome Antispam' tile, depending on the license type possessed by the linked account

- This will open the product purchase page:

8.10 Add Comodo Dome Firewall Virtual Appliance

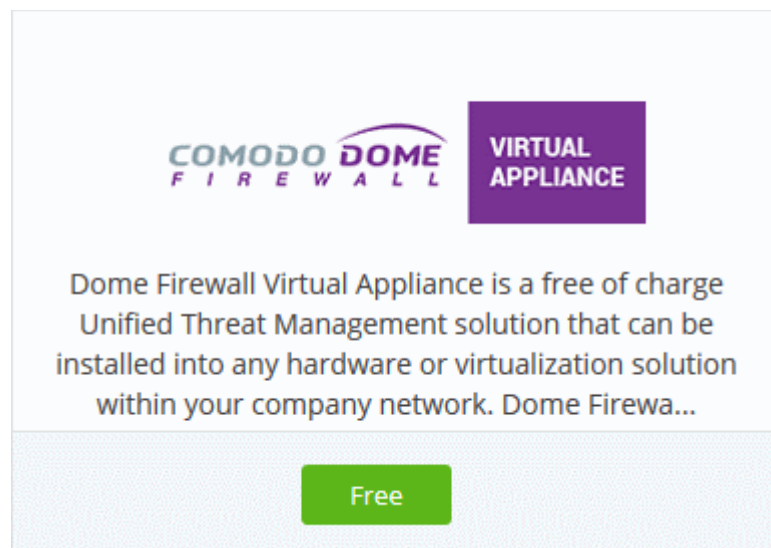

- Dome Firewall simplifies network security by delivering a single interface through which you can control firewall policy, antivirus, intrusion prevention, website filtering and more.
- The product is provisioned in OVA or ISO format which can be installed on bare-metal appliances and virtual servers such as Virtualbox and VMware.
- The firewall is free to Comodo One Enterprise and MSP customers. You can add the firewall to your account by getting a free license from the Comodo One console.
- Alternatively, you can add Dome Firewall by linking to another Comodo Accounts Manager (CAM) or Comodo One account that already has a Dome Firewall license. The service can then be used by both accounts.

Please read the following sections to learn more about:

- [Obtain a trial license](#)
- [Activate the license](#)

Obtain a Trial License

- Click 'Store' on the menu bar to view all available applications.
- Click the Comodo Dome Firewall Virtual Appliance tile to see product details and features.

- Click 'Free' on the 'Dome Firewall Virtual Appliance' tile to subscribe for a free license.

This will open the product purchase page.

8.11 Add Comodo Dome Firewall Central Manager

Firewall Central Manager lets you manage multiple Dome Firewall installations on customer networks.

- Click 'Store' > 'Dome Firewall Central Manager' > 'Free' to obtain a free license
- Once setup, you can access central manager by clicking 'Applications' > 'Dome Firewall Central Manager'.

There are two ways you can setup the central manager:

- **Virtual Appliance:**
 - Download the .ova file for Comodo Dome Firewall Central Manager from <https://download.comodo.com/dome-repo/dome-fw-image/domefirewallcm.ova>.
 - Install the virtual appliance on your network and assign a public IP address to it.
 - Once installed, you can use any browser to access the central manager console at <https://<IP address of the virtual appliance>>
 - The default username is 'admin' and password is 'comodo' (without quotes).
 - Activate the product by entering the license key purchased through Comodo One
 - Enable 'Single Sign-On' on the firewall appliance and integrate it with your Comodo One account to access the central manager console from Comodo One. See <https://help.comodo.com/topic-436-1-920-12642-Integrate-Central-Manager-with-Comodo-One.html> for help with this.
- **Cloud version:**
 - Contact Comodo at provisiondome@comodo.com with your license key to setup the service.
 - Once setup, you will receive the IP address or the URL on which the service is hosted.
 - You can access your central manager instance at <https://<given IP or domain>>
 - The default username is 'admin' and password is 'comodo' (without quotes). You should change this after your first login.
 - Activate the product by entering the license key purchased through Comodo One
 - Integrate Dome Firewall Central Manager with your Comodo One account by entering your access URL (<https://<given address>>) as the 'Dome Service URL'. See <https://help.comodo.com/topic-436-1-920-12642-Integrate-Central-Manager-with-Comodo-One.html> if you need help with this.
- The basic trial version of the Dome Firewall Central Manager license is free and covers unlimited users for one year. The license can be upgraded at anytime from the Comodo One console.
 - You can upgrade Dome Firewall Central Manager on your account by subscribing for a new license from the Comodo One console.
 - Alternatively, you can link to another Comodo account that already has a Dome Firewall Central Manager license. The service can then be used by both accounts. Cumulative usage and validity are bound to the original license limitations.
 - Click 'Management' > 'Account' > 'Comodo One License Account Details' > 'Link New', to link an account.
 - See [Link a CAM account to C1](#) if you need more help.

Comodo Dome Firewall Virtual Appliance:

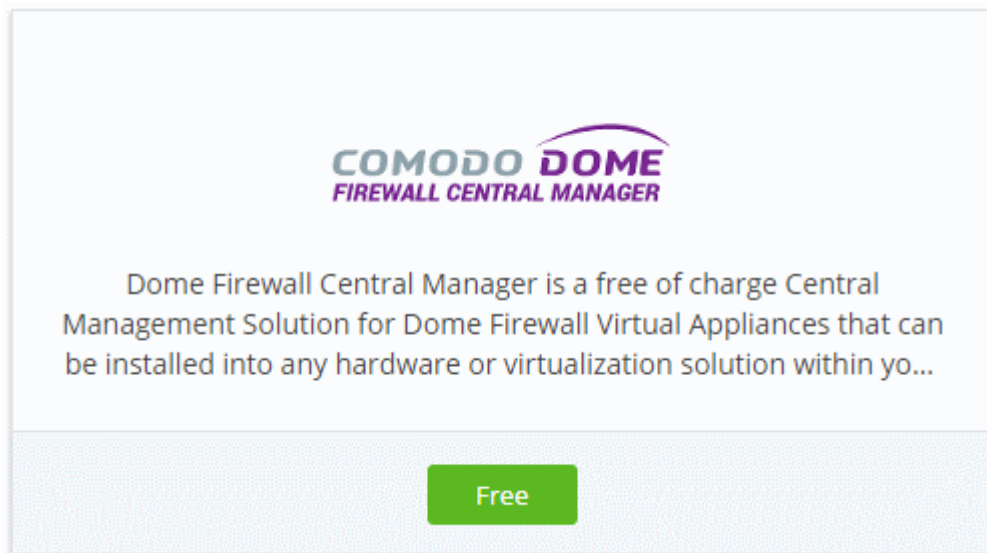

- For more details about how to purchase licenses for and download the virtual appliance, see [Add Comodo Dome Firewall Virtual Appliance](#)
- For more details about how to use Dome Firewall Virtual Appliance, see the online admin guide at <https://help.comodo.com/topic-436-1-912-11986-Introduction-to-Comodo-Dome-Firewall---Virtual-Appliance.html>

Setup Dome Firewall Central Manager - Cloud Version

- Click the 'Request Provisioning' button. Comodo One will send a request to Dome support to create a Dome Firewall Central Manager instance for you. You will receive an email with the IP address/URL of the console within two working days.
- You can use this IP address/URL to access the console as a stand-alone application. Alternatively, you can enter it in Comodo One console to access the console from the Comodo One interface.

Method 2: Comodo Hosted

Your provisioning request is sent to Comodo Dome Team. Provisioning of your Dome Firewall Central Manager may take couple of days based on queue. If you have any questions during this period please contact domesupport@comodo.com.

[Finish](#)

- Click 'Finish'

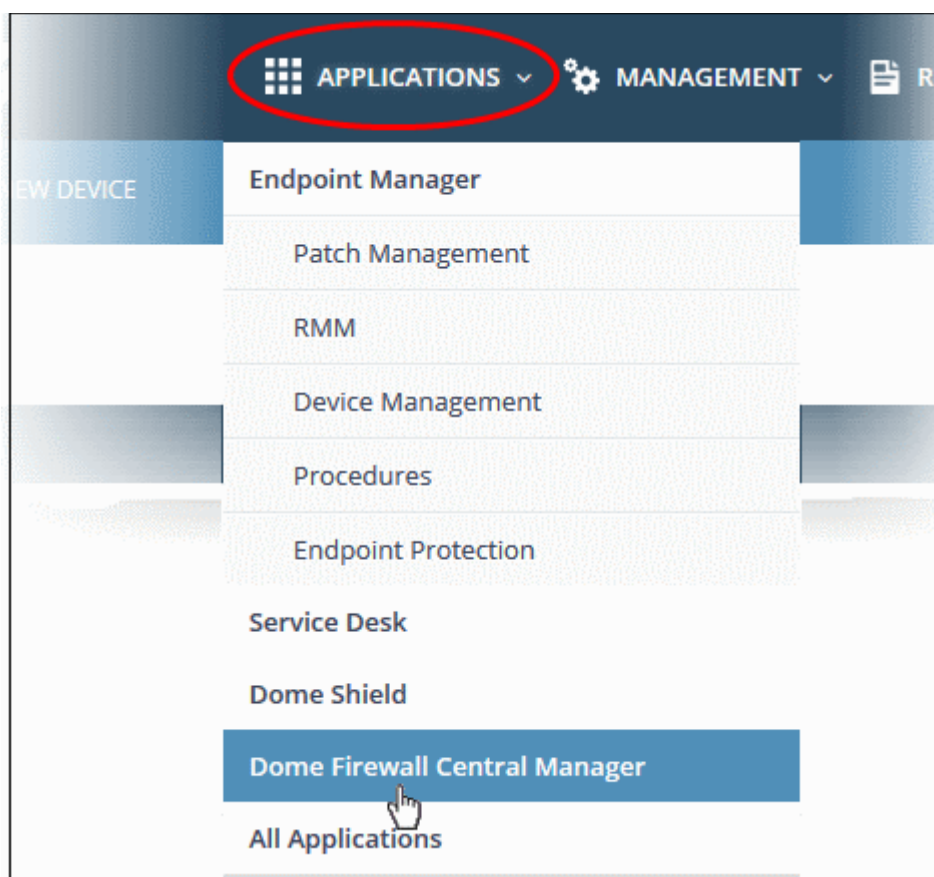

To open Dome Firewall Central Manager

Note: You should have entered the address of central manager as the 'Dome Service URL' in the C1 interface:

- Login into C1 at <https://one.comodo.com/app/login>
- Click 'Management' > 'Applications'
- Click the 'Comodo Firewall Central Manager' tile.
- Click the 'Settings' tab
- Enter your URL in the space provided and click 'Save'.

See <https://help.comodo.com/topic-451-1-939-12863-Integrate-Central-Manager-with-Comodo-One.html> for more help with this.

- Login into C1 at <https://one.comodo.com/app/login>
- Click 'Applications' > 'Dome Firewall Central Manager'

OR

- Click 'Applications' on the menu bar then click 'All Applications' from the list.

All licensed modules for your account will be displayed.

- Click 'Open Module' on the 'Comodo Dome Firewall Central Manager' tile

The Dome Firewall Central Manager interface will open. If you have not configured the URL in the **Settings** tab under 'Management' > 'Applications' then the 'Application Settings' dialog will be displayed.

Application Settings

Please insert your Dome Service URL provided. Edit option is also available from "Application Settings" under Applications Management. [Click to go to menu.](#)

Dome Service URL *

For more details about how to use Dome Firewall Central Manager, see the online admin guide at <https://help.comodo.com/topic-436-1-920-12359-Introduction-to-Comodo-Dome-Firewall-Central-Manager.html>.

8.12 Add cWatch EDR

cWatch Endpoint Detection and Response (EDR) is a powerful event analysis solution that provides the highest levels of visibility into activities on Windows endpoints. EDR lets you view security related incidents in a detailed timeline while instant alerts keep you informed if an attack occurs.

- EDR ships with Comodo's recommended security policy for realtime monitoring and detection of malicious activities.
- You can also add any number of policies with granular rules to identify threats under various event categories.
- All unknown files and event types are analyzed by 'Valkyrie' - Comodo's cloud based file verdict system that allows you to view detailed reports on identified threats.
- The basic version of cWatch EDR is free for one year, covers unlimited endpoints and has a data-retention of 3 days. It can be added to your account at any time.
- You can upgrade to paid version by purchasing a new license from the Comodo One console. The number of endpoints covered and the data retention period depends on the license purchased.
 - Alternatively, you can add the product by linking to another Comodo account that already has an EDR license.
 - Click 'Management' > 'Account' > 'Comodo One License Account Details' > 'Link New' to link an account.

The following sections explain how to:

- **Purchase a new license**
- **Activate the license**

Purchase a new license

New EDR licenses can be purchased and activated from the 'Store' interface:

- Click 'Store' on the menu bar
- Click the cWatch EDR tile to see product details and pricing:

- Click 'Buy' or 'Free' depending on the version you wish to add:

You will be taken to the respective subscription page.

9 Quick Actions

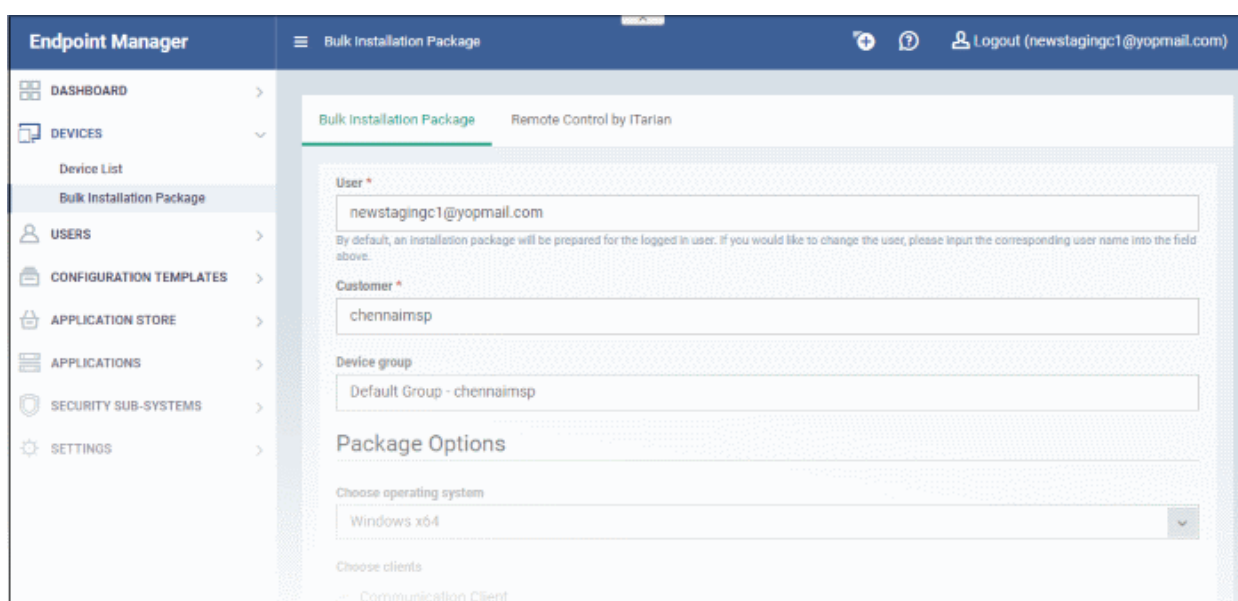

- The 'Quick Actions' menu contains shortcuts to important tasks in Comodo One modules.
- Click the clock icon in the menu bar to view all tasks:

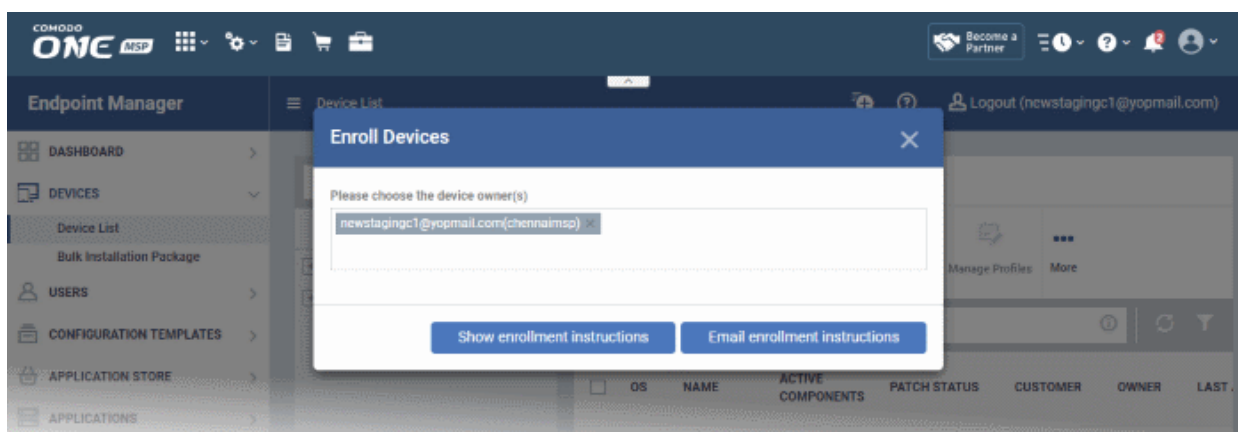

- Quick actions are also available as buttons on the dashboard below the menu bar:

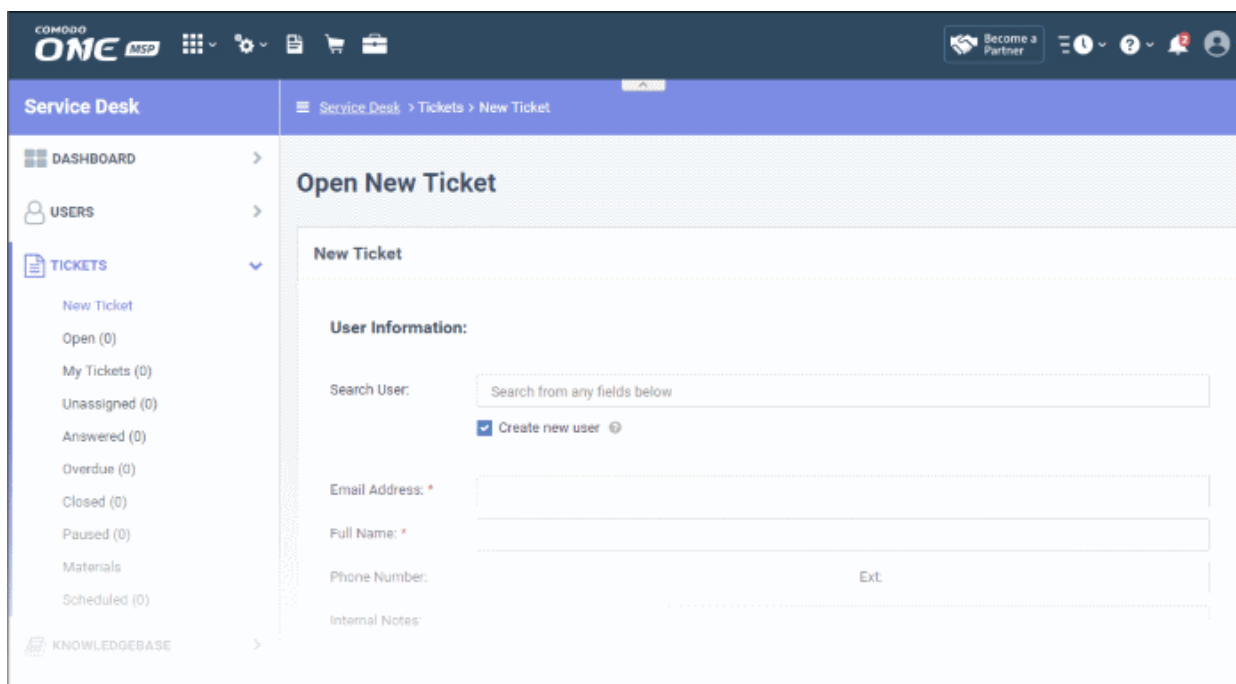

- **Enroll Devices in Bulk: - Endpoint Manager:** Download the packages you need to enroll multiple devices into Endpoint Manager. See <https://help.comodo.com/topic-399-1-786-11273-Bulk-Enrollment-of-Devices.html>

