

cWatch Web - WHMCS Quick Start Guide Instructions

1. Sign up for CAM (Customer Account Management) account. Below is the link to sign up
https://accounts.comodo.com/reseller/management/create_account?display_group=cw
2. The CAM account is the same credentials to log into your Partner Portal account. Below is the link
<https://partner.cwatch.comodo.com>
3. Once the CAM account is created, you can begin downloading and installing WHMCS plugin. Below is the URL to download the module.
<https://marketplace.whmcs.com/product/4601>
4. Unzip the contents and it will decompress the zip file:
5. Login to your FTP server using your preferred FTP file manager, navigate to the WHMCS install directory and copy the contents to the folders.
6. Login to your WHMCS administrator console. Navigate to setup > addon modules and you will see the cWatch Web for WHMCS module along with your other available modules listed.
7. Click the Activate button and the cWatch Web Module for WHMCS is now activated.
8. In order to create packages in the next section you must define the access controls for the addon. To do so, click Configure and choose Full Administrator.
9. Go to 'Addons' > 'cWatch' and you will be brought to the Quick Configuration menu.
10. Input your Partner Portal Credentials and click 'Test Connection' to verify the connection.
When you see that the connection to the API was successful click Save Settings.
(This is the same user name and password that you login to <https://partner.cwatch.comodo.com> with.)
 - Production Endpoint: <https://partner.cwatch.comodo.com>
 - Staging Environment: <http://cwatchpartnerportalstaging-env.us-east-1.elasticbeanstalk.com/>
Enter staging Username: cwatchwebtestpartner@yopmail.com
Enter staging Password: 1234567Aa
11. To create a product/addon simply scroll down to the license and change it from disabled to enabled.
Once enabled you will see the details of the product/addon that is completely customizable.
- Note that by default a new hidden Product Group will be created under the product section labeled Web Security – cWatch Web.

About Comodo Security Solutions

Comodo Security Solutions is a global innovator of cybersecurity solutions, protecting critical information across the digital landscape. Comodo provides complete, end-to-end security solutions across the boundary, internal network and endpoint with innovative technologies solving the most advanced malware threats. With over 80 million installations of its threat prevention products, Comodo provides an extensive suite of endpoint, website and network security products for MSPs, enterprises and consumers.

Continual innovation and a commitment to reversing the growth of zero-day malware, ransomware, data-breaches and internet-crime distinguish Comodo Security Solutions as a vital player in today's enterprise and home security markets.

About Comodo Cybersecurity

In a world where preventing all cyberattacks is impossible, Comodo Cybersecurity delivers an innovative cybersecurity platform that renders threats useless, across the LAN, web and cloud. The Comodo Cybersecurity platform enables customers to protect their systems and data against even military-grade threats, including zero-day attacks. Based in Clifton, New Jersey, Comodo Cybersecurity has a 20-year history of protecting the most sensitive data for both businesses and consumers globally.