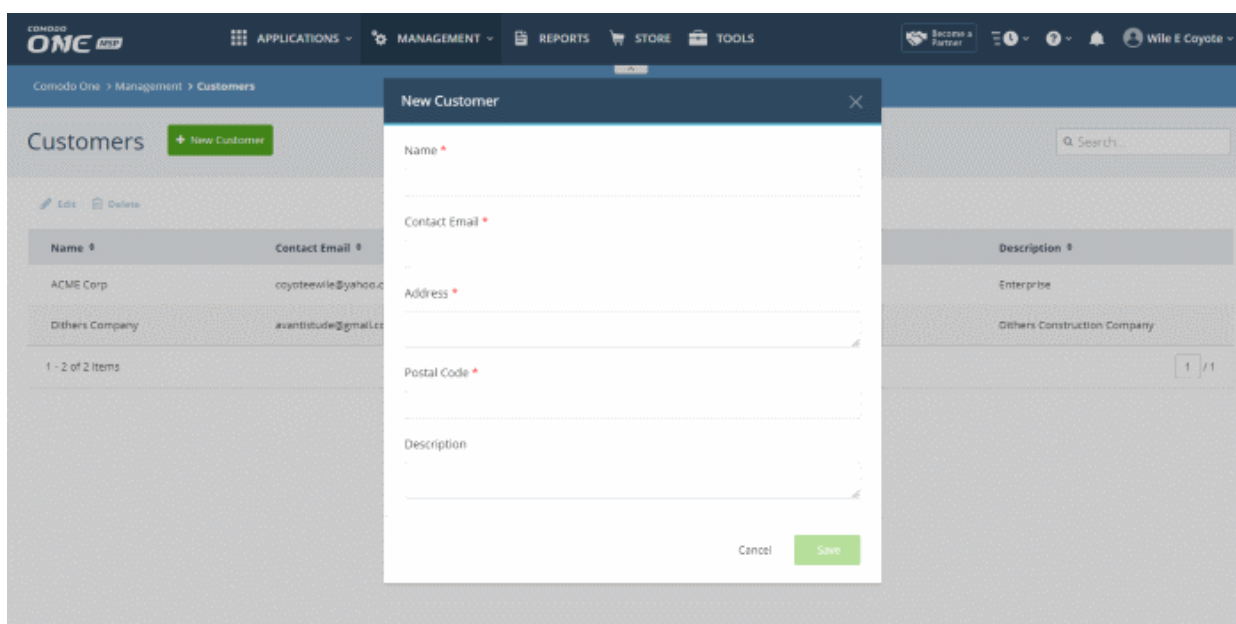

- **Enroll New Device - Endpoint Manager:** Add user devices to Endpoint Manager. See <https://help.comodo.com/topic-399-1-786-10126-Enrolling-User-Devices-for-Management.html> for more on this.

- **Create New Ticket - Service Desk:** Add a new Service Desk ticket on behalf of a user. See <https://help.comodo.com/topic-289-1-625-7854-Manage-Tickets.html> for more details on this process.

- **Create New Customer - Comodo One Portal:** MSPs can add new customers to Comodo One. Customers that you add will become available in all integrated applications:
 - They are available as 'Organizations' in Service Desk
 - They are available as 'Organizations' in CRM
 - They are available as 'Companies' in Endpoint Manager
 - They are available as 'Companies' in Dome Shield
- To find out more, see <https://help.comodo.com/topic-289-1-716-8483-Managing-Companies.html>

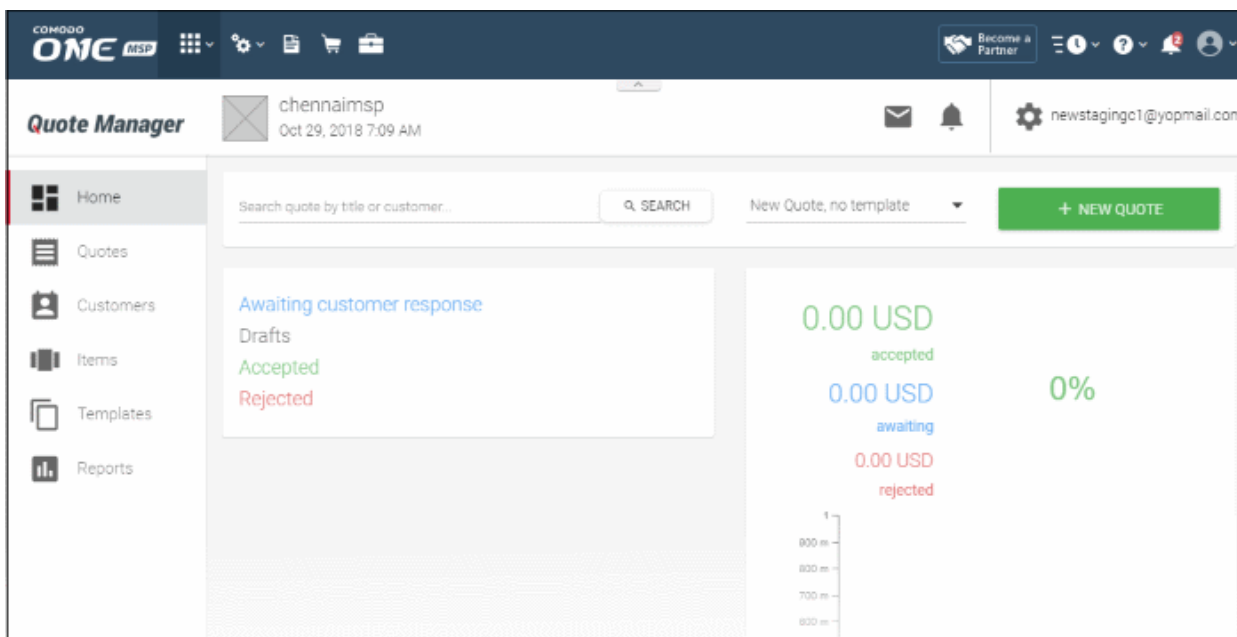

- **Create New Opportunity - CRM:** Add a new sales opportunity to Customer Relationship Management (CRM) module. See <https://help.comodo.com/topic-289-1-845-10881-Add-an-Opportunity.html> if you need more help with this.

The screenshot displays the 'Creating New Opportunity' form within the Comodo One CRM. The interface includes a top navigation bar with 'Calendar', 'Leads', 'Organizations', 'Contacts', 'Opportunities', and 'Products'. A search bar is present with the text 'All Records' and 'Type keyword and press enter'. The form is titled 'Creating New Opportunity' and features a 'Save' button. The form fields are organized into two columns:

- Left Column:**
 - Opportunity Name (required, marked with a red asterisk)
 - Contact Name (with a search icon)
 - Type (dropdown menu)
 - Lead Source (dropdown menu)
 - Assigned To (dropdown menu, currently set to 'chennaimsp')
 - Campaign Source (with a search icon)
 - Forecast Amount (with a dollar sign prefix)
- Right Column:**
 - Organization Name (with a search icon)
 - Amount (with a dollar sign prefix)
 - Expected Close Date (with a calendar icon)
 - Next Step (text input)
 - Sales Stage (dropdown menu)
 - Probability (with a percentage sign)

Below the form, there is a section for 'Description Details'.

- **Create New Quote - Quote Manager:** Add a new sales or service quote in Quote Manager. See <https://help.comodo.com/topic-289-1-778-10472-generating-a-new-quote.html> to find out more.

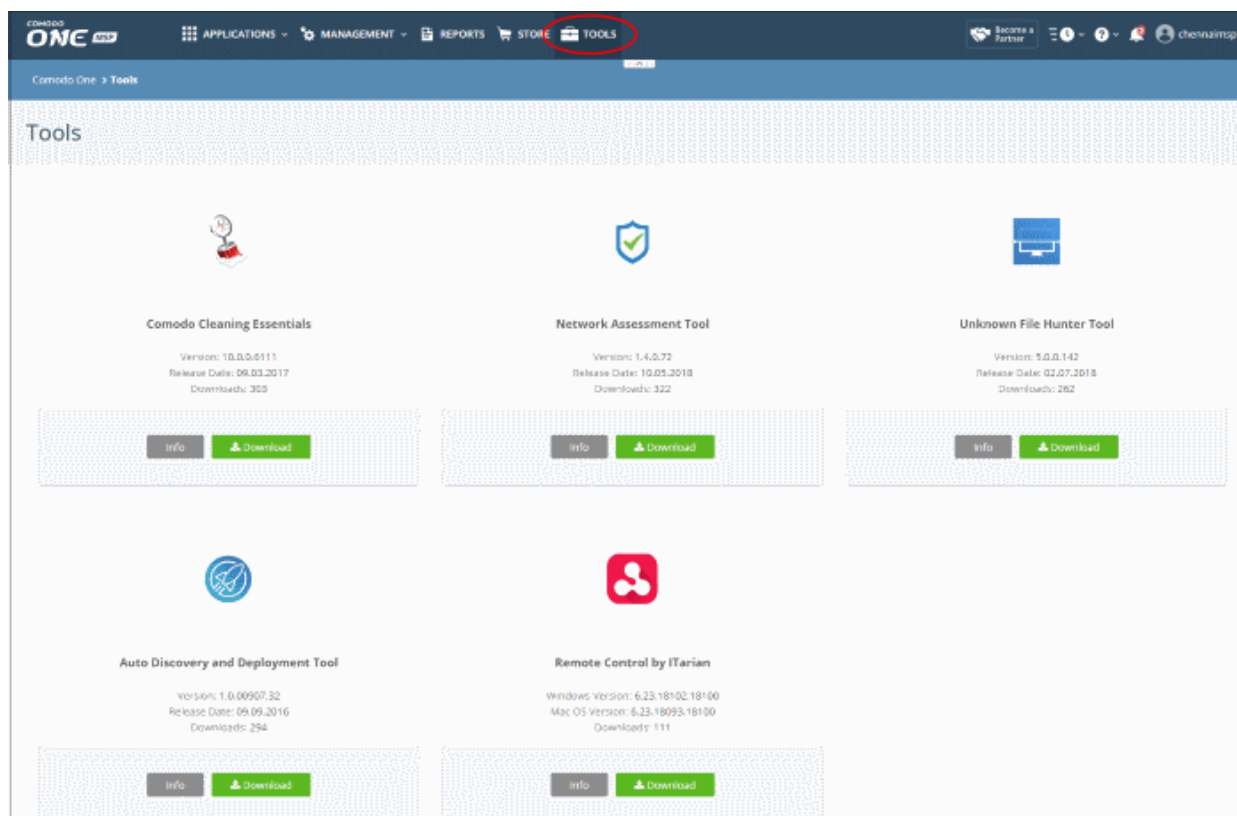

10 Tool Set

- Click 'Tools' on the menu bar.

The 'Tools' area contains a suite of complimentary productivity and security tools. Free of charge, each tool is designed to help customers accomplish specific management and security tasks more efficiently.

To download Comodo One tools

- Click 'Tools' on the menu bar.

The following utilities are available:

- **Comodo Cleaning Essentials** - Security software for Windows which identifies and removes malware/unsafe processes from infected computers. Includes a fully customizable malware scanner and a tool which lets you kill unsafe processes with a single click. To find out more, see '**Comodo Cleaning Essentials**'.
- **Network Assessment Tool** - Scan customer networks to identify a wide range of server, endpoint and network vulnerabilities. The tool also generates detailed reports and risk mitigation plans with actionable advice to address each issue. See '**Network Assessment Tool**' to find out more.
- **Unknown File Hunter Tool** - Unknown file hunter (UFH) is a lightweight scanner that identifies unknown and potentially malicious files residing on networks. Scanned files are categorized as 'safe', 'malicious' or 'unknown'. Unknown files are those that were not found on either the safe-list or the blacklist and could potentially contain zero-day threats. The UFH scanner allows you to upload such files to our Valkyrie servers where they will undergo a battery of run-time tests designed to reveal whether or not they are harmful. You can view the results of these tests in the UFH interface. See '**Unknown File Hunter Tool**' to find out more.
- **Auto Discovery and Deployment Tool** - Remotely deploy applications to multiple endpoints via Active Directory, Workgroup or IP address/IP range/host name. See '**Auto Discovery and Deployment Tool**' to find out more.

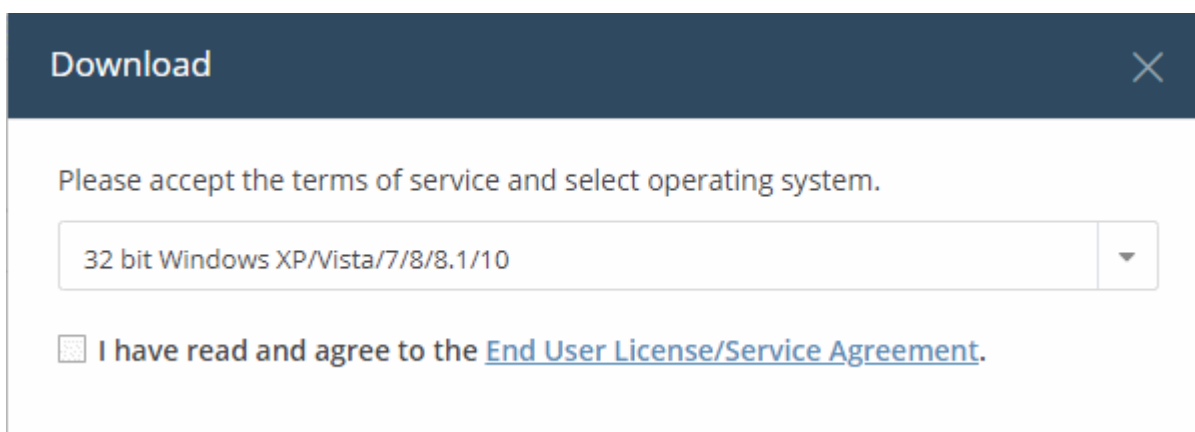

- **Remote Control by ITarian** - Remotely access Windows and Mac OS devices to solve issues, install third party software or run system maintenance. See '**Remote Control by ITarian**' to find out more.

Network Assessment Tool

- Scan customer networks to identify all vulnerabilities and threats.
- Detailed client risk report assigns a score to each threat found on an endpoint.
- Risk mitigation plans contain advice to address every discovered issue.
- Easy setup lets you import networks via Active Directory, Workgroup or IP range.

To download NAT

- Click 'Tools' in the top-menu
- Locate the Network Assessment Tool' tile
- Click the 'Download' button.
- Select the operating system of the server on which you wish to install NAT.

The screenshot shows a 'Download' dialog box with a dark blue header and a white body. The header contains the word 'Download' and a close button (X). The body contains the text 'Please accept the terms of service and select operating system.' Below this is a dropdown menu with the text '32 bit Windows XP/Vista/7/8/8.1/10' and a downward arrow. At the bottom, there is a checkbox that is checked, followed by the text 'I have read and agree to the [End User License/Service Agreement.](#)'

- Click 'Download' to get the tool

Next, transfer the setup file to your server and install. For more details on how to install and use the application, see <https://help.comodo.com/topic-289-1-783-10053-Introduction-to-Network-Assessment-Tool.html>.

Comodo Cleaning Essentials

Comodo Cleaning Essentials (CCE) is a set of computer security tools designed to help users identify and remove malware and unsafe processes from infected Windows computers. CCE is a portable application which requires no installation.

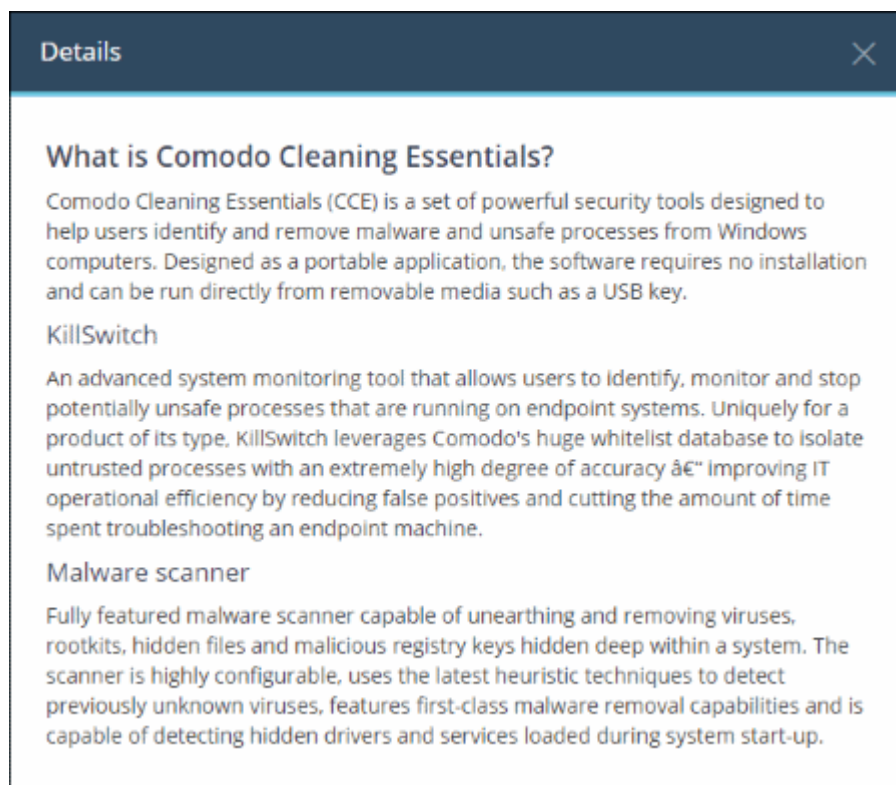

Major features include:

- **Malware scanner** - Fully customizable scanner capable of unearthing and removing viruses, rootkits, hidden files and malicious registry keys hidden deep in your system.
- **KillSwitch** - an advanced system monitoring tool that allows users to identify, monitor and stop any unsafe processes that are running on their system.
- **Autorun Analyzer** - An advanced utility to view and handle services and programs that were loaded when your system booted-up.

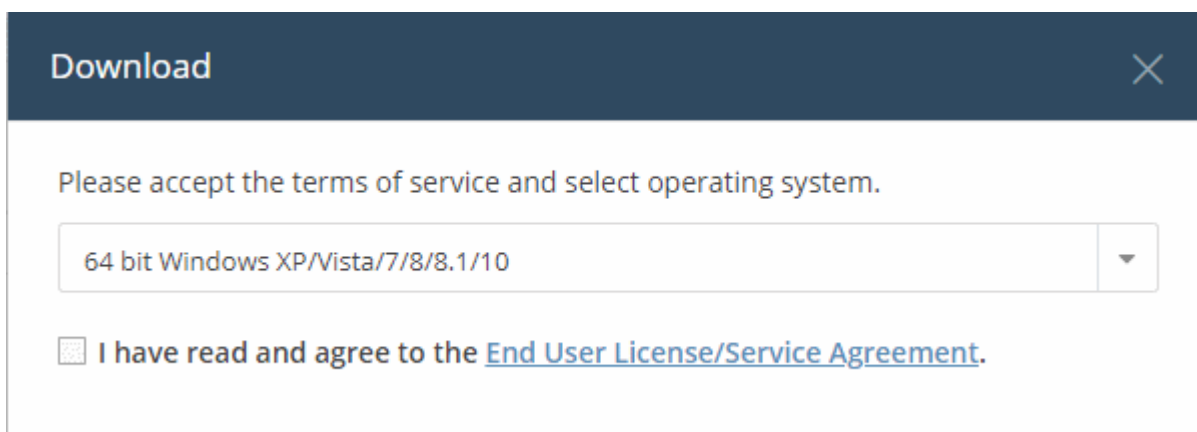

For more details on using the application, see <https://help.comodo.com/topic-119-1-328-3516-Introduction-to-Comodo-Cleaning-Essentials.html>.

To download CCE

- Click 'Tools' in the top-menu
- Click the 'Info' button in the 'Comodo Cleaning Essentials' tile to view a description of the product:

- Click the 'Download' button

- Windows version - select the version appropriate to the endpoints on which you want to use CCE.
- Click the 'End User License/Service Agreement' link, read the EULA fully and select the check box to agree to it. The 'Download' button will appear after you agree to the EULA.
- Click 'Download' to get the tool.

For more details on using the application, see <https://help.comodo.com/topic-119-1-328-3516-Introduction-to-Comodo-Cleaning-Essentials.html>.

Unknown File Hunter Tool

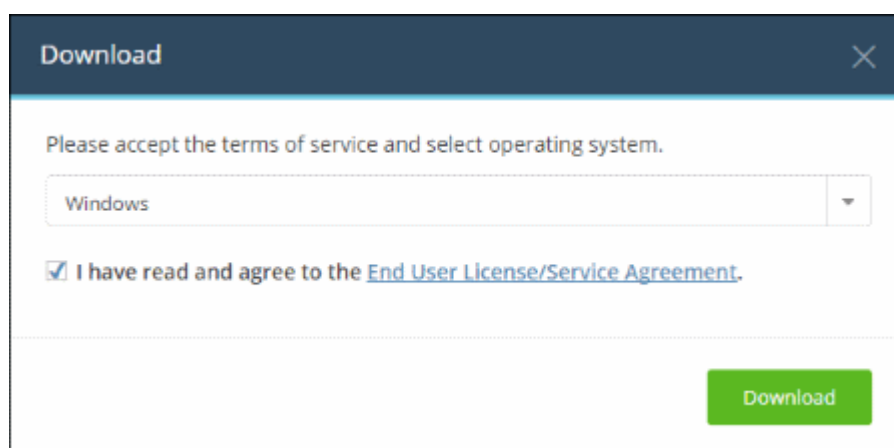

- Unknown File Hunter (UFH) is a lightweight scanner which identifies unknown, potentially malicious, files on your network.
- After scanning your systems, it classifies all audited files as 'Safe', 'Malicious' or 'Unknown'.
- 'Safe' files are OK and 'Malicious' files should be quarantined or deleted.

- 'Unknown' files are those which cannot be classified as 'safe' or 'malicious'. All viruses and zero-day threats start life as an 'Unknown' file.
- UFH lets you upload these files to our Valkyrie servers for analysis. Valkyrie tests unknown files with a battery of run-time tests to reveal whether or not they are harmful. You can view the results of these tests in the UFH interface.

For more details about using the application, see <https://help.comodo.com/topic-400-1-794-10426-Introduction-to-Comodo-Unknown-File-Hunter.html>

To download the UFH tool

- Click 'Tools' in the top-menu
- Locate the 'Unknown File Hunter' tile
- Click the 'Download' button.
- Select the operating system of the server on which you wish to install the tool.
- Agree to the terms and conditions
- Click 'Download'

- Click the 'End User License/Service Agreement' link, read the EULA fully and select the check box. The 'Download' button will appear after you agree to the EULA.
- Choose your operating system from the drop-down. Currently only 'Windows' is supported.
- Click 'Download'

For more details about using the application, see <https://help.comodo.com/topic-400-1-794-10426-Introduction-to-Comodo-Unknown-File-Hunter.html>

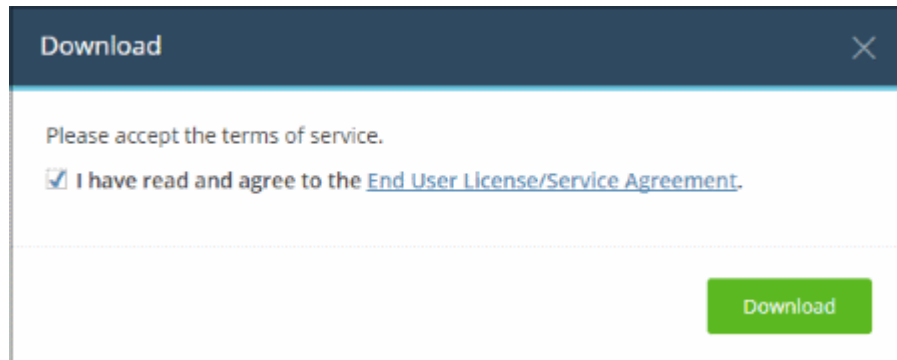

Auto Discovery and Deployment Tool

- Remotely deploy applications to multiple endpoints via Active Directory, Workgroup or IP address/IP range/host name.
- The utility can be used to remotely install .exe, .msi or .mst packages.
- ADDT is a portable app which does not require installation. Simply double-click on ADDT.exe to run the application.

To download the Auto Discovery and Deployment tool

- Click 'Tools' in the top-menu
- Locate the 'Auto-Discovery and Deployment' tile
- Click the 'Download' button

- Agree to the terms and conditions
- Click 'Download':

Download

Please accept the terms of service.

I have read and agree to the [End User License/Service Agreement](#).

Download

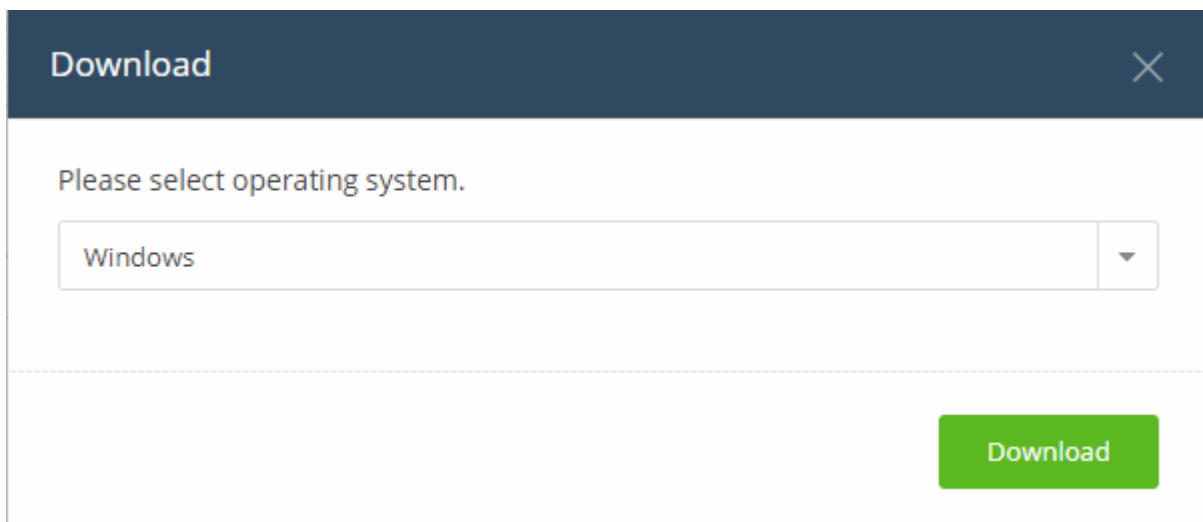

- Simply open the file to run the application - no installation is required.

Remote Control by ITarian

- Remotely access Windows and Mac endpoints enrolled to Endpoint Manager.
- From here, you can solve issues, install third party software, run system maintenance and more.

To download the remote control tool

- Click 'Tools' in the top-menu
- Locate the 'Remote Control' tile
- Click the 'Download' button.
- Select the operating system of the admin computer on which you wish to install the tool.
- Click the 'Download' button:

Download

Please select operating system.

Windows

Download

For more details about using the application, see <https://help.comodo.com/topic-399-1-786-12348-Download-and-Install-the-Remote-Control-Tool.html>.

11 Manage your Account

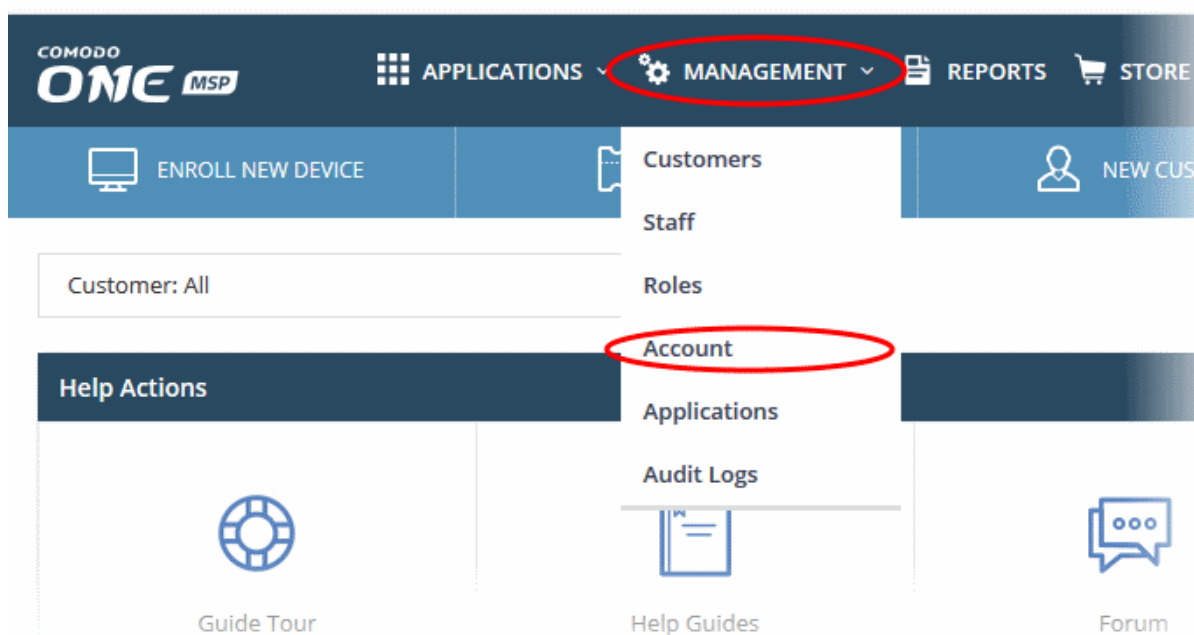

- Click 'Management' > 'Account'

The account area lets you manage the following items:

- Account Details - Company contact and support information. Manage your company logo.
- License Details - Manage your Comodo One licenses. Link other Comodo Accounts Manager (CAM) or Comodo One accounts to your account and share product licenses.
- Account Security - Set up two-factor authentication for additional login security.
- Remote Access Support – Enable Comodo One sales engineers to access your account for support.

To open the 'Account' interface

- Click 'Management' > 'Account':

The interface has four tabs:

- **Account Details**
- **Comodo One License Account Details**
- **Account Security Details**
- **Remote Access Support**

11.1 Update Account Details and Customize Reports

- Click 'Management' > 'Account' > 'MSP/Enterprise Account Details'
- The account details page lets you edit company information and personalize your reports.

To open account details

- Click 'Management' > 'Account'
- The interface will open at the 'Account Details' tab by default:

The screenshot shows the 'MSP Account Details' page in the Comodo One administrator interface. The page title 'MSP Account Details' is circled in red. The page contains a form for editing account details, including fields for Company Name, Contact Email, Country, State, Postal Code, Street Address, Phone Number, Support Email, and Support Phone Number. There is also a logo upload section and a rich-text editor for notes. A 'Save Changes' button is at the bottom.

Your Account

- Edit details about your company, including name, address, contact email and phone number.
- Add any notes in the rich-text editor at the bottom.
- Click 'Save Changes' to apply your mods.

Customize Reports

Comodo One reports contain a logo in the header and support/contact details in the footer. This section lets you provide the logo and support details shown in these reports.

- The Comodo One logo is shown on reports if you don't upload your own.
- The footer is blank if you don't supply support/contact details.

To customize reports

- Click 'Management' > 'Account'
- Click the 'MSP/Enterprise Account Details' tab

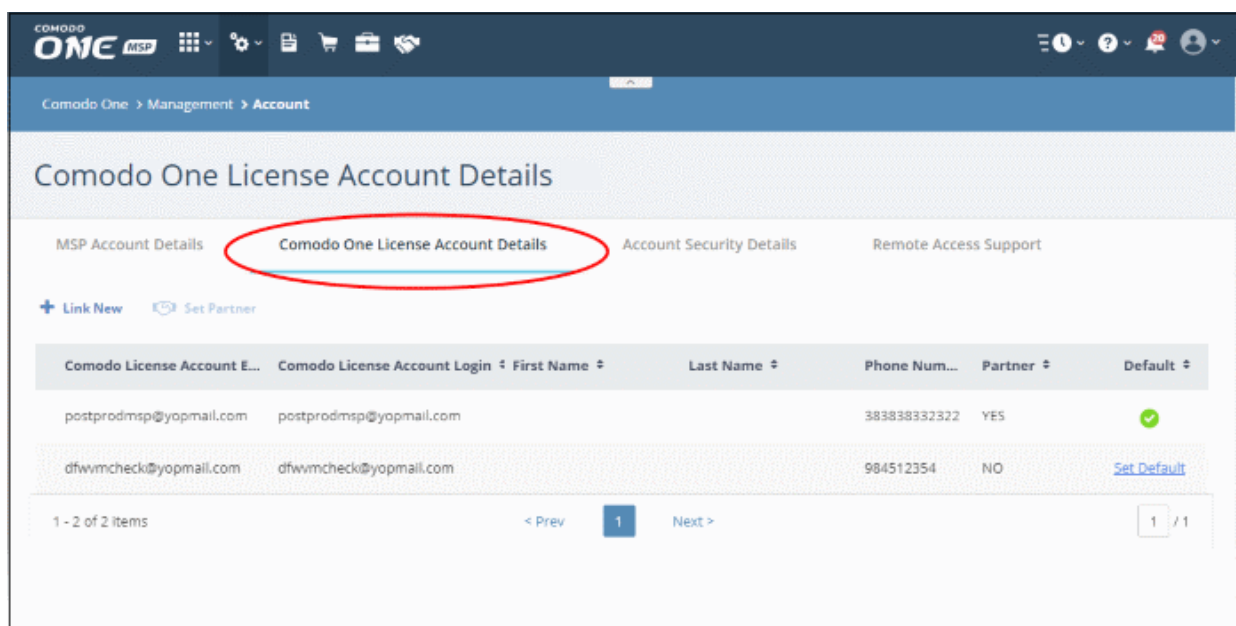

- Click the 'Upload' button then browse to the image file you want to use. Images should be .png or .jpg format with a resolution of 160x120px.
- Enter your support email and phone number in the respective fields
- Click 'Save Changes'

11.2 Comodo One License Account Details

- Click 'Management' > 'Account' > 'Comodo One License Account Details'
- This tab lists all Comodo One / Comodo Accounts Manager (CAM) accounts that you have linked to your account.
- **Link New** - Associate another CAM or Comodo One account with this account. This lets you share licenses and funds with the other account. CAM is the management portal used by our customers and partners to track orders and purchase licenses. A CAM account is automatically created when you subscribe to Comodo One. You can log in to CAM directly at <https://accounts.comodo.com/login>.
- **Set Partner** - MSP account holders can also become Comodo One partner to resell Comodo/ITarian products. Partners get discounted rates on all subscription-based services. These include endpoint security, web security, data backup and network monitoring and protection.

To open the license account details

- Click 'Management' > 'Account'
- Select the 'Comodo License Account Details' tab

Comodo One License Account Details - Table of Column Descriptions

Column Header	Description
Comodo License Account Email	The email address associated with the linked CAM/Comodo One account.
Comodo License Account Login	The username of the CAM/Comodo One account.
First Name	First name of the account holder.
Last Name	Last name of the account holder.

Phone Number	Contact number provided for the account.
Partner	Indicates whether the account is a Comodo partner.
Default	Indicates whether the account is set as default for purchasing licenses for your account. Please note you can assign only one CAM account at a time as default account. See Set a CAM/Comodo One account as default for more details.

- You can navigate to different pages by clicking 'Next', 'Prev' or the page number at the bottom.

The following sections explain how to:

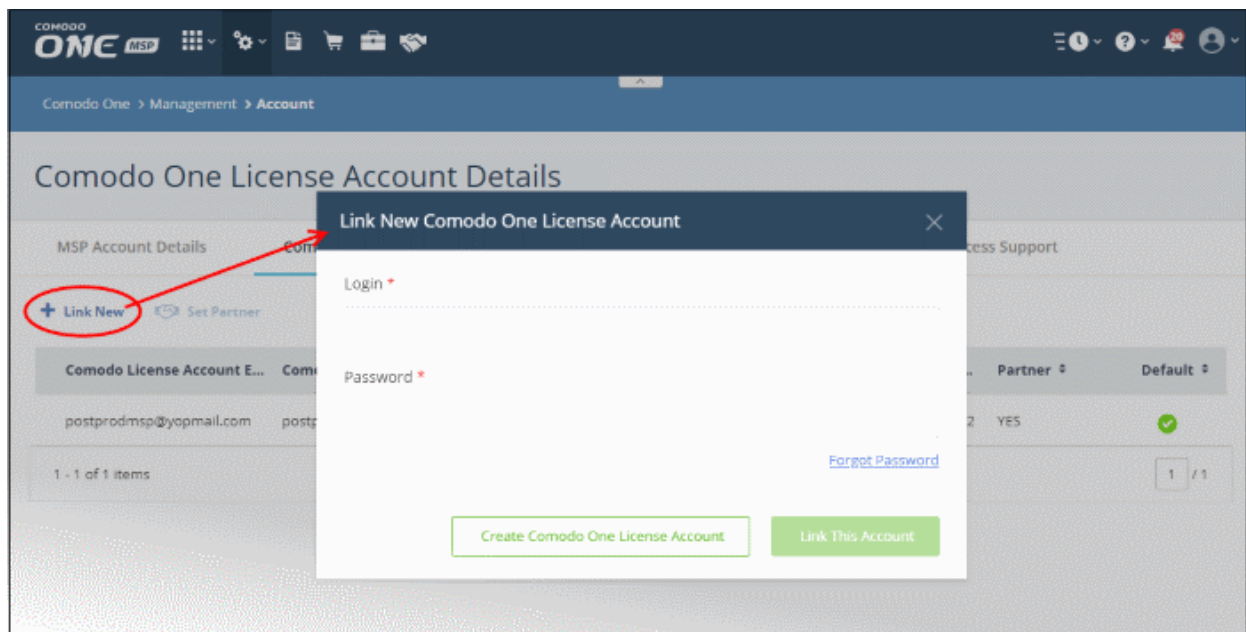

- Link a CAM account to your Comodo One account**
- Set a CAM / Comodo One account as default**
- Set an MSP account as Comodo Partner**

Link a CAM account to your Comodo One account

- A Comodo Accounts Manager (CAM) account was automatically created when you subscribed to Comodo One. This is designated as the 'default' account.
- You can link other accounts to the current account. The current account can then use any product licenses held in the other account.
- You can also create new CAM accounts from here link them with Comodo One automatically.

To link a CAM account,

- Click 'Management' > 'Account'
- Select the 'Comodo License Account Details' tab
- Click 'Link New' at the top right

- Enter the CAM / Comodo One account login credentials and click the 'Link This Account' button. The account will be added and listed in the table.

To create a new CAM / Comodo One account

- Click 'Management' > 'Account'
- Select the 'Comodo One License Account Details' tab
- Click 'Link New'

The 'Link New Comodo One License Account' dialog opens.

- Click 'Create Comodo One License Account'

The account setup form will open:

The screenshot shows a dialog box titled "Setup Comodo One License Account Details" with a close button (X) in the top right corner. The form contains the following fields:

- Email ***: A text input field.
- Password ***: A text input field.
- Company Name ***: A text input field.
- Phone Number ***: A text input field.
- Country ***: A dropdown menu.
- State or Province**: A dropdown menu.
- Postal Code ***: A text input field.
- Submit**: A green button at the bottom right.

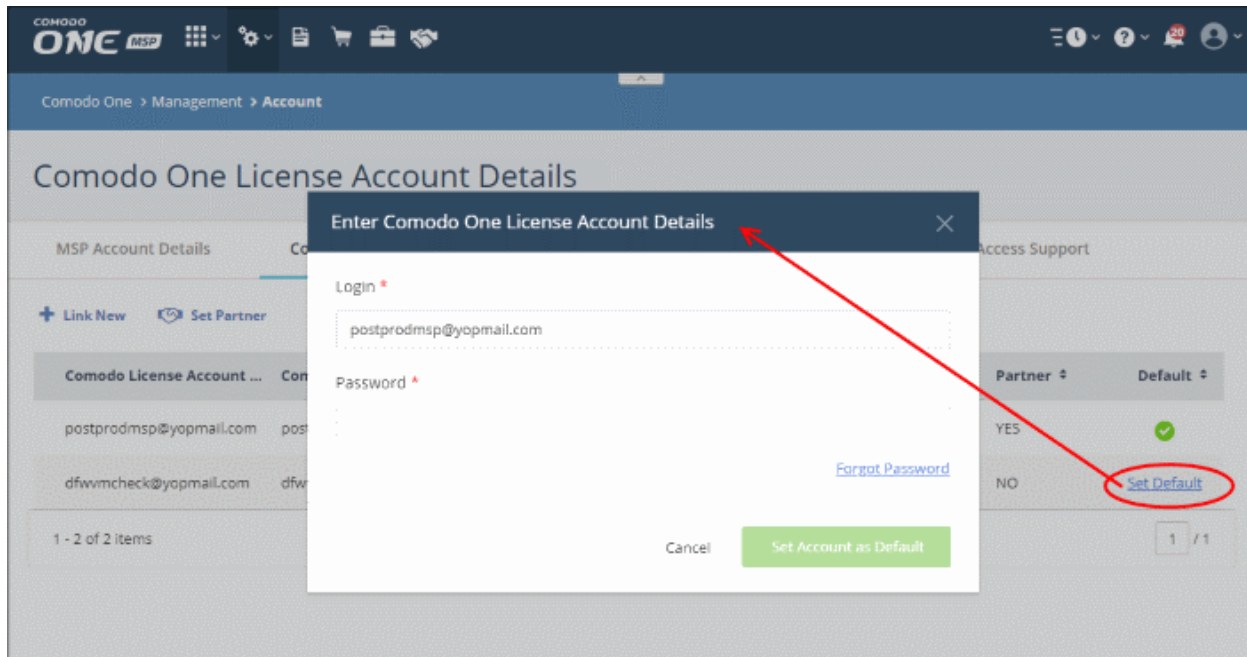

- **Email** - A valid email address to be associated with the new account.
- **Password** - Password for the CAM account.
- **Company Name** - The name of the company for which you want to create a new CAM account. This company name needn't necessarily correspond to a Comodo One company name.
- **Phone Number** - Enter your contact phone number
- **Country** - Select your country from the drop-down
- **State or Province** - Select the state/province from the drop-down
- **Postal Code** - Enter the zip/post code of the area
- Click the 'Submit' button

The newly created CAM account is added to the list. You can login to your CAM account at <https://accounts.comodo.com/login> and subscribe for Comodo / ITarian products. Make sure you set this as the default CAM account.

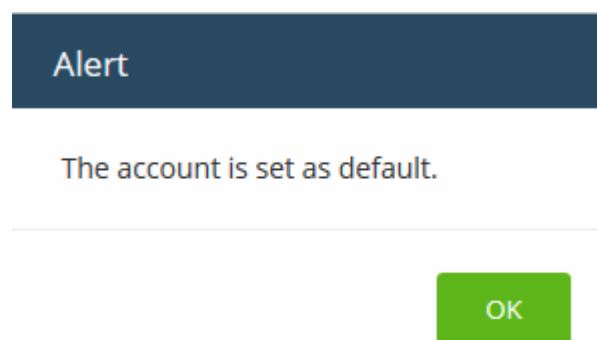

Set a CAM / Comodo One account as default

You have to set an account as 'default' to use licenses in another CAM / Comodo One account:

- Click 'Management' > 'Account'
- Select the 'Comodo One License Account Details' tab
- Click the 'Set Default' link beside the account you want to set as default

- Enter the password of the current default account and click 'Set Account as Default'.

- Click 'OK'

The selected CAM \ Comodo One account will be now set as default.

Set an MSP account as Comodo Partner

An MSP company in Comodo One can also become a Comodo partner. This brings a host of benefits, including discounted purchase prices for Comodo products and more. Purchased products can then be re-sold to your customers. Please note this feature is available to Comodo One MSP accounts only.

MSPs can add partner functionality in two ways:

- By clicking the 'Partner'  button at the top of the interface. This button will be available if the default account is not already a partner.
- By selecting an account in 'Comodo One License Account Details' then clicking 'Set Partner' at top right.

The difference is that the former method automatically selects the default account while the latter lets you choose a non-default account to be become a partner.

5. **Conclusion**

Congratulations!

You have successfully requested to becoming a Comodo One MSP Partner.

Once your partnership has been approved, you will receive an email notification and also a new **"Partner"** icon in your **Comodo One MSP Toolbar** will appear. This icon will direct you to your partnership/reseller portal.

A **Partnership Success Manager** will be in contact with you to go over your Partnership/Reseller Portal, your discount rates and provide you with a demonstration on how to utilize it.

Your initial starting discount percentage rate will be 5%. If you would like to add funds to your partnership portal to change your discounted percentage rate, and select a pricing band, please call +1 973 859 4000 x 3025 during 9 a.m. - 6 p.m. EST or email C1-sales@comodo.com.

Please contact with your account manager to discuss and set up your discount structure.

If you don't know your account manager contact details, you can call +1 973 859 4000 x 3025.

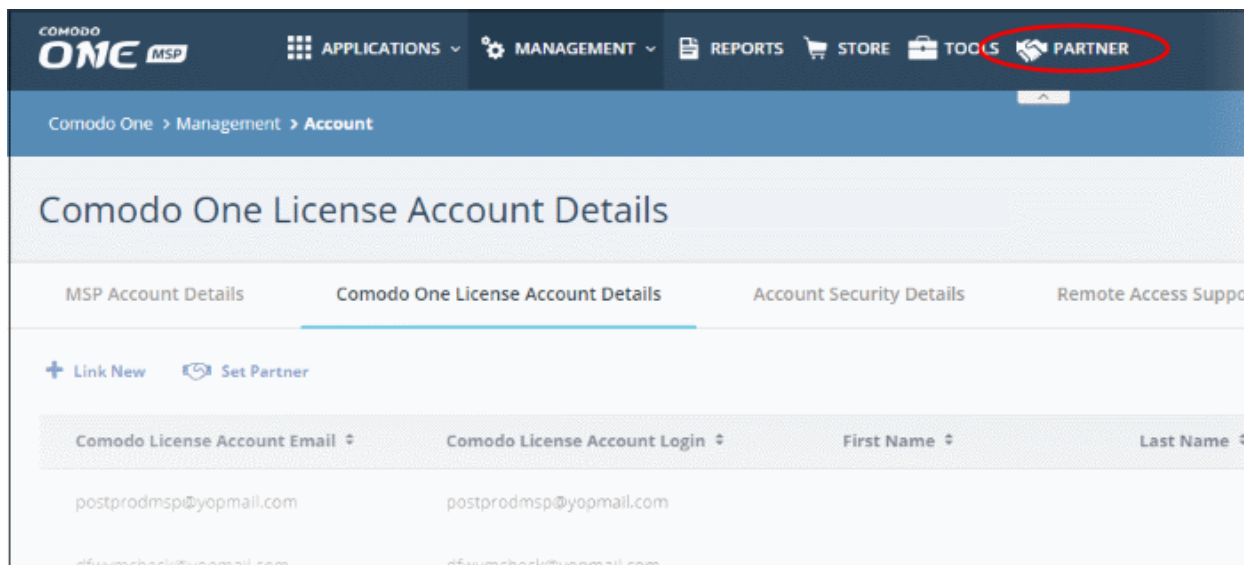

Finish

- Click 'Finish'

The application will be submitted to Comodo for approval. A status of 'Pending' will be shown in the 'Partner' column during this time. The status will change to 'Yes' after your account has been approved. A 'Partner' link will also appear on the file menu.

- The 'Partner' link leads to <https://accounts.comodo.com/login>

Partners can login and manage their account at <https://www.comodo.com/login/comodo-members.php>

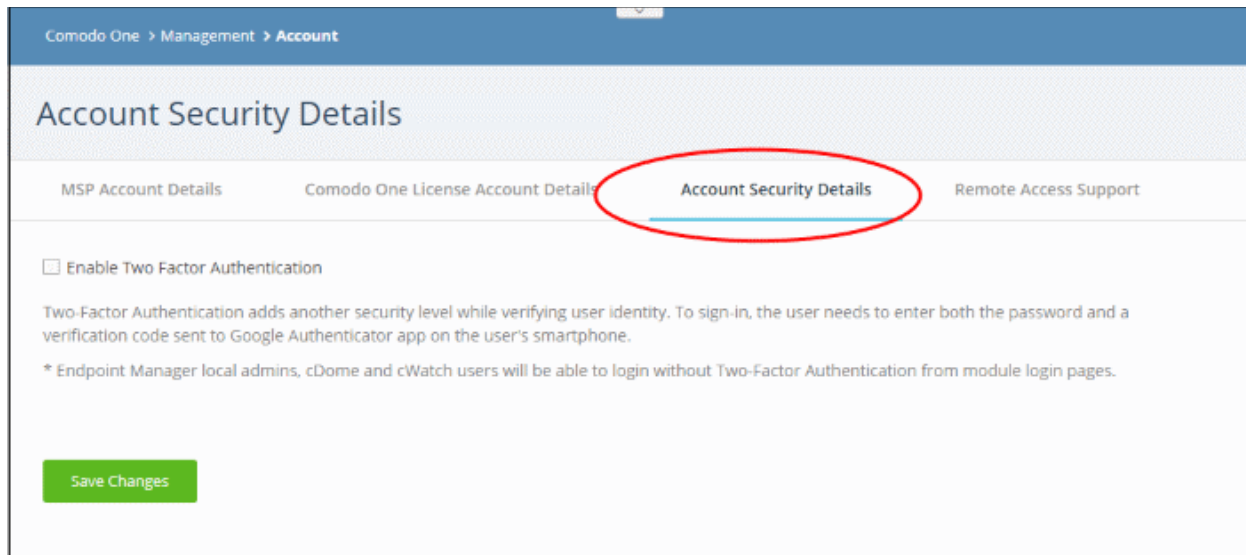

- Once an MSP has become a partner, Comodo products will be available at discounted prices which can be sold to their customers via the portal at <https://accounts.comodo.com/reseller/management>.
- See our reseller guide at <https://help.comodo.com/topic-211-1-725-8860-The-Reseller-Portal.html> for help to manage your reseller account.
- The discounted prices will also be available when purchasing products via the Comodo One Store. See the **App Store** and its sub-sections for more details about subscribing for Comodo products.

11.3 Set up Two-Factor Login Authentication

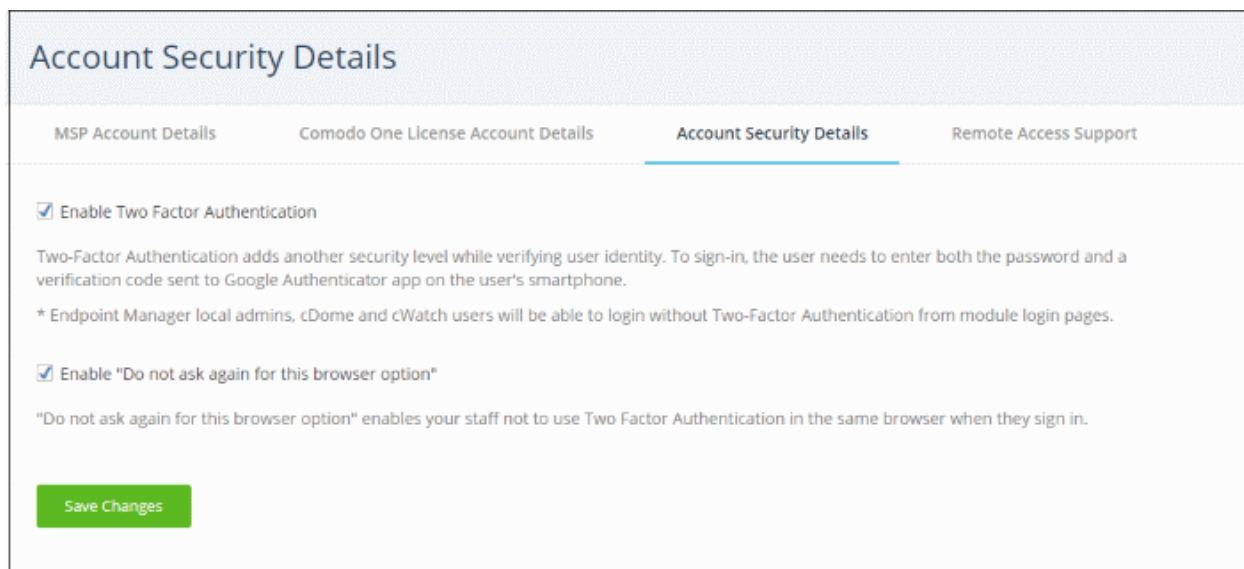

- Click 'Management' > 'Account' > 'Account Security Details'
- Two-factor authentication adds additional security by requiring staff to present two forms of authentication before they can login to Comodo One.
 - They need to enter their regular UN/PW + a unique code sent to their mobile device.
- Enabling the feature means all users on the account will be taken through the two-factor setup process the next time they login.
- Setup involves installing the Google Authenticator app on staff mobile devices. Each member of staff must pair their device with Comodo One to obtain the verification codes. Guidance on this is available in **Pair an Authentication Device**.
- To login, staff will enter a unique code generated by the app as well as their username and password. The verification code changes frequently.
- If allowed by an admin, staff have the option to disable two-factor authentication for future logins using their current browser. They will need to pass two-factor authentication again if they login using a different browser OR if they login from a different computer.

To configure two-factor authentication

- Click 'Management' > 'Account'
- Select the 'Account Security Details' tab
- Select 'Enable Two Factor Authentication'

You can then choose whether staff can skip two-factor authentication on subsequent visits:

- "Do not ask again for this browser option" - If enabled, staff members will be allowed to disable two-factor checks on future visits from their current computer using their current browser. The option is offered after their first successful login. See [Login using Two Factor Authentication](#) for more details.
- Click 'Save Changes'.

The 'Two-Factor Authentication' dialog opens to pair your device and setup two factor authentication:

- Click 'Configure Later' to setup two factor authentication during the next login
- Click 'OK' to setup the process now. Clicking 'OK' will log you out immediately and ask you to login again to continue the process.

Pair an Authentication Device

- Admins and staff should pair their authentication device for two factor authentication when they login to Comodo One for the first time.
- The following message will appear on first login after enabling two factor authentication:

- Click 'Configure My Authenticator' to start the configuration process:

Enable Two-Factor Authentication

[Logout](#)

An authenticator app works by generating a new security code every 30 seconds. Once you have an authentication app installed on your smart phone and paired with your account, you can always get a code - even if you have airplane mode turned on, or are anywhere without cell service. You can use Google Authenticator for configuration.

Just a few simple steps, and you'll be all set

Step 1

Please download Google Authenticator app on your smart device and open it.

Step 2

Scan this QR-code

Open authentication app and:

- tap the '+' icon in the top-right of the app
- scan the image to the left, using your phone's camera

[I can't scan the QR-code](#)

Step 3

Enter Verification Code

Once the QR-code above is scanned, enter the 6-digits verification code generated by the app

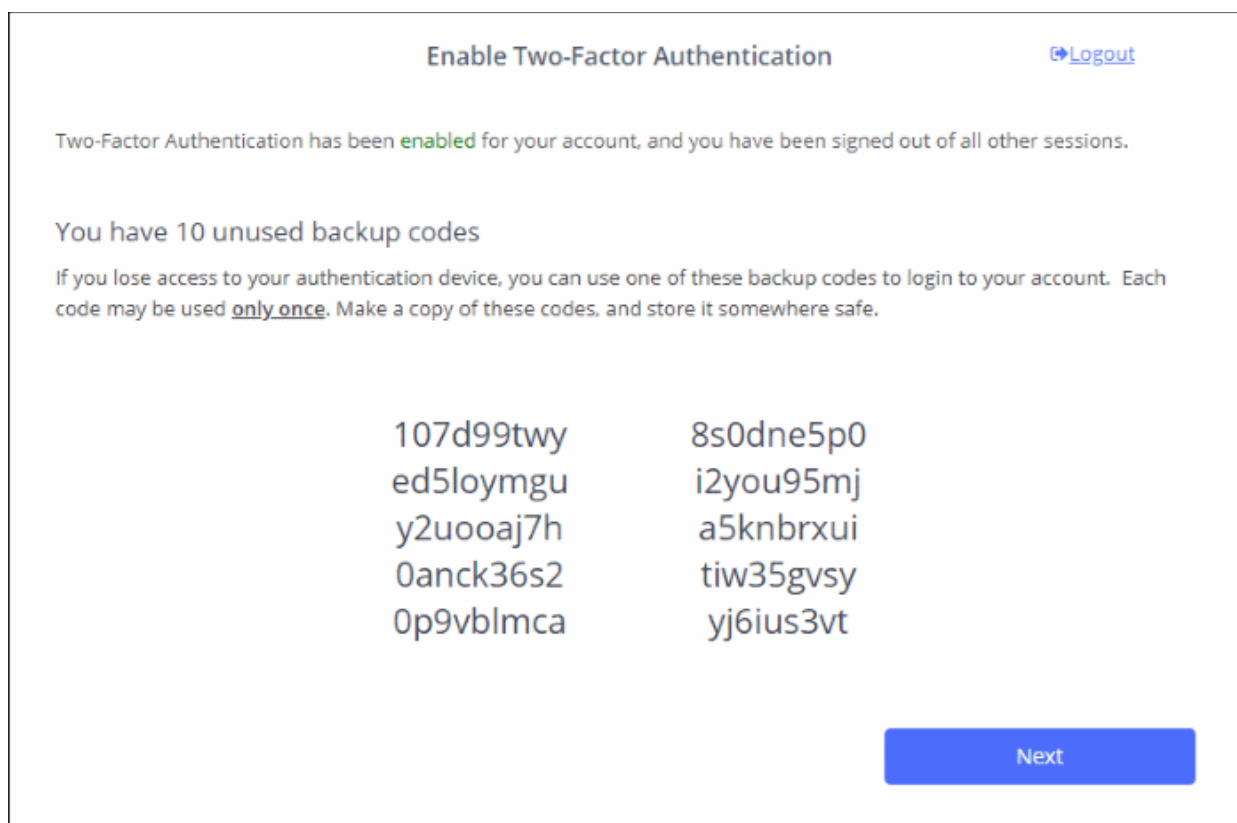

Code generated by app

Pair

- **Step 1** - Download the 'Google Authenticator' app and install it on your iOS or Android device.
 - Open the 'Authenticator' app and tap the '+' icon'
- **Step 2** - Scan the QR code with the device camera. This will cause the Google app to generate the 6 digit code you need to complete pairing.
 - 'I can't scan the QR code' – Click this to reveal the token if you cannot use the QR code. You should manually type the token into the Google Authenticator app.

- **Step 3** – After completing steps 1 and 2, a six digit authentication code is generated in the Google app. This code changes frequently and is unique to your account.
 - Enter the verification code in the field provided on the form.
- Click 'Pair'
- A success message is shown along with 10 backup codes.
- You can use the backup codes to complete two-factor authentication if you do not have the authentication device with you. Please make a copy of the codes. Each code can only be used once.

Note: You can generate a new set of codes at any time. To do so:

- Click 'Login name' > 'Settings' > 'Two-Factor Authentication'.
- Click 'View Backup Codes' then 'Generate New Codes' at the bottom.
- Your old codes will expire after you have generated the new codes.

For more details, see **reset two-factor configuration and regenerate backup codes** in **Configuring C1 Settings**.

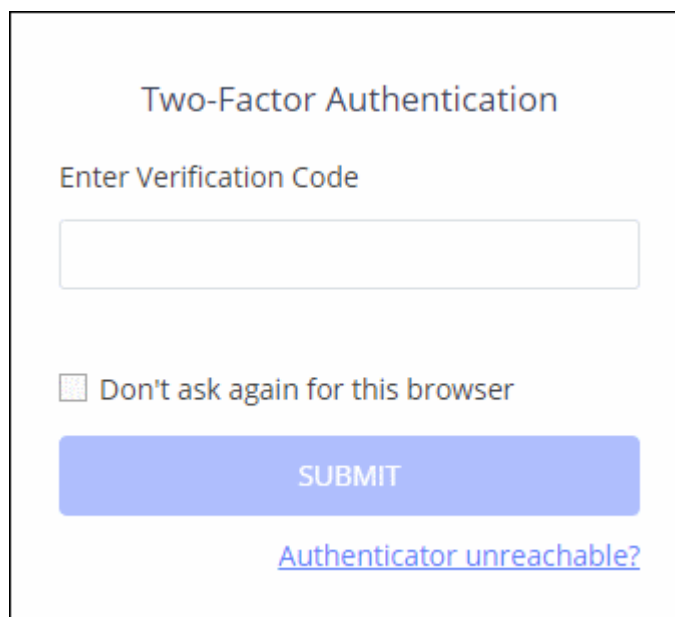

- Click 'Next'. You will be logged in to your account.

Two-factor authentication is now configured.

- All users (new and existing) need to follow the two factor setup process described above the next time they login.
- On all subsequent logins, users need to open the Google Authenticator app on their mobile device, collect their new verification code and enter it at the Comodo One verification screen.
- If the account admin resets two-factor authentication for a user, he/she will need to go through the setup process again. See '**Manage Admins and Staff**' to find about resetting two-factor authentication.

Login using Two Factor Authentication

The 'Two-Factor Authentication' dialog is shown after staff have entered their username and password:

Two-Factor Authentication

Enter Verification Code

Don't ask again for this browser

SUBMIT

[Authenticator unreachable?](#)

- **Enter Verification Code** - Open the Google Authenticator app on your paired device and enter the displayed code. Please note that the code changes frequently. See earlier in this section if you have not yet paired your authentication device.
- **Don't ask again for this browser** - Select if you want to disable two factor authentication on future visits.
 - The two factor authentication dialog will not appear in future when using the current browser and endpoint.
 - You will be asked for a verification code again if you login from another computer or if you login using a different browser. You will also be asked for a code if you clear your browser's history/cache.

Note: 'Don't ask again for this browser' will only appear if enabled by an admin in 'Management' > 'Account' > 'Account Security Details'.

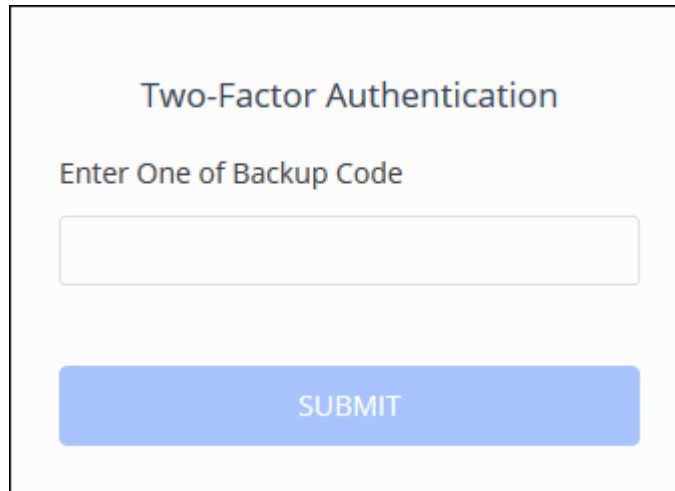

- Click 'Submit'

Use Backup Codes

Comodo One Two Factor Authentication allows you to use your backup codes in case you do not have your authentication with you during a login attempt.

To login using a backup code

- Click 'Authenticator unreachable?' link in the 'Two Factor Authentication' dialog

Two-Factor Authentication

Enter One of Backup Code

SUBMIT

- Enter a code from the backup you saved when you paired your device
- Click 'Submit'

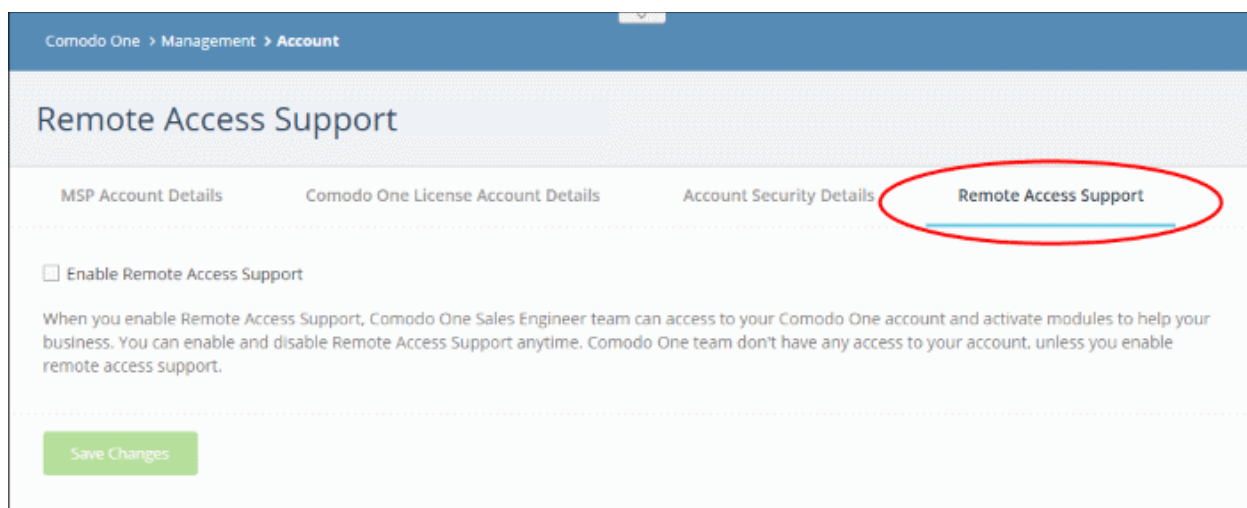

After successful verification you will be logged into Comodo One. See [Reset two-factor configuration and regenerate backup codes](#) in [Configuring C1 Settings](#) for more details on backup codes.

11.4 Remote Access Support

- Click 'Management' > 'Account' > 'Remote Access Support'
- You can specify whether or not the Comodo One support team should be allowed to remotely access your Comodo One account.
- Remote access allows us to more effectively troubleshoot any issues you may be having and to activate new modules when required.

To authorize remote access

- Click 'Management' > 'Account'
- Select the 'Remote Access Support' tab

Comodo One > Management > Account

Remote Access Support

MSP Account Details Comodo One License Account Details Account Security Details **Remote Access Support**

Enable Remote Access Support

When you enable Remote Access Support, Comodo One Sales Engineer team can access to your Comodo One account and activate modules to help your business. You can enable and disable Remote Access Support anytime. Comodo One team don't have any access to your account, unless you enable remote access support.

Save Changes

- Select 'Enable Remote Access Support'
- Click 'Save Changes'

12 Manage Subscriptions, Usage, Billing and Settings

- Click 'Management' > 'Applications' to open this area.
- Click an application tile to view info about the app in the tabs underneath.

The screenshot shows the 'Applications' management interface. At the top, there are four application tiles: Endpoint Manager, Dome Shield, cWatch, and Dome Secure Web Gateway. Below these, there are four tabs: Subscriptions, Usage, Billing, and Settings. The 'Subscriptions' tab is selected, displaying a 'Subscription List' with a '+ Add New Subscription' button. The list contains three entries, each with an ID, product name, edition, price, trial status, and start date. A details panel on the right shows information for the selected subscription, including the license account username, module name, product name, status, subscription ID, and license key.

ID	Product Name	Edition	Price	Trial	Status	Start Date
6b07e54036	Advanced Endpoint Protection Basic Edition For Comodo ONE	Unlimited	FREE	TRIAL	ACTIVE	10/23/2018
532ab29608	Advanced Endpoint Protection Basic Edition	Unlimited	FREE	TRIAL	ACTIVE	10/25/2018
c52b26c71d	Advanced Endpoint Protection Premium Edition (1-99)	1	Credit Card	PREPAID	ACTIVE	per 12 months

Field	Value
Comodo License Account Username	newstagingc1@yopmail.com
Module Name	Endpoint Manager
Product Name	Advanced Endpoint Protection Basic Edition For Comodo ONE
Status	ACTIVE
Subscription ID	6b07e54036
License Key	59a7fa2e-09b1-41e4-9c2e-326cc4ba6efa
Date	10/23/2018
Period	365 days
Number of Users	Unlimited
Price	\$0.00
Total Price	\$0.00
Payment Type	FREE

The section contains the followings tabs:

- **Subscriptions** - View details of your current licenses and purchase new licenses if required
- **Usage** - Statistics which show how much data has been used by a particular application.
- **Billing** - View payment history and pending payments for each subscribed module
- **Settings** - Configure URLs for the Comodo Dome Firewall Central Manager, Dome Antispam and Dome Data Protection applications.

12.1 Manage Subscriptions

The 'Subscriptions' tab shows details about licenses you have purchased for Comodo One applications. Details include whether the license is active or not, the start date of the subscription, the name of the product and more.

To view and purchase licenses for a Comodo One product

- Click 'Management' > 'Applications'
- Select an application
- Click the 'Subscriptions' tab to view existing licenses for that application.

The screenshot displays the 'Subscriptions' tab for the 'Endpoint Manager' application. The 'Subscription List' table contains the following data:

ID	Product Name	Edition	Type	Duration	Status
6b07e54036	Advanced Endpoint Protection Basic Edition For Comodo ONE	Unlimited	FREE TRIAL	365 days	ACTIVE
532ab29608	Advanced Endpoint Protection Basic Edition	Unlimited	FREE TRIAL	-	ACTIVE
e52825c71d	Advanced Endpoint Protection Premium Edition (1-99)	1	Credit Card PREPAID	per 12 months	ACTIVE

The 'Details' panel for the selected license (ID: 6b07e54036) shows the following information:

Comodo License Account Username	newstagingc1@yopmail.com	Date	10/23/2018
Module Name	Endpoint Manager	Period	365 days
Product Name	Advanced Endpoint Protection Basic Edition For Comodo ONE	Number of Users	Unlimited
Status	ACTIVE	Price	\$0.00
Subscription ID	6b07e54036	Total Price	\$0.00
License Key	59a7fa2e-09b1-41e4-9c2e-326cc4ba6efa	Payment Type	FREE

Each license is shown on a separate row. The following information is available for each license:

Subscription List

- Shows all your licenses for the selected product. Each license row contains basic information such as license name, type, duration, start date and user/endpoint allowance.
- Click a row to view more details about the license.

Details

- Comodo License Account Username - The email ID associated with the account for which the license was originally purchased.
- Module Name - The name of the application.
- Product Name - Indicates the name, duration and user/node allowances covered by the license.
- Status - Whether the license is active or not.
- Subscription ID - The identification number provided for the subscription.
- License Key - License key of the subscribed product.

- Date - The date of subscription.
- Period - The license validity period.
- Number of users - How many end users are covered by the license. This is applicable for products where end users are to be enrolled such as Endpoint Manager.
- Price - The base price of the product.
- Total Price - The total price paid for the product. This depends on the number of users, number of nodes and validity period.
- Payment Type - Indicates how payment was made for the product.

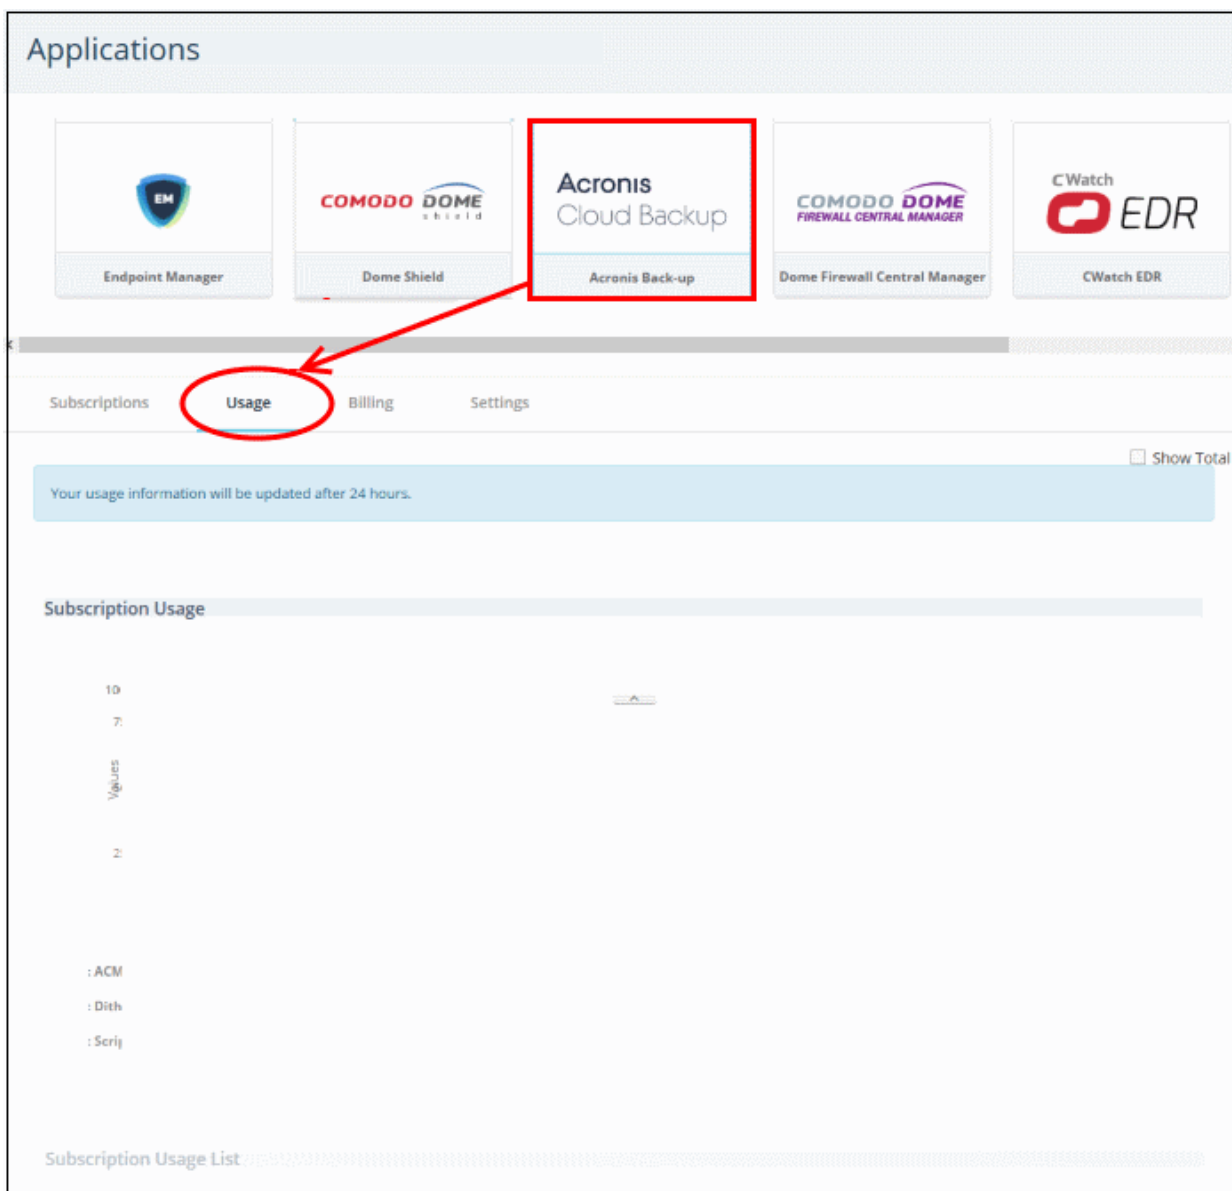

Click 'Add New Subscription' to renew, buy or add new license for the module. See '[App Store](#)' for more details about the license purchase process.

12.2 View Usage Details

- Usage details tell you how much data has been used by each Comodo One module. You can also view how much you have used of your allowed quota.
- For example, Acronis Cloud Backup shows the data used by each Acronis account you have integrated with C1.

To open the 'Usage' screen

- Click 'Management' > 'Applications'
- Select an application
- Click the 'Usage' tab

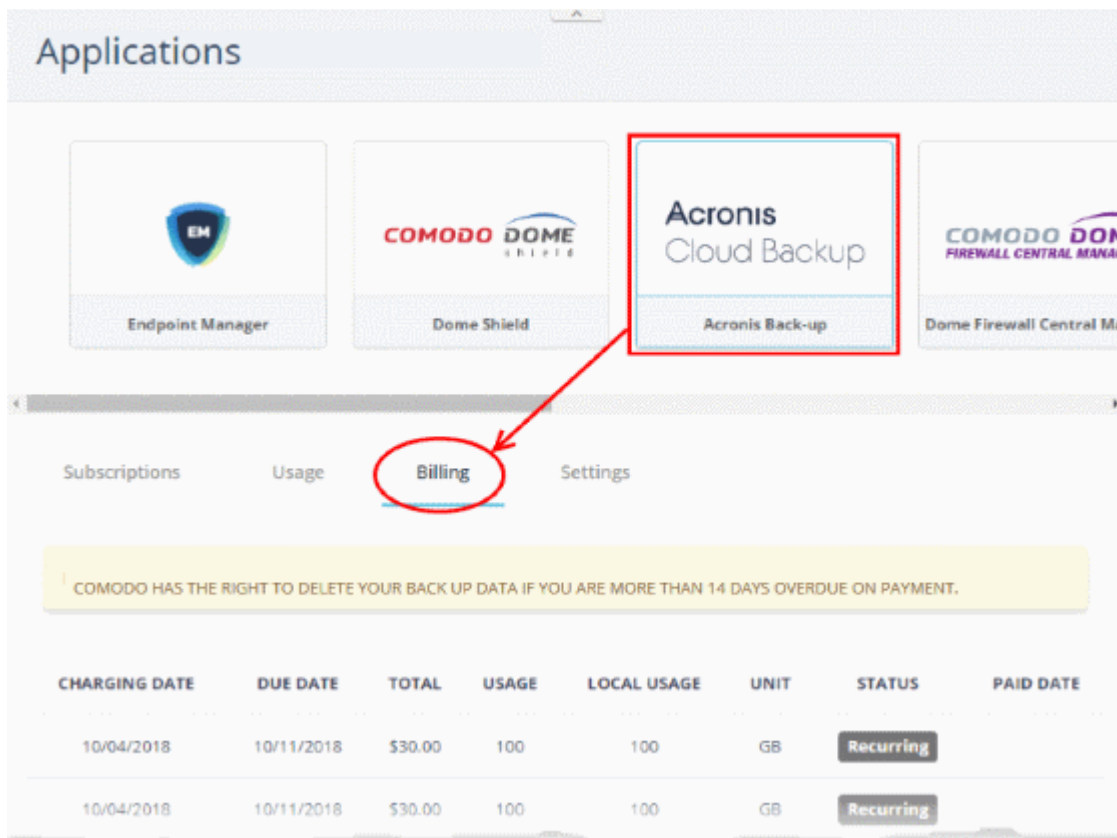

12.3 View Billing Details

The billing tab shows payment information for each product you have purchased on your account.

- Click 'Management' > 'Applications'
- Select an application
- Click the 'Billing' tab

The following image shows the billing details of Acronis Cloud Backup:

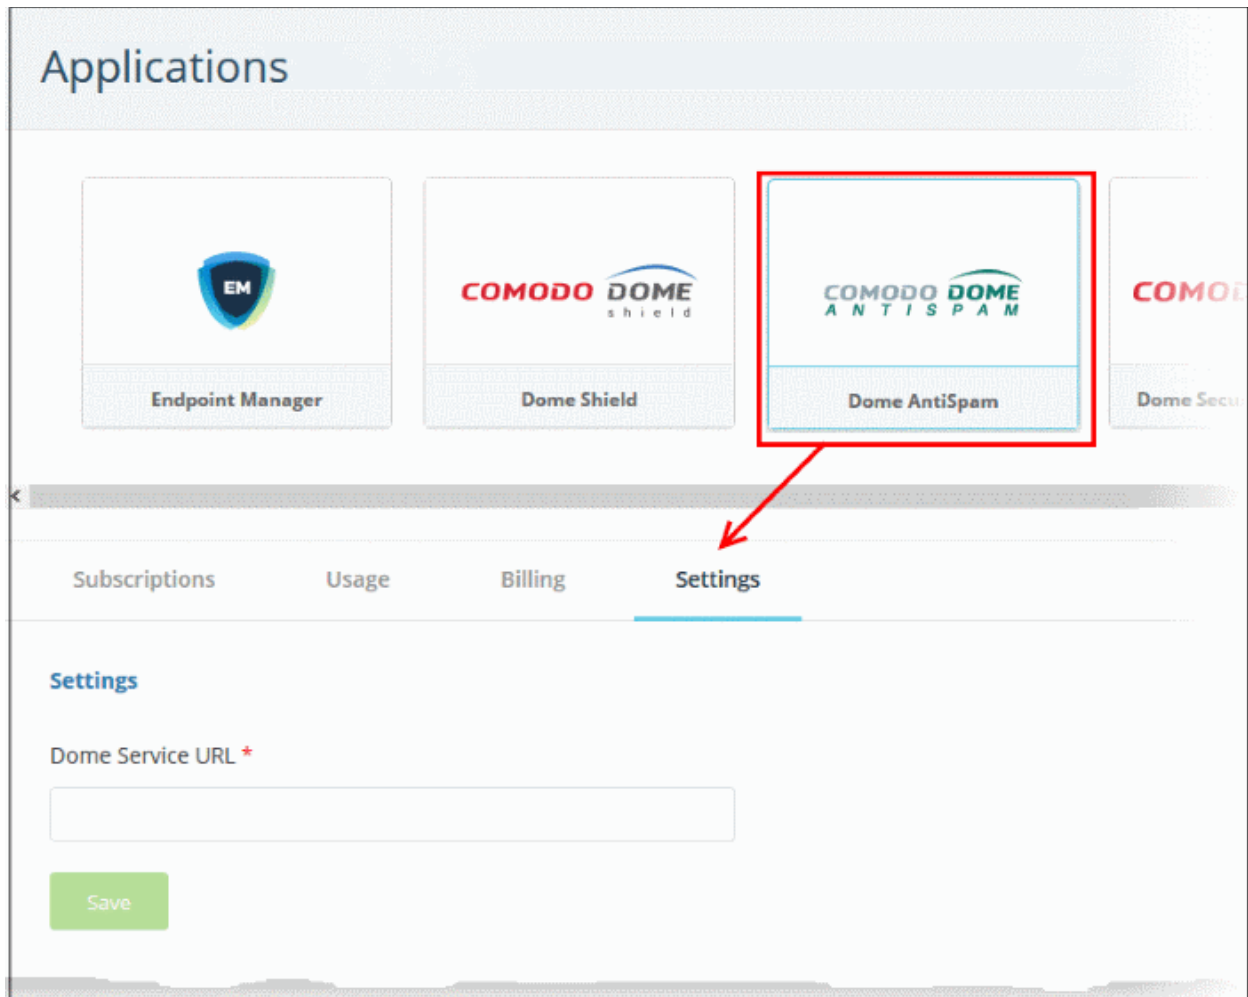

12.4 Configure Dome Service URL Settings

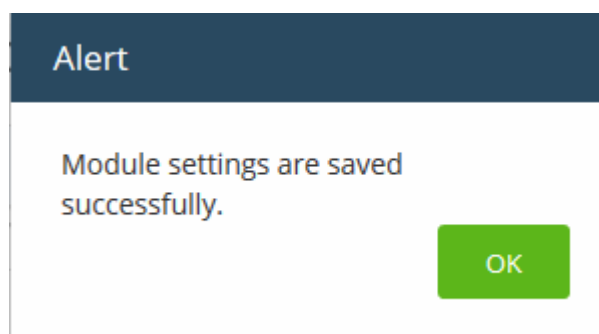

- A service URL is the address where your account is hosted. It is a unique URL for each customer that we set up for you after sign up. We will email this link to you once we have created your instance.
- The settings tab lets you specify the service URLs for Dome Firewall Central Manager, Dome Data Protection, and Dome Antispam. Once done, you can access these applications direct from the Comodo One console.

To enter service URL for Dome applications

- Click 'Management' > 'Applications'.
- Select an application ('Dome Firewall Central Manager', 'Dome Data Protection' or 'Dome Antispam')
- Click the 'Settings' tab.

- Enter the Dome Service URL you received over email
- Click the 'Save' button.

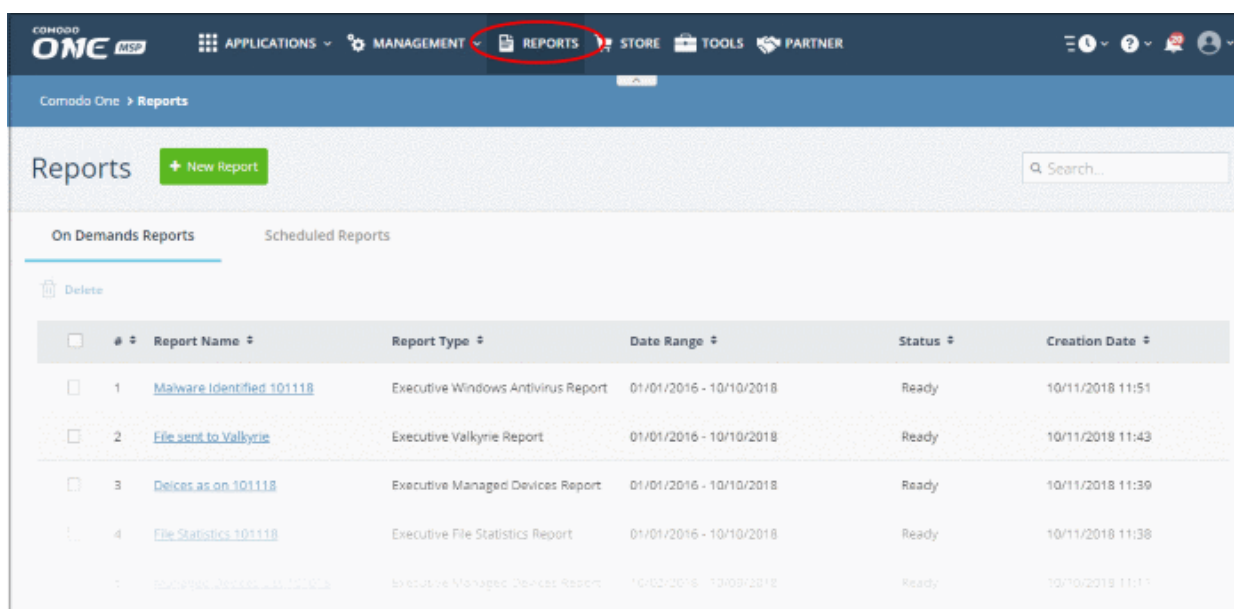

- Click 'OK'
- You can now access the product directly from the 'Applications' menu.

13 Reports

- Click 'Reports' on the menu bar
- The 'Reports' interface lets you generate and view reports on:
 - Service desk tickets
 - Managed devices
 - Malware identified on managed devices
 - Files discovered on managed devices
 - Files submitted to Valkyrie for analysis and their verdicts
- You can generate a report on demand or schedule automatic reports at set intervals

To open the reports interface

- Click 'Reports' on the menu bar

The interface has two tabs:

- **On Demand Reports** - Manually generated reports
- **Scheduled Reports** - These reports are automatically generated at intervals you choose.

Reports List - Column Descriptions	
Column Header	Description
Report Name	Label of the report. You specify the report name when you create the report.
Report Type	Module which the report concerns. For example, 'Executive Ticket Summary Report', 'Executive Managed Devices Report' and 'Executive File Statistics Report'
Date Range / Period	Time period covered by the report.
Schedule	Report frequency. Applies to scheduled reports only.
Status	The current stage of the report.

	<p>On-demand reports may have the following statuses:</p> <ul style="list-style-type: none"> • Waiting - Report is waiting to be added to queue • Requested – Report is queued • In-progress – Report is currently being generated • Ready – Report is available to view and download. • Failed – Comodo One encountered an error when creating the report. <p>For scheduled reports, the possible values are:</p> <ul style="list-style-type: none"> • Active – The report will be generated at the scheduled times. • Inactive – The report schedule is disabled. <p>You can activate or deactivate a schedule using the options at the top. See View and manage report schedules for more details.</p>
Creation Date	Date and time at which the report was generated.

- You can navigate to different pages by clicking 'Next', 'Prev' or the page number at the bottom.
- Click any column header to sort reports based on the column label
- To search for a specific report, enter the name of the report in the search field and click the magnifying glass icon.

The following sections explain how to:

- **Create / Schedule reports**
- **View the reports**
- **View and manage report schedules**

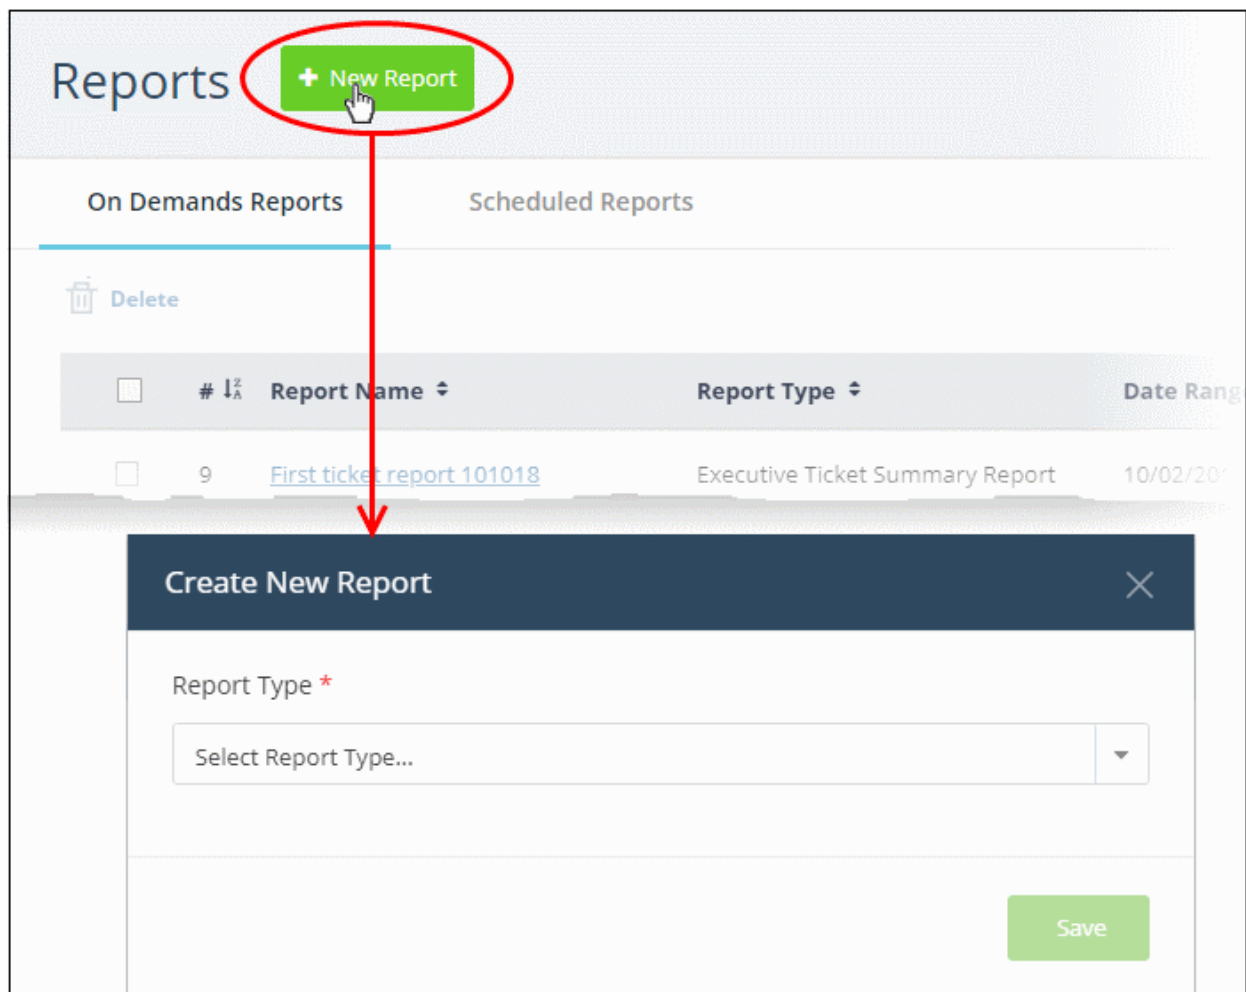

Create a New Report

You can instantly generate reports for a specific period, or create a schedule to generate reports periodically. The reports that can be generated are:

- Executive Managed Devices Report
- Executive Windows Antivirus Report
- Executive Ticket Summary Report
- Executive File Statistics Report
- Executive Valkyrie Report

To generate a report or report schedule

- Click 'Reports' on the menu bar
- Click 'New Report' on the top

- Choose the report type from the options.

The 'Create New Report' dialog appears for the selected report type:

14 Notifications

Comodo One uses in-app notifications to push the latest news about products and updates.

- Click the notifications icon  at the top-right of the interface. The number on the icon shows how many unread notifications you have.

The interface has two tabs:

- **News**
- **Notifications**

News

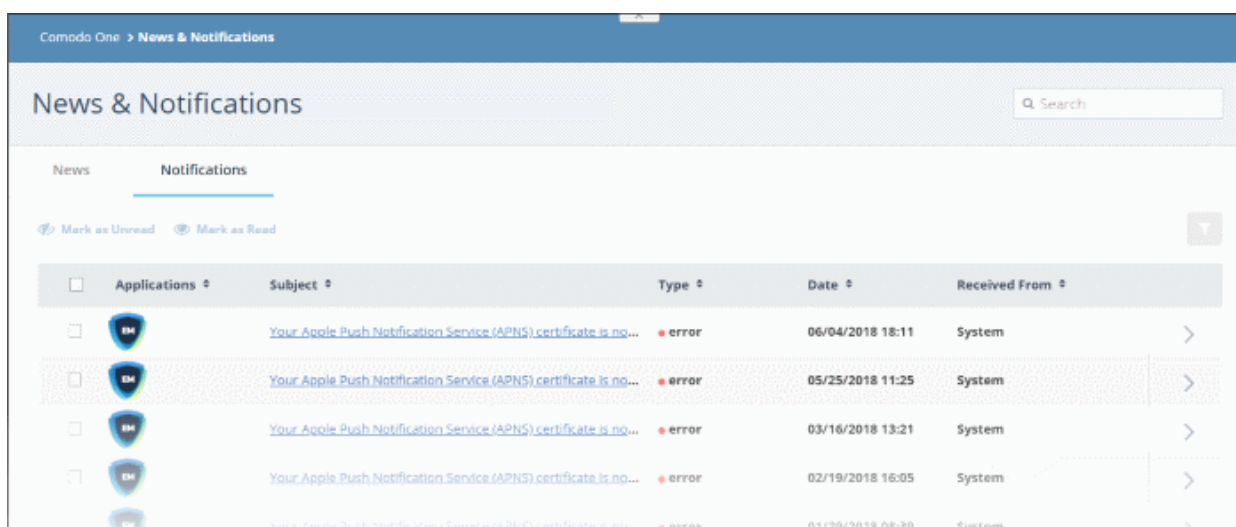

The 'News' tab shows reports posted by the Comodo One team. This includes information about new versions, scheduled maintenance and so on.

- Click anywhere on the news heading to view the complete message:

Notifications

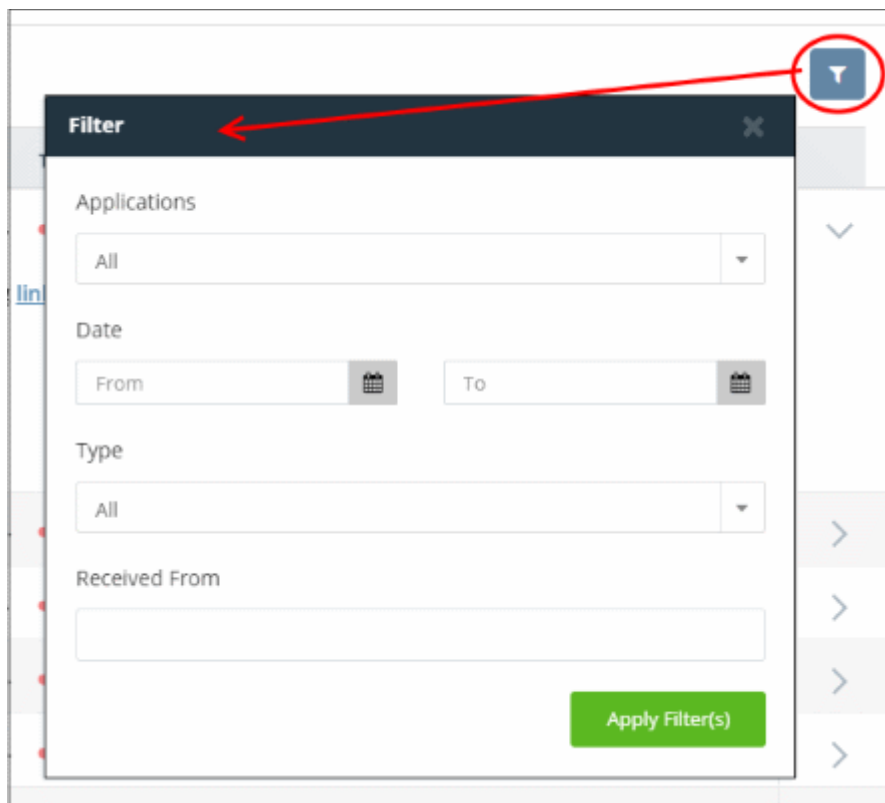

- The 'Notifications' tab shows updates from Comodo One applications .
- Each row contains links to the licensed application's interface where the update information is available.
- For example, if you install the CCS agent on a client's computer, you will be notified when installation is complete. When you click the subject link, you will be taken to the 'Device Details' interface with the 'MSI Installation State' tab open.

- You can navigate to different pages by clicking 'Next', 'Prev' or the page number at the bottom.
- Click the column headers to display the notifications in ascending or descending order
- Click the arrow beside each notification to view detailed information about the notification

Filter

- Click the funnel button at the top-right to open the filter options.

You can use any combination of filters at-a-time to search for specific users.

- To display all the items again, remove / deselect the search key from filter and click 'OK'.

Search Options:

- To search for a specific notification, enter your search criteria like a portion of the subject line or content in the message in the search field and click the magnifier icon.

The notifications that match the search criteria will be displayed in the list.

- To mark a read message as unread, select it and click 'Mark as Unread'
- To mark an unread message as read, select it and click 'Mark as Read'

15 View Audit Logs

- Click 'Management' > 'Audit Logs'

Comodo One stores event logs from the console and Service Desk for up to seven days.

- The log viewer lets you view logs from both Service Desk and the Comodo One console.
- You can filter logs by module and event type.
- You can run simple or complex queries to view specific logs. You can also save queries for repeat searches.
- Logs can be exported to a .csv file for later analysis
- You can customize which columns are shown in the interface.

To view the Audit Logs

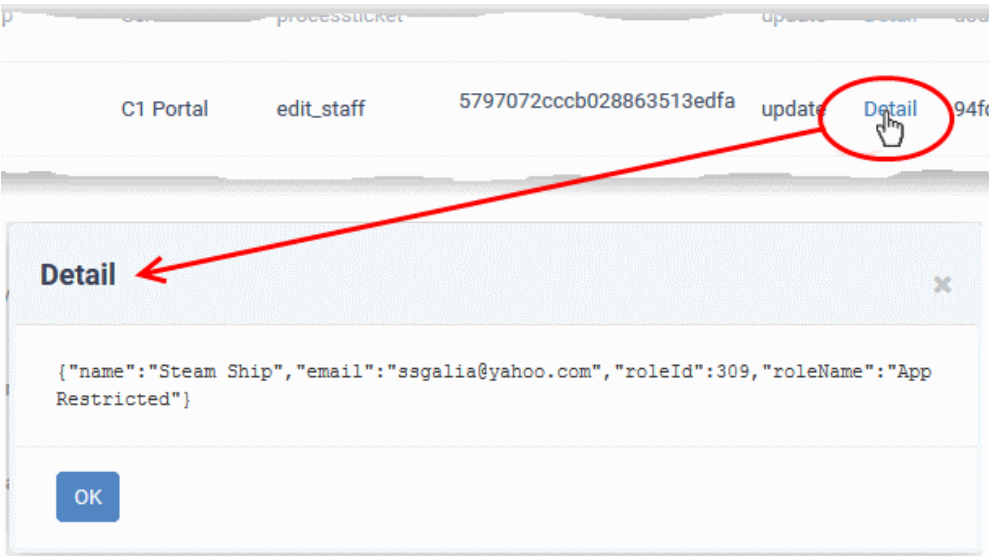

- Click 'Management' > 'Audit Logs'

Audit Data Logs - Table of Column Descriptions

Column Header	Description
Customer	The client company involved in the event. Note: The 'Customer' column is only available for Comodo One MSP customers.
Log Creation Date	Time the log was generated.
Staff	Person who executed the action described in the log.
Component Name	The Comodo One module responsible for the action. Possible values are: <ul style="list-style-type: none"> • Comodo One Portal • Service Desk
Event Name	The label assigned to the event.
Action Type	The activity performed in the event

The following columns can be added to the table by clicking the 'Customize' button at top-right. See **Add/Remove Columns in the Log Viewer** for more details.

Extra Information	Additional details, if any, for the event.
Old Value	<ul style="list-style-type: none"> Click the 'Detail' link to view the value of the parameter before the change. 
Session ID	The identifier of the admin/staff login session during which the event occurred.
Affected Object	The identifier of the parameter that was changed.
New Value	Click the 'Detail' link to view the value of the parameter after the change.

- You can navigate to different pages by clicking 'Next' or 'Prev' at the bottom.

Add/Remove Columns in the Log Viewer

Six columns are displayed by default in the 'Audit Data Log' interface. You can add more columns if you want to view additional details. You can also hide columns that you don't want displayed.

To add or remove columns

- Click the 'Customize' button at top-right

The screenshot shows the 'Customize Audit Table Columns' dialog box. The dialog box has a title bar with 'Customize Audit Table Columns' and a close button (X). Below the title bar, there are several columns of checkboxes for selecting or deselecting audit table columns. The columns are:

- Customer (checked)
- Log Creation Date (checked)
- Staff (checked)
- Component Name (checked)
- Event Name (checked)
- Affected Object (unchecked)
- Action Type (checked)
- Old Value (unchecked)
- New Value (unchecked)
- Extra Information (unchecked)
- Session ID (unchecked)

At the bottom right of the dialog box, there are two buttons: 'Cancel' and 'Save'.

- Use the check-boxes to enable or disable columns as required

Note: Mandatory columns are grayed-out and cannot be disabled.

- Click 'Save' to apply your changes

The following sections explain more about filtering and searching the logs

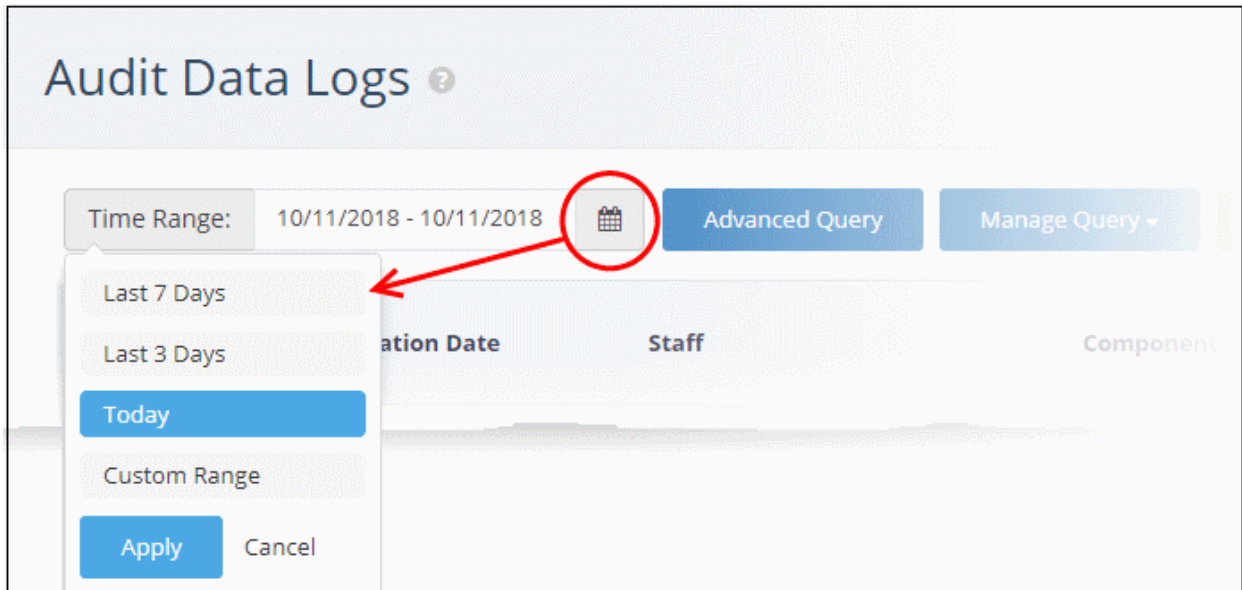

- **Select the time period to view the logs**
- **Use advanced search query to filter logs**
- **Use saved search queries to filter logs**
- **Export the logs as .csv file**

Select the Time Period to View Logs

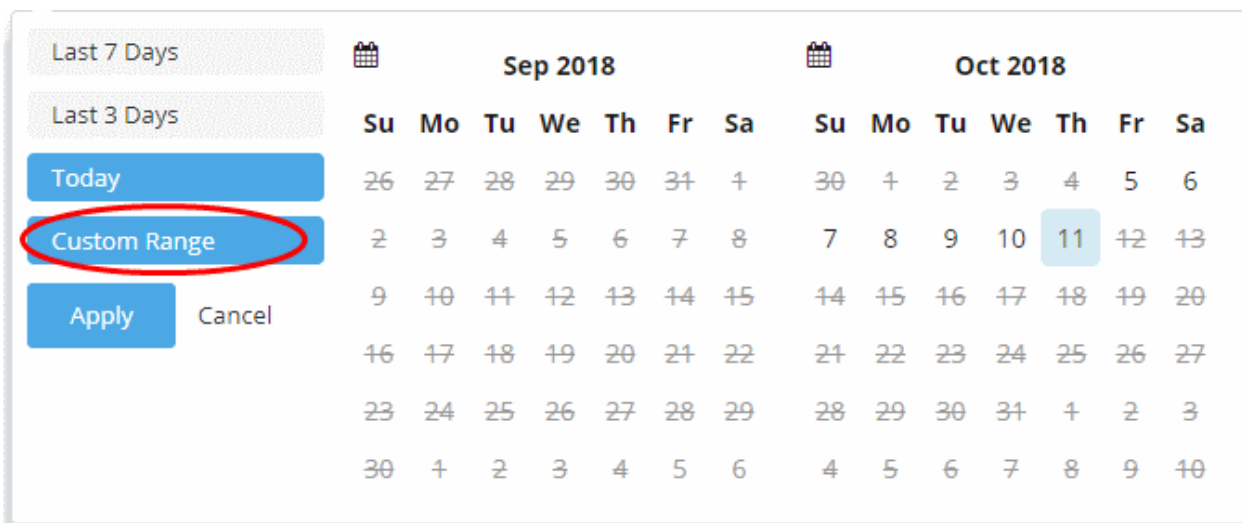

- Logs are available for up to seven days prior to the current date.
- Use the 'Time Range' field at top-left to choose the log display period.

To view logs for a specific time period

- Click the calendar icon at the right of the 'Time Range' field

- Select the time period:
 - Last 7 Days - Event logs for the previous seven days
 - Last 3 Days - Event logs for the previous three days
 - Today - Event logs for the current day
 - Custom Range - Get event logs for a specific date range.

- Select the start and end dates from the calendars.
- Click 'Apply'

Use Advanced Search Query to Filter Logs

Custom search queries let you filter logs for specific events on a specific module. The query can also be saved for use in future use.

To filter logs using an advanced search query

- Click the 'Advanced Query' button on the top

The 'Advanced Query' dialog will open.

Audit Data Logs ⓘ

Time Range: 10/11/2018 - 10/11/2018 **Advanced Query** Manage Query ▾

Customer	Log Creation Date	Staff	Component N
fr			Desk

Advanced Query ✕

Advanced Query Name

Customer

Component

Event Name

Action Type

Staff

- Complete the form parameters:

Advanced Query - Form Parameters	
Column Header	Description

Advanced Query Name	Create a label for the query. Ideally this should clearly identify the purpose of the query.
Customer	Search for logs which concern specific clients.
Component	Search for logs which concern specific Comodo One modules. The available options are: <ul style="list-style-type: none"> • All • Comodo One (the Comodo One umbrella console) • Service Desk
Event Name	Search for logs that have a specific label
Action Type	Search for logs which feature a specific activity.
Staff	Search for logs which involved specific personnel.

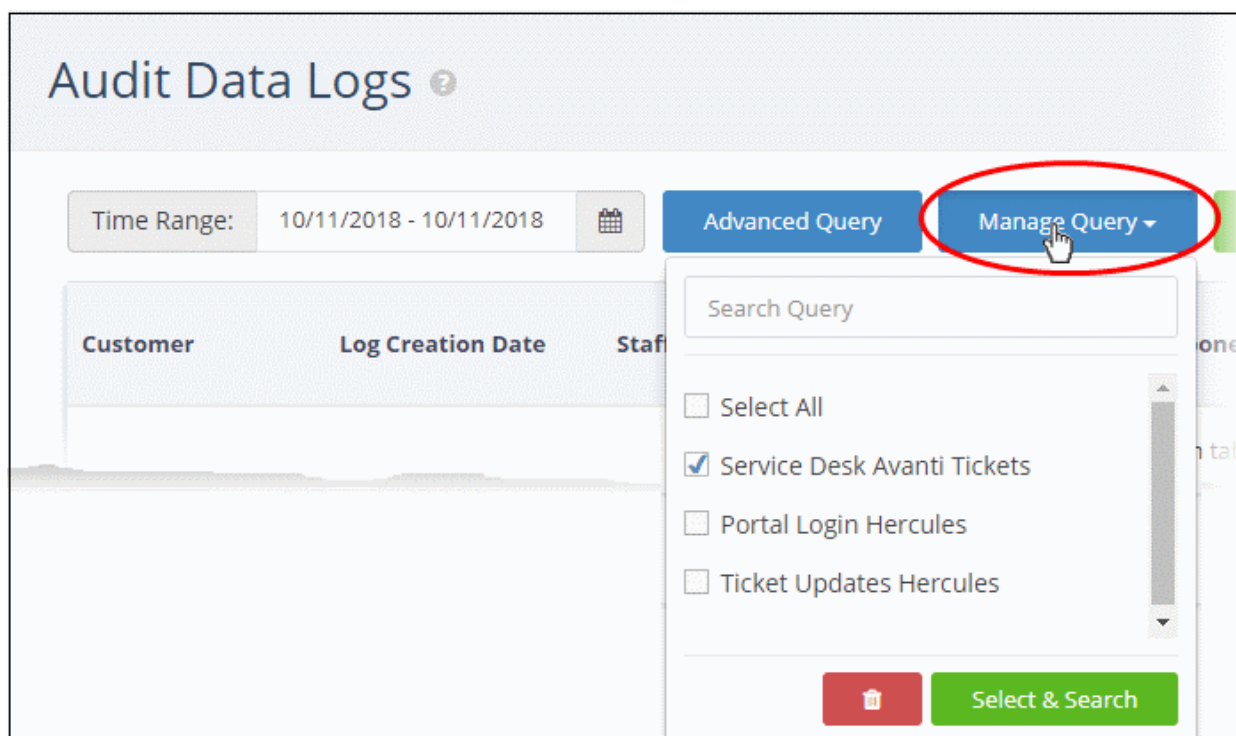

- Click 'Search' to filter logs based on the conditions in your query.
- Click 'Save' to save the query for future use. See [Use Saved Search Queries to Filter Logs](#) for more details.
- To clear an active filter, click 'Advanced Query' > click 'Clear Form' > click 'Search'.

Use Saved Search Queries to Filter Logs

- Comodo One lets you save search queries for use in future

Use a saved query

- Click the 'Manage Query' button at the top

- Select the queries you want to use from the drop-down. You can select any number of queries at a time.

Tip: Type first few letters of a query name in the 'Search' box to quickly find a specific query.

- Click 'Select & Search'

The logs will be filtered and only those meeting the search queries will be displayed.

- Select queries and click the trash can icon  to remove them from the list of saved queries.

Export the Logs as .csv File

The currently displayed logs can be exported to a comma separated value (CSV) file for later analysis and troubleshooting.

To export logs to csv file:

- Click the 'Export to CSV' button.

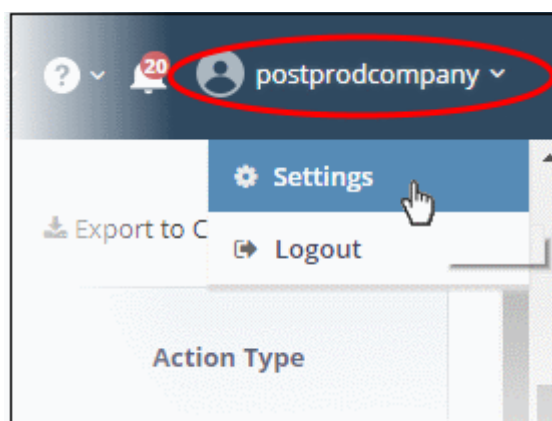

The log file will be downloaded as a .csv file. The file can be opened with spreadsheet applications like Microsoft Excel and OpenOffice Calc.

16 Configure C1 Settings

- Click your username at the top-right and select 'Settings'
- The 'Settings' interface lets you change your password, set your time-zone, configure launch preferences, switch from Comodo One skin to ITarian skin, reset two-factor authentication, and generate backup codes.
- You can also choose a particular module to open right after you login to Comodo One.

To open the Comodo One Settings screen

- Click your username at top-right then select 'Settings'

The 'Settings' screen will open:

The screenshot displays the 'Settings' page with six distinct configuration panels:

- Change Password:** Includes three input fields for 'Old Password', 'New Password', and 'New Password (Again)', along with 'Clear Form' and 'Save' buttons.
- Two-Factor Authentication:** Shows the configuration date as '10/31/2018' and a link for 'View Backup Codes', with a 'Reset Configuration' button.
- Change Time Zone:** Features a dropdown menu for 'Time Zone' (currently set to '(+03:00) Europe/Moscow') and a checkbox for 'Daylight Saving Time', with a 'Save' button.
- Comodo One Application Launch:** Contains two radio button options: 'Open licensed application on new tab' and 'Open licensed application on current tab', with a 'Save' button.
- Comodo One Login Page:** Lists six radio button options for setting different pages as the login page, with a 'Save' button.
- Activate me on ITarian:** Includes a checkbox for 'ITarian skin', a preview image of the ITarian interface, and a checked checkbox for 'I Accept the End User Licence Agreement', with a 'Save' button.

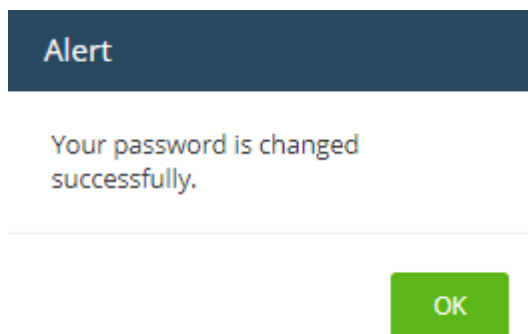

The interface allows you to:

- **Change your password**
- **Change time zone**
- **Configure application launch settings**
- **Set a licensed application as your Comodo One login page**
- **Reset two-factor configuration and regenerate backup codes**

- **Switch Comodo One portal skin to ITarian portal skin**

To change your password

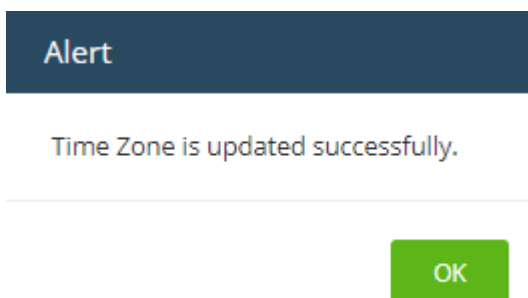

- Click your username at top-right then select 'Settings'
- Go to the 'Change Password' tile
- Enter your current password in the 'Old Password' field
- Enter your new password and confirm it in the respective fields
 - Click 'Clear Form' if you need to start again
- Click 'Save' to register your new password

- Click 'OK' in the alert screen.

To change the time zone

- Click your username at top-right then select 'Settings'
- Go to the 'Change Time Zone' tile.
- Select your preferred zone from the drop-down menu.
- Enable 'Daylight Saving Time' if applicable for your location.
- Click 'Save'

- Click 'OK' in the alert screen.

To configure application launch settings

- Click your username at top-right then select 'Settings'
- Scroll to the 'Comodo One Application Launch' tile.

The tile lets you choose whether you want modules opened from the 'Applications' menu to open in a new tab, or the same tab.

- Open licensed application in new tab - If selected, the application you choose from the 'Application' menu will open in a new browser tab. You can also choose whether the Comodo One menu should be visible above the application interface.

Comodo One Application Launch

Open licensed application on new tab

Comodo One Default Menu Settings

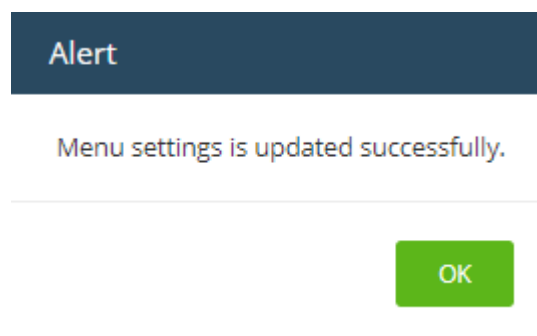

Open Comodo One menu as collapsed

Open Comodo One menu as extended

Open licensed application on current tab

Save

- **Open Comodo One menu as collapsed** - The Comodo One menu bar is not shown on the new browser tab. You can open the menu bar by clicking the down arrow at center top.
- **Open Comodo One menu as extended** - The Comodo One menu bar is shown on the new browser tab.
- Open licensed application on current tab - Applications will load in the same tab. The Comodo One menu bar is displayed by default.
- Click 'Save' to apply your changes.

- Click 'OK'

To set a licensed application as your Comodo One login page

- Click your username at top-right then select 'Settings'
- Scroll to the 'Comodo One Login Page' tile.

The tile shows all licensed applications added to your account.

- Select the application that you want to see immediately after you login to Comodo One.
- Click 'Save' to apply your changes.

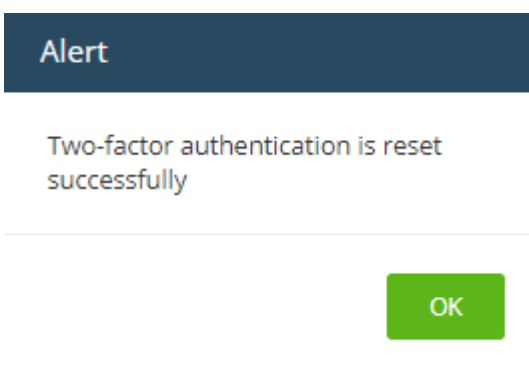

The chosen application will open automatically the next time you login to your account. Please note that your **role** permissions need to allow you to access the configured application.

To reset two-factor configuration and regenerate backup codes

- Click your username at top-right then select 'Settings'
- Scroll to the 'Two Factor Authentication' tile.

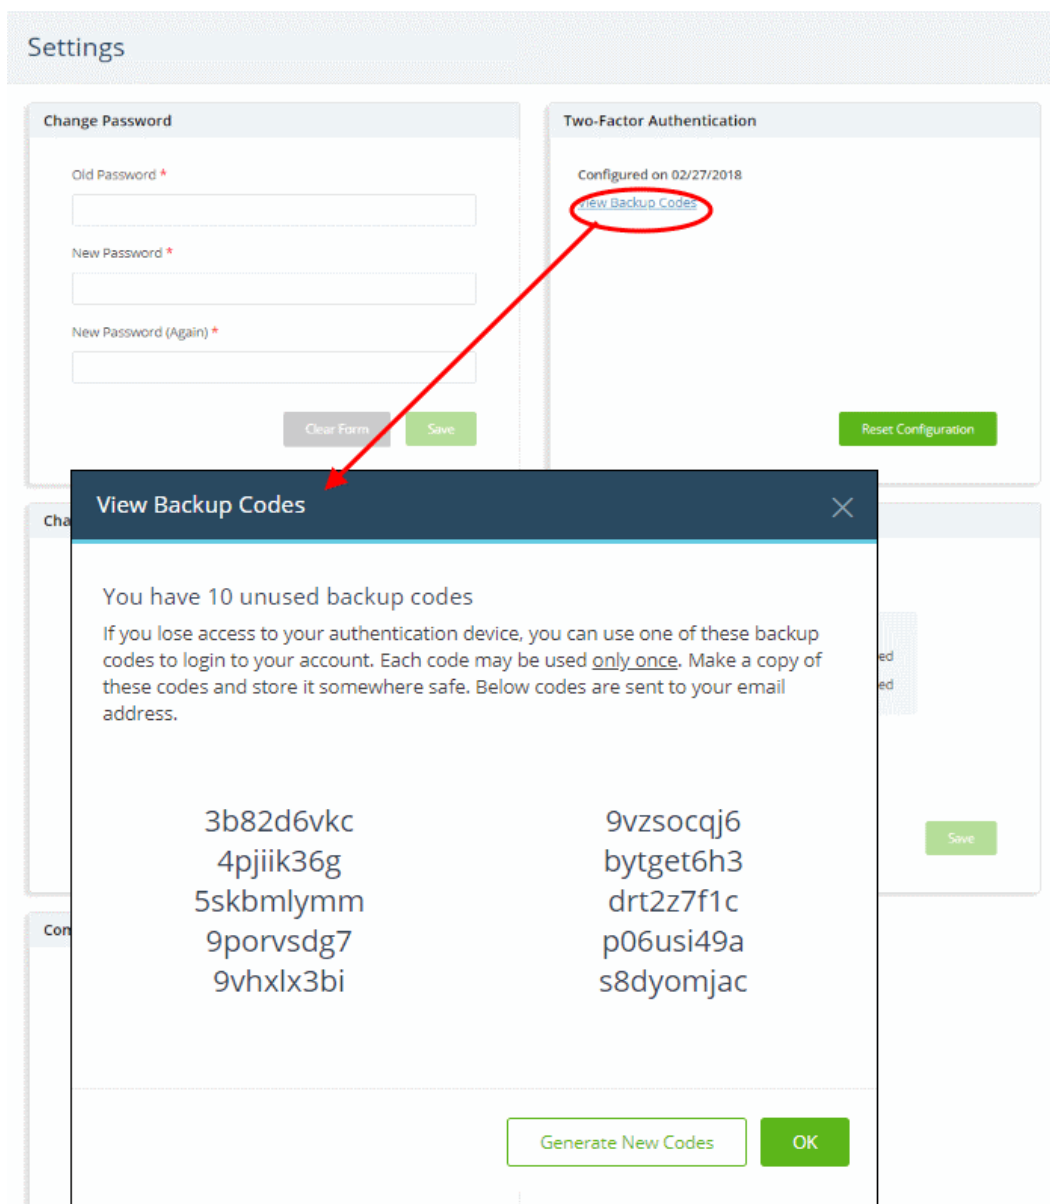

The tile lets you reset two-factor authentication for the admin account and regenerate backup codes.

- Click 'Reset Configuration' at the bottom to reconfigure two-factor authentication
- Click 'OK' in the confirmation dialog

You will be prompted to repeat the two-factor authentication process at next login. This applies to account admins only. Other users need not reconfigure unless two factor is reset in 'Staff Management' > 'Staff'.

- Click the 'View Backup Codes' link to see your backup codes:

Keep a copy of the backup codes so you can login to Comodo One when you don't have access to your authentication device.

- Click 'Generate New Codes' if you want to create a new set of codes for future use.

After you generate a new set of codes, you cannot use the old codes.

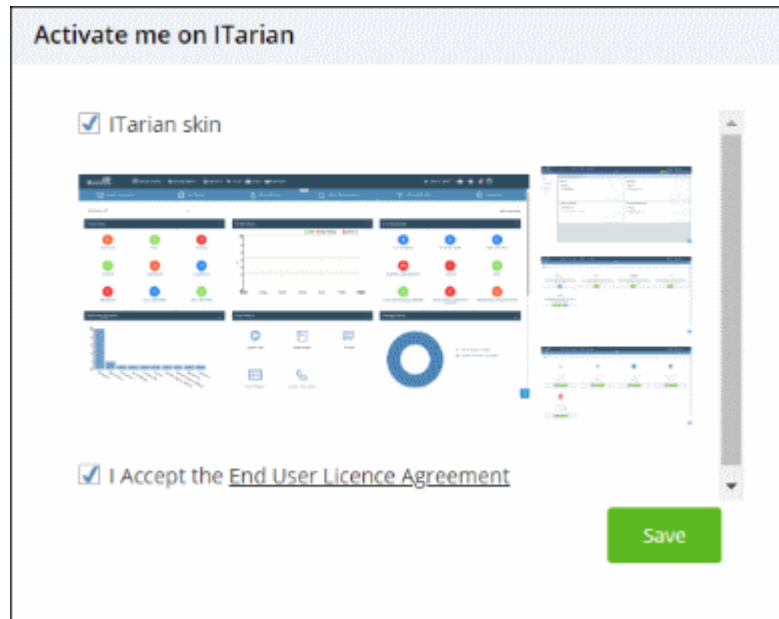

Switch Comodo One to ITarian Portal Skin

Select whether you want to use the Comodo One console or the ITarian branded console. You can access all your apps and account details from both skins.

Note – You cannot switch ITarian skin to Comodo One skin. Contact support@itarian.com if you wish to switch to the Comodo One skin.

To change Comodo One portal skin to ITarian portal skin

- Click your username at top-right then select 'Settings'
- Scroll to the 'Activate me on ITarian' tile.

- Select 'ITarian skin' to migrate from 'Comodo One' to 'ITarian' skin
- Agree to EULA and Click 'Save'
- Your interface will change immediately to ITarian skin. Note – you cannot switch back to Comodo One skin from the settings screen. Contact support@itarian.com if you wish to switch back to Comodo One skin.

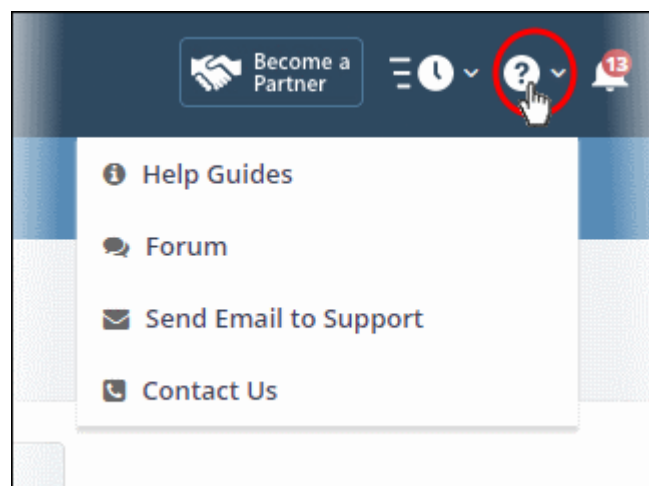

17 Comodo One Support

Comodo One is committed to providing the highest levels of support for its products. If you need technical assistance, we offer the following convenient support services:

Online Help Guides

Comodo help guides for all products are available at <https://help.comodo.com>. You can navigate to any guide from the main page.

- Click the help icon then 'Help Guides' to view Comodo One user guides

Each module of the application has its own dedicated help guide containing detailed descriptions.

Forum

Register at Comodo One forums and join thousands of other users discussing all aspects of our products.

You'll benefit from the expert contributions of developers and fellow users alike and can find answers to any questions you may have.

- Click 'Forum' to open the community portal at <https://c1forum.comodo.com/>

Send Email to Support

If you are unable to find a solution in either the help guides or the forums, then please email support at c1-support@comodo.com

Contact Us

Support phone numbers for US and international customers.

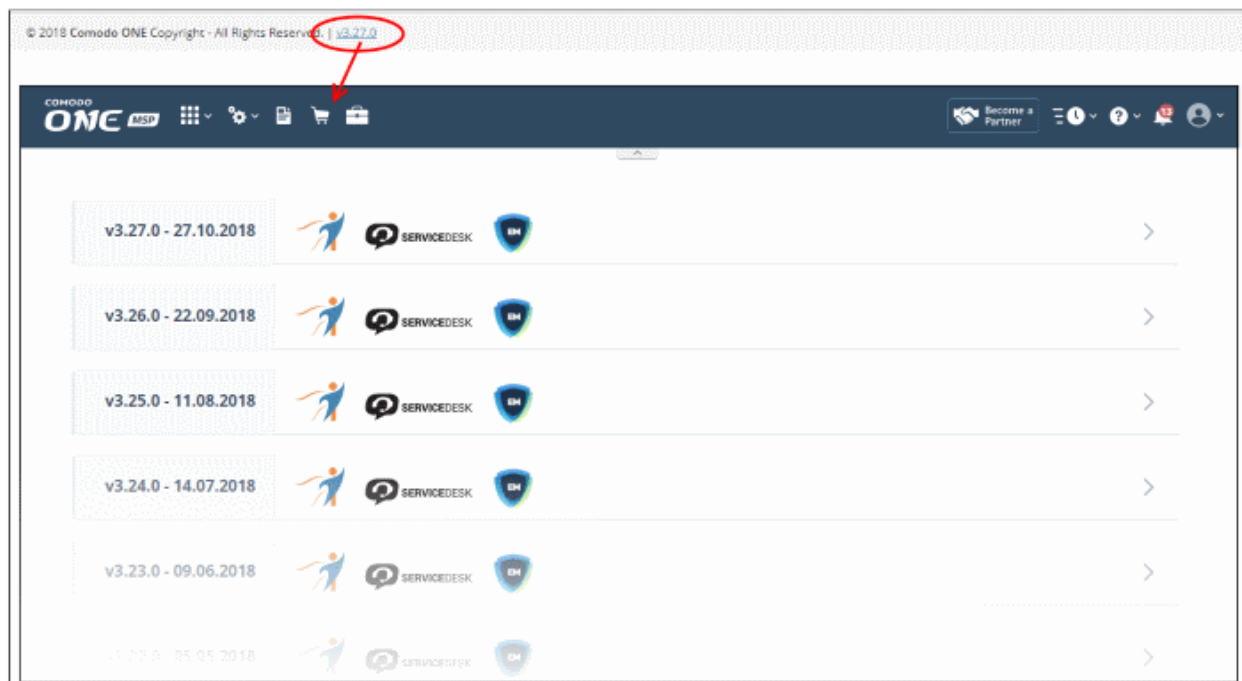

Submit a Ticket

You can submit support tickets to Comodo at <https://support.comodo.com/>. The site also contains an extensive knowledge-base, FAQs and tutorials.

18 View Release Notes

Release notes contain information about new features, improvements and bug-fixes in each version of Comodo One.

- Click the Comodo One logo at top-left to open the dashboard
- Click the version number at the bottom:

- Click the arrow at the end of a row to read the notes for a specific version.

Appendix - C1 Products

- There are two types of Comodo One account – 'Comodo One MSP' and 'Comodo One Enterprise'.
- The following table shows the products available with each type:

S.No	Products	MSP	Enterprise
Default			
1	Endpoint Manager	✓	✓
2	Dome Shield	✓	✓
3	Service Desk	✓	✓
4	RMM Plug-in	✓	✓
Licensed Applications (Integrated)

6	cWatch	✓	✓
7	cDome Secure Web Gateway (Dome Standard)	✓	✓
8	cDome Shield	✓	✓
9	cDome Data Protection	✗	✓
10	cDome Antispam Gateway	✗	✓
11	cDome Antispam Gateway - MSP	✓	✗
12	cDome Firewall Virtual Appliance	✓	✓
13	cDome Firewall Central Manager	✓	✓
14	cWatch EDR	✓	✓
Tool Set			
1	Network Assessment Tool	✓	✓
2	Comodo Cleaning Essentials	✓	✓
3	Unknown File Hunter	✓	✓
4	Auto Discovery and Deployment Tool	✓	✓

About Comodo Security Solutions

Comodo Security Solutions is a global innovator of cybersecurity solutions, protecting critical information across the digital landscape. Comodo provides complete, end-to-end security solutions across the boundary, internal network and endpoint with innovative technologies solving the most advanced malware threats. With over 80 million installations of its threat prevention products, Comodo provides an extensive suite of endpoint, website and network security products for MSPs, enterprises and consumers.

Continual innovation and a commitment to reversing the growth of zero-day malware, ransomware, data-breaches and internet-crime distinguish Comodo Security Solutions as a vital player in today's enterprise and home security markets.

About Comodo Cybersecurity

In a world where preventing all cyberattacks is impossible, Comodo Cybersecurity delivers an innovative cybersecurity platform that renders threats useless, across the LAN, web and cloud. The Comodo Cybersecurity platform enables customers to protect their systems and data against even military-grade threats, including zero-day attacks. Based in Clifton, New Jersey, Comodo Cybersecurity has a 20-year history of protecting the most sensitive data for both businesses and consumers globally.
